Minimum Down Payments for Housing Reduced

Washington—UPI—Federal Housing Commissioner Julian H. Zimmerman today reduced minimum down payments on houses bought with government-insured mortgages.

The reductions will apply only on homes costing more than \$13,500. The biggest cutback would be \$515, on dwellings costing \$18,000 or more.

Congress gave Zimmerman authority last year to cut the down payments but he refused until now on grounds that loan money was too hard to get anyway. He told a news conference the loan situation did not begin to ease until two months ago.

3 Per Cent Required
Under the new schedule, 3 per cent cash will still be required on the first \$13,500 of house price. The middle bracket will be extended from \$16,000 to \$18,000, and the rate lowered from 15 to 10 per cent. On the portion of price above \$18,000, a rate of 30 per cent down will be required—the amount which has applied above \$16,000.
