

WE BELIEVE IN TOMORROW....

As members of the Chamber of Commerce we business firms and professional people are expressing our belief that great communities develop through cooperative effort of people working together. We have demonstrated our willingness to accept responsibility, participate in group action and support stable community growth. We believe in tomorrow! Among our ranks are 183 who became NEW members of the Chamber of Commerce during 1959. Their action has added weight to our dynamic Chamber program, aimed at the creation of new wealth to

broaden the economic base of Jackson County. THEY, too, believe in tomorrow! We are happy to have had a part in those accomplishments which create pride in our community. For example, OUR money helped make possible the initial contact with electronics firms this summer; OUR support paid for new descriptive literature, selling visitors on this area during the centennial year; OUR dollars carried forward a long range program resulting in a construction start on the new route to Klamath Falls and realignment of Crater Lake Highway. OUR backing started a solution to the off-street parking prob-

lem and stimulated further growth of this area as a retail and wholesale center. OUR program advanced the Rogue Basin Water Studies. OUR funds paid for research regarding the use of wood-waste and job stabilization. OUR cooperation helped to secure better airline service and an extended route to Boise. WE paid the cost of servicing 5,500 delegates representing 19 conventions last year. We are pleased that all area trade channels benefit from convention and tourist business we helped to generate. We believe in building a better community. We believe in tomorrow!
