

Basic Compound Found to Increase

Madison, Wis. - (Science Service) - DNA, one of the basic life compounds and the protein that makes up the chromosome, is not the "trigger" that sets off cell division. Actually, there is an increase in the synthesis of DNA, or deoxyribonucleic acid, immediately after the nucleus divides, a team of University of Wisconsin researchers here reported. Since each daughter cell contains chromosomal material equal in quantity to what the parent nucleus contained, the DNA in cell nuclei must double, Dr. Harold P. Rusch said.

This doubling had been thought to be the mechanism that started cell division. Now it appears that the cytoplasm, the material surrounding the nucleus, must influence cell division.

St. Mary's High School Juniors John Snider, Florian Shasky and Fredrick Burich will be St. Mary's delegation to the leadership conference on the Seattle university campus.

They will leave Friday, March 18, for Seattle and spend three days at the university attending seminars on spiritual, social and cultural leadership as well as student government. The social program will feature a banquet to be followed by a 3 hour cruise around Lake Washington.

On Sunday, the group will attend Mass at the Cathedral followed by breakfast. Later in the day a tour of Seattle is planned.

The trip is financed by St. Mary's Student council as an investment in leadership. Delegates will share what they have learned with the rest of the students.

The third issue of the school paper, the Marion, was distributed to the students on Friday, March 4, at 2:30 p.m. The paper's featured articles were the junior-senior banquet, National Honor society and induction of new members, the Sodality with their new project, the Lenten Four.

The staff includes Editor Anne Bennett, Sports Editor John Snider, Business Editor George Lucas and reporters, Lynne Parsons, Carole Doyle, Pauline Ashton and Karen Crevier.

Spectators were surprised at the Pep Rally held in the gymnasium Friday, March 4.

After the usual introduction of the team, and short talks by the priests and Coach McKibbin, the cheerleaders gave a preview of the night's games. A Mustang was hunted and gallantly killed in the midst of a forest (Pep Club members).

The rally ended with the old familiar question: "Who's going to win the game tonight?" and the answering shout "We are."

Leaping ahead over the leap year week end, the Lance staff met the biggest of their deadlines. The eleven members of the staff could be seen at odd hours typing, pasting, retyping and condensing materials that made up the 30 pages—product of three weeks of hard labor.

The midnight oil reserves were drained as the deadline came closer. A number of classes were surprised a bit as the yearbook camera captured the students' study habits. Now that the crisis has been met, the annual members are going at a comparatively slow and easy pace at the completion of the remaining ten pages.
