Tranquilizers May Aid Doctor More Than Patient

Washington—(Science Service) — It is the doctor who needs those tranquilizers, not the patient.

This was the implication conveyed by several speakers at a seminar here on the current uses of tranquilizers, stimulants and related drugs.

Perhaps general practitioners are doing out the calming pills to relieve their own anxieties which develop when they do not know what to do for a patient, Dr. Joel Elkes of the National Institute of Mental Health, Bethesda, Md., suggested at the meeting sponsored by the Medical Society of the District of Columbia.

Only Treat Symptoms

Tranquilizers can only treat symptoms. They cure nothing, he stressed. Furthermore, they tend to "mask" symptoms that the doctor could find useful in diagnosing the patient's problem. They abolish hostility, fear and anxiety which are useful symptoms to the practitioner. The doctor can become frustrated and anxious himself when these symptoms become evident in a patient. It must be kept in mind that abolishing these symptoms does not cure the patient, he said.

Additional criticism came from Dr. Otis R. Farley, director of the medical and surgical branch of St. Elizabeths hospital here. He reminded the doctor audience that many of these popular drugs can alter the body's ability to fight infections. Others can cause skin rash, and affect the function of the adrenal glands and entire enzyme system.

No Specific Antidote

Furthermore, there is no specific antidote for many of the tranquilizing drugs. Many of them have proven fatal when given in seemingly small dosages, he cautioned. By the time the physician is aware that the dosage is fatal, he cannot do much because there is no counteracting agent available for many of the drugs.

Doctors should also be aware of the dangers of administering these drugs in combination with other drugs. Dr. Farley pointed out that not enough is known about combinations of such drugs to justify less than a very cautious approach.

Questioning the claims and favorable reputation that rapidly developed after tranquilizers were introduced, he reminded doctors that he had seen more people develop bed wetting than he had seen cured of it as a result of treatment with the drugs.

Radiation May Improve Coal

Washington—(Science Service) — The possibility that atomic radiation could be used to make better bituminous coal for some purposes has been raised by the Bureau of Mines here.

Research conducted by the Bureau showed that irradiation (by neutron and gamma ray bombardment) makes some bituminous coal harder. This might ultimately make possible production of stronger coke.

If true, this could lead to improvements in processes for changing coal to liquid fuels and chemicals. But "considerable research will be required to confirm this possibility," the Bureau said.

The research, carried out at government-owned atomic installations, showed that radiation left most varieties of coal "substantially unchanged." Analyses were made on irradiated samples representing all ranks of bituminous coal, including lignite.

FIRST AID WORK

St. Louis—The American Red Cross in one year issued 679,800 certificates to men and women who had completed the courses of instruction in emergency first aid training.

TO TRANSFER FACILITIES—This is an aerial view of a portion of the facilities at Huntsville, Ala., which are to be transferred to the National Aeronautics and Space Administration July 1 under terms of a Presidential proposal announced last October. It will be known as the George C. Marshall Space Flight Center. The facilities, occupied by 10 laboratories headed by Dr. Werner von Braun, are valued at about \$100 million. (UPI Telephoto)

School District's Fixed Charges Are Expected To Rise

(Editor's note: This is the last in a series of articles in which the proposed general fund budget for School District 549C is reviewed. District patrons will vote on the proposed budget May 2. Today's article concerns fixed charges of the district, and items which were deleted from original consideration.)

Increases in teachers salaries and additional plant facilities are reflected in a rise in fixed charges in the Medford school district proposed budget for 1960-61.

Some \$215,985 of the proposed \$3,914,846.99 general fund budget is allocated for retirement and social security expense, insurance and judgments, interest on current loans and appraisal.

Retirement and social security expenses are estimated at \$174,072, while \$36,320 has been allocated for insurance and judgments. Interest on current loans amounts to \$2,593, and \$3,000 is budgeted for appraisal.

Also included in the budget is \$20,000 for emergency purposes.

Does Not Include Funds

The general fund budget of \$3,914,846.99 does not include \$494,909.47 of the bond interest and redemption fund or \$237,060.97 in the school lunch fund. With the latter two added to the general fund, the total proposed estimated expenditures and reserve is \$4,646,817.43.

Estimated receipts in the bond interest and redemption fund total \$69,036.60, leaving \$425,872.87 necessary to balance the budget. Total estimated tax levies for next year for the bond interest and redemption fund is \$468,460.16, including \$42,587.29, the estimated amount which will not be collected in taxes.

The school lunch fund is expected to balance itself with federal money received through the state, and the sale of lunches.

Several Items Deleted

Several items, which were originally considered to be included in the budget, were deleted to trim expenses to what administrators considered a minimum for operational costs next school year.

The items deleted, totaling about \$85,399, are considered desirable, although administrators believe they are not necessary next school year.

Some \$18,000 worth of equipment for schools and for the wood, metal auto-mechanics shops was deleted, as was about \$14,000 for replacing a school bus.

School and vocational shop equipment probably will be needed in the future, administrators indicated, and al-

Nova Visible As Faint Object

Cambridge, Mass.—(Science Service) — A new nova that can be seen as a faint object with the naked eye or binoculars was discovered March 7.

A nova is a star that suddenly increases its light and becomes prominent in the sky for a time but later diminishes its light and becomes obscure.

The nova is a brightness of fifth magnitude. It can be seen from about 1 a.m. in the southeastern sky until morning when it will have moved up high in the southern sky. It is located in the Milky Way on the border between two constellations: Hercules, and Aquila, the eagle.

The find was reported by Miss J. M. Vinter - Hansen, Danish astronomer, to Harvard College Observatory here, clearing house for astronomical information in the Western Hemisphere.

Toads Provided Shelter From Cold

Des Moines — Toads that face cold winters here have more, expanded the cage, and set up community living.

He claims they're the only toads in Iowa with a furnished home complete with electric lights.

Missing Hot Rolls Traced by Police

Portland, Ore. — (UPI) — A restaurant owner arrived at his place of business with 300 hot rolls. To his annoyance, he found his key wouldn't open the front door.

Leaving the crate of rolls on the sidewalk, he went to the back and broke a window. This got him into the bathroom, but the bathroom door was locked.

He smashed it, entered the dining room and tried to open the front door from the inside. It still wouldn't budge.

So, he forced it and found... the crate of 300 rolls missing from the sidewalk.

Police, responding to a call, put a tracer on the rolls. The mystery was soon solved: They had been picked up by and mangled in a city garbage truck.

will our state gain or lose CONGRESSMEN?

Our representation in Congress for the next ten years will be based on the 1960 U.S. Census count this April.

The amazing growth and shift of the U.S. population since our last Census is expected to produce many changes in the makeup of the House of Representatives.

Some states will gain Representatives, some states will lose and some states, of course, will remain unchanged.

It is important that you be counted in the Census so you and your state will have its fair share of Representatives.

Your advance questionnaire will come by mail. Fill it out at your convenience and have it ready when the Census taker comes early in April.

BE SURE YOU'RE COUNTED WITH ALL AMERICANS

Like other American business firms, we believe that business has a responsibility to contribute to the public welfare. This advertisement is therefore sponsored by
