Youth Work Program

Over the years we have heard a number of complaints along these lines:
"There's not much for kids to do in the summer."
"Why doesn't somebody (unspecified) set up a summer work program for teen agers?"
"If kids had constructive things to do, not as many of them would get in trouble."
"Recreation for high school students is fine—but so is a job, only they're tough for them to get."

THE welfare office for several years has been operating under a state policy which terminates aid to dependent children for older boys and girls in the summertime, under the theory that they can get jobs during that period.
The young people, themselves, have been restless, and sometimes bitter, over the fact that summer vacation jobs for them are limited.
Some few have "made" their own jobs, setting up a routine of baby-sitting, or gardening, or lawn mowing. But for most, summer is when there is more time than things to fill it.

THESE are some of the reasons why we hail with real appreciation the cooperative young people's work program, inaugurated with the cooperation of a number of people and organizations, and centered in the Oregon state employment service and the Medford 20-30 club.
Details of the program were outlined in a story in this paper last Sunday, but some of the pertinent points bear repeating. (The story, which ordinarily would have merited Page 1, was shoved aside by the volume of election returns.)
Young people may file their work applications at the employment service office, 119 North Oakdale ave., or at the East Side Drug Store, 264 East Main st., Ashland, whichever is nearest. They should do so by Monday, June 20.

Prospective employers (and this means people with yard work, house-cleaning or baby-sitting jobs, as well as business firms) may call either of the two offices to place "orders" for young workers. Work permits, when needed, will be issued by the employment service.

THAT, in essence, is all there is to it.
We hope it will be successful. If both boys and girls who want to work will file their applications, and if prospective employers will file their work orders, there is no reason at all why it should not be a resounding success.
If it is successful, it undoubtedly will be continued. If it isn't, it probably won't.

It is to be hoped that it will prove just as successful, and helpful, here as it has in other communities where it has been tried.—E.A.

"The Enemy"

Do you know who "the enemy" is? Well, among others it includes the AFL-CIO, the Episcopal church, the Catholic Interracial Council, the Elks lodge, the U.S. Department of Justice, the YWCA, and the U.S. Air Force.
At least, it does to the monthly newsletter of the White Citizens' Councils of America, published in Jackson, Miss.

THESE "enemies" are damned for "favoring civil rights and anti-South legislation." We don't favor "anti-South legislation," but we do favor civil rights, on the theory that one citizen of the United States should have the same privileges as any other.
So, as an "enemy," include us in.—E.A.

What Can We Afford?

There are two schools of thought in America today, about national spending policies.
On one hand, there are those who believe that a balanced budget, a reduction in the national debt, and, when possible, cuts in taxes, are vital to the country's well-being.
On the other hand, there are those who believe that the nation is not putting enough money into its basic resources and productive facilities—into education, housing, natural resource development, slum clearance, and the stimulation of production and the minimization of unemployment.

OF THE second view, those who hold the first will say, "We can't afford it. Our taxes are too high. The national debt is too high."
This may be. If it is true, it is chiefly and directly attributable to the size of our necessary defense expenditures, which account for more than half of the national budget.
But IS it true? There is evidence to suggest otherwise. For instance:
In 1949, the Federal debt was 93 per cent of our gross national product, but in 1959, it was only 62 per cent. In 1949, the national debt was equal to 115 per cent of our national income; in 1959, it was only 71 per cent.

MANY economists are concerned that our rate of growth, despite the fact that these figures show it to be outstripping our federal growth, is not nearly high enough.
They believe, if it is to increase to a rate above the present 3 per cent per year to a rate more nearly approximating the 6 per cent per year achieved by the Soviet Union, a much more substantial investment will be necessary.
Much of this must come from private enterprise. But, at the same time, much of it must come from federal sources.
In a nation where the living standard is at an all-time high, the excuse "we can't afford it" is a pretty lame one.—E.A.

Communications

Letters to the Editor must bear the name and address of the writer, although under certain circumstances the use of a pen name or initial for publication is permissible. The Mail Tribune reserves the right to edit all letters with a view to clarification and condensation. Letters submitted for publication must not exceed 400 words. The letters printed in this column do not necessarily represent the views of the paper; in fact the contrary is often the case.

She Still Has Questions

To the Editor: Your articles on the "token" reduction in the proposed school budget seem to stress the need for increasing the budget, but fail to inform us as to how much money, if any, will be left from the current budget at the end of this school year. Isn't it reasonable to expect a surplus from a school budget that is over \$1,000,000 more than the city budget for the same period?

Demon Alcohol

To the Editor: The other day I stood by the bedside of a friend in a Medford hospital. Across the room lay another patient. One could plainly see that it would be some time before he would be out and around again. The visits of many young friends, plus the flowers, helped.

Conclusion

The only kind of summit meeting Mr. K is interested in is one that is DOMINATED BY RUSSIA.

Question

For an answer, let's turn to history.

Ex-Gov. Smith

Eugene—UPI—American newsboys are perfect examples of free enterprise, Ex-Gov. Elmo Smith said Tuesday.

Word From Happy Camp

To the Editor: It has been of considerable interest watching the Mail Tribune capture circulation along the road and the river of the California Klamath. It will be just as interesting to see this foothold nailed down.

Couldn't Do Any Better

To the Editor: Of course, no one seriously thinks that Mr. Eisenhower should be impeached in office. To say the least, his time is short enough that it would seem that his most severe critics should be able to bear with him for his remaining stay in the White House.

Smaller, Neutral Nations Finding Bond In U.S.-U.S.S.R. Summit Disputations

By PHIL NEWSOM
UPI Foreign Editor
A tightening of the bonds among neutral nations and an increasing demand that they have a stronger voice in determining world events which may decide their fate is one of the results that may be expected from failure at the U.S.-U.S.S.R. summit.

In the Days News

By FRANK JENKINS
Let's talk today about summits. Russia's Mr. K has been doing a lot of talking about them—and most of his talk is moonshine. For example: Back in 1958, when the U.S. sent troops into Lebanon (in the explosive Middle East) Mr. K demanded a summit meeting, and finally agreed to hold it in the United Nations Security Council.

Washington Nomenclature Is Baffling, Congressman Finds

Washington—UPI—All of Washington is divided into two parts—"The Hill" and "downtown."
"I was up on the Hill today," a bureaucrat will tell his wife as he staggers home in the evening.
She will immediately send the children out of the room, put a damp cloth on his forehead and pour an extra hooker of gin into the martini pitcher.

Truman's Article Discouraging to 'Draft' Hopefuls

By LYLE C. WILSON
Washington—UPI—Recommended reading for the draft-Rockefeller operators is Harry S. Truman's article in the current issue of Look magazine.
HST's word for all draft operators is that it is next to impossible for a draft strategy to produce a nominee for president of the United States.
