

**SHOW SCRAPBOOK** - Members of Crater high school Future Farmers of America chapter in Central Point, pose with their winning scrapbook entered in the district skills contest at Eagle Point recently. This will be entered in the state contest this spring. From left: Pete Melsted, Delmer Smith, Alan Bray, Tom Kimbale and Don Ryan.

They'll Do It Every Time *By Jimmy Hatlo*

**GROW BIG FRUIT TREE PROFITS EVEN IN ACID SOIL**

You can do it with **Viking Ship/Calcium Nitrate**

Acid soil can rob you of fruit tree profits three ways.

1. It can slow the conversion of ammoniac nitrogen to usable nitrate forms. Even with heavy applications of ammoniac nitrogen fertilizer, fruit trees can actually starve.
  2. Because of low calcium, acid soil is susceptible to compaction and puddling. Feeder roots may become water-logged and die.
  3. Excess acidity can cause the formation of toxic chemicals highly dangerous to living tree roots.
- Viking Ship Calcium Nitrate can help you fight these acid-soil dangers. The fast-acting nitrate nitrogen in Viking Ship is available without conver-

sion. Unlike ammoniac forms, nitrate nitrogen is not trapped in upper soil layers. It moves with water to the root zone where it can go to work immediately to give trees a vigorous start, help them set big crops.

Viking Ship also provides 20% water-soluble calcium\* that helps counteract soil acidity. By improving soil structure, it helps prevent compaction, so that tree roots can forage easily for nourishment.

And Viking Ship is easy to apply. It can be spread evenly or metered accurately in irrigation water; it dissolves quickly; it leaves no residue. Ask your fertilizer dealer for complete information about Viking Ship Calcium Nitrate.

\*Equivalent to 28% lime expressed as calcium oxide.

Use the fertilizer that fights soil acidity!
