Higher Parcel Post Rates in Effect

Washington—(UPI)—From now on, you will have to pay more for parcel post.

Effective Sunday midnight, rates went up an average of 17.2 per cent on fourth class mail, including parcels and catalogues.

The higher rates, authorized last Nov. 20 by the Interstate Commerce Commission, are aimed at boosting Post Office revenue by $88 million a year.

Only about 5 per cent of all bread is baked in the home today.

The Medical Roundup

by Walter Alvarez

Emeritus Consultant in Medicine, Mayo Clinic
Emeritus Professor of Medicine, Mayo Clinic

Keloids

Quite a few people want to know what keloids are. They are over-growths of the skin along lines where it has been cut or burned. Some people practically always react to a cut with a formation of a keloid. These look like raised welts. Skin specialists tell us that keloids are hard to get rid of. Sometimes exposure to x-rays will tend to shrink them. Sometimes, after a year or two, the keloid will flatten down a good deal, and as it loses its red color, it will not look so bad. I just saw a woman who went to a physician because of a bad keloid. He must have been a rare optomist because he cut it out. Now she has a bigger one in its place!

DR. ALVAREZ

Anti-Malaria Drugs

As many physicians know, some of the synthetic quinine-like drugs, which were made during World War II to protect our soldiers from malaria while they were fighting in the South Seas, have been found effective in helping some people with arthritis, especially of the rheumatoid type. They can help, also, the type that is due to the skin disease psoriasis. Sometimes the drug helps, also, in cases of spondylitis—the type of arthritis which causes the spinal column of a young man to become one single solid bone; and it works miraculously in some cases of lupus erythrematosis.

A Pseudo-Hermaphrodite Produced

As I keep saying in this column, it distresses me when I see police treating as criminals persons who have a mix-up in their sexual feelings. I keep reading now reports of boy babies born with a female type of genitalia. The mixup was produced by a doctor's having given the mother large doses of a female hormone all through her pregnancy, almost from the beginning. This was done probably with the idea of preventing a miscarriage.

The fact that such treatment can change a boy baby into something that looks much like a girl baby shows very clearly that later on no one must treat the child as a criminal because "it" keeps maintaining that "it" is a boy, and not a girl, as the obstetrician thought. Such people should not be denied (as often they are today) the right to have the mistake corrected.

* * *

Dr. Alvarez' booklet on nervousness may be obtainel by sending 25 cents and a large, stamped, self-addressed envelope with your request to Dr. Walter C. Alvarez, Dept., MMT, The Register and Tribune Syndicte, Box 857, Des Moines 4, Iowa.

Youth Council Rally Planned for Feb. 7

For the past several months, the Interdenominational Youth Council has been busy making plans for the annual youth rally set for Feb. 7.

The rally is the council's part in Youth Week observance. The theme of this year's Youth Week is "Thy Kingdom . . . On Earth". The First Methodist church, 607 West Main st., is the planned site for the 5 p.m. devotional service, in which various youth groups of the Medford area will participate. The music for the event will be provided by the Medford High school choir.

The group will later go to the YMCA for refreshment, recreation, and fellowship.

All high school youth of the Medford area are invited to attend. A 25 cent registration fee will be charged. A radio program with emphasis on Youth Week entitled, "Seek Ye First", will also be presented by the council.

There are 111 newspapers published in New York City.
