Honors, Awards Assembly Held at Southern Oregon

Ashland - Retiring student body president, Robert Mead, Klamath Falls, presided during the annual Southern Oregon college honors and awards assembly Wednesday in Churchill Hall auditorium.

Barry Pitts, Klamath Falls, incoming president, and members of the student council were administered the oath of office and retiring members of the student government were awarded certificates of appreciation and merit.

Dr. Alvin Fellers announced students chosen for inclusion in the Who's Who in American Colleges and Universities. They included Vernon Arnold, Butte Falls; Patricia Urle, Reedsport; Patricia Ann Leek, Medford; Myrtle Converse, Ashland; Robbie Sue Main, Ashland; Wayne Paulsen, Judith Paulsen, Lynn Susse, Robert Mead, Ashland.

Alert Driver in Sound Car One Of Best Ways to Curb Mishaps

Editor's note: The conditions of driver and car are major factors in highway fatalities. With the arrival of the Memorial Day week end and the beginning of the summer vacation season, William R. Hulst, New York motor vehicle commissioner, offers advice on how to avoid a fatal, or even minor, accident while motoring.

Hulst was appointed to his present post in 1959 after serving 14 years on the state Senate's Motor Vehicle Committee.

By WILLIAM R. HULST
New York State Motor Vehicle Commissioner
(Written for United Press International)

During the summer of 1960, well over 100 million people are expected to traverse the highways of our nation. At some time, most of these will travel on the growing number of limited-access turnpikes, such as the New York State Thruway.

Statistics show that these high-speed highways are substantially safer in terms of total number of accidents and total number of fatalities than are the older, free-access roads.

There is one unhappy fact which the statistics concerning the turnpikes consistently bring out: Accidents on turnpikes are more often fatal than accidents on other roads.

Therefore, while the total number of accidents is less and the total number of fatalities is less, it becomes obvious that because of the high percentage of fatalities, we must reduce the causes of accidents to a minimum.

Red China Says Air Violated

Tokyo - (UPI) - Communist China today claimed its air space had been violated repeatedly by American "U2 type" aircraft and declared the United States must "suffer crushing defeat."

The Communist New China News Agency said American U2 type planes had been known to penetrate as deeply as 450 miles over the China mainland and at one time passed the Communist-ruled Hsisha Islands at a height of less than 1,000 feet so that island dwellers could not spot them "with their naked eyes."

The official Peiping People's Daily, commenting on these and other alleged violations by U.S. aircraft and warships, said nothing more "barbarous can be found in the history of international relations."

The paper noted that the Peiping regime Thursday had delivered its "100th serious warning" to the United States and promised the Chinese people would not rest until "all accounts are settled."

"If the United States does not suffer crushing defeat, it will never give up its ambition to dominate the globe and enslave the people of the world," the paper said.

Polish Archeology Experts Help Save Nubian Monuments

Cairo - (UPI) - Poland is helping Egypt in its attempt to save the Nubian monuments from the rising waters of Aswan high dam.

A Polish center for Mediterranean archeology has been established here by Warsaw University.

Professor Kazimierz Michalowski, member of the Polish Academy of Sciences, heads a staff of eight archeologists and Egyptologists, two architects, one anthropologist, one numismatist and one photographer.

Professor Michalowski said he is cooperating with the U.A.R. government in the project to save the Nubian monuments.

Possibilities Studied

"We are sending our mission at the end of July to the Temple of Dabod in Nubia," he said. "This temple is the first to be dismantled and transported to another site, for otherwise it would be under water next year."

"Two years ago I headed a Polish archeological mission to Nubia to study the possibilities of saving the Nubian monuments. On the basis of our recommendations, the U.A.R. government decided to launch the program on an international scale."

The establishment of the Polish institute in Cairo climaxed work by Polish specialists in the Mediterranean area. This work has been going on since before World War II.

The new Polish center, situated at Heliopolis, a suburb of Cairo, was inaugurated by Dr. Sarwat Okasha, minister of culture and national guidance for the Egyptian region.

The center specializes in ancient Egyptian and Greco-

Awards Presented

The Victor P. Mills awards, presented by Mrs. Mabel W. Winston, dean of women, were presented to Janet Meyer, Klamath Falls; and Terry Talis, Hills, Calif.

Science and mathematics awards were presented by Dr. Elliot B. MacCracken on behalf of the Chemical Rubber Publishing Company, to George Converse, freshman mathematics, Ashland; Don Alger, first year chemistry, Lakeview; and Wesley Smith, first year physics, Montague, Calif.

Martin J. Elle, testing director, gave the Phi Delta Kappa education award to Vernon Arnold, Butte Falls.

Britt scholarships were presented to the following Jacksonville students by Doctor Arthur S. Taylor: Sonja Swinney, Byron Palmer, Toni Tweedy, Doyle Branson, Emma Jean Smith, Norman Pawlowski, and George King.

Ashland Elk's club scholarships were awarded by Bud Silvers to Aileen McKinnis, Robert Johnson, Phil Sward, John Dilly, and Joyce Stewart, for this year, and for next year Joyce Stewart, Aileen McKinnis, and George Moses. All recipients are either graduates of Ashland or Talent High school.

Salem - (UPI) - Oregon's unofficial 1960 population is 1,755,590. That compares to 1,521,341 in 1950.

Two-in-one Pattern

Printed Pattern 9054: Teen Sizes 10, 12, 14, 16. Size 12 (with collar) 4 1/2 yards 35-inch.

Send Thirty-five cents for this pattern - add 10 cents for each pattern for first-class mailing. Send to Marian Martin, Medford Mail Tribune, Pattern Dept., 232 West 18th St., New York 11, N.Y. Print plainly NAME, ADDRESS, with SIZE and STYLE NUMBER.

JUST OUT! Big new 1960 Spring and Summer Pattern Catalog in vivid, full-color. Over 100 smart styles... all sizes... all occasions. Send now! Only 25c.

434 Violations Are Processed in Court

A total of 434 violations of Medford's city ordinances were processed in municipal court during April, according to Municipal Judge Alan Holmes' monthly report.

Of the total number of violations, 29 were dismissed, five were declared not guilty and 400 were declared guilty.

A total of \$4,381 was collected in fines and court costs during the month.

Most common violation was improper parking, 96, with violation of the basic rule, 55, second. There were also 37 drunk in public cases and five vagrancies.

Safe System of Roads

Federal, state and county highway departments have built and are building the safest system of roads in the world. But governmental authority cannot produce safe drivers. This is up to each individual. An alert driver in a sound car is the greatest safety factor on the road today.

You can make sure that you and your family do not become an accident statistic this summer by taking a few simple tips. Keeping in mind that in New York State 41 per cent of the cars subject to state inspection in 1959 failed to pass on their first examination, let's begin with getting your car in condition to transport you safely.

Battery and electrical system should be checked.

All lights should be operating correctly, especially rear and indicator lights, and most important, headlights, which should be properly aimed.

Wheel alignment, tire balance, inflation and condition, including the spare, should be checked.

Any stones or nails stuck in the tire treads should be removed. A blow-out at high speed almost, always causes extensive injuries.

Well-Serviced Motor

The motor should be thoroughly serviced, including a check of oil level and condition, and extremely important but often overlooked, a thorough servicing of the cooling system.

The cooling system must be completely clean and operating at maximum efficiency in order to remove the great quantity of heat created by the engine in high-speed driving. The system should be completely drained of winter-worn anti-freeze, thoroughly flushed and then filled with fresh water.

It is important to add a rust and corrosion inhibitor to the cooling system. The system should then be thoroughly checked for leaks. The condition and tightness of all hoses and gaskets, as well as the condition of the thermostat and shock absorbers, as well

Building Permits Issued by Medford

Building permits for five new residences in Medford have been issued in the past few days by the city building department.

Two of these permits were issued to Charles Brooks to erect a \$13,500 residence at 1461 Johnson st., and an \$11,000 residence at 1398 Morrow rd.

Other permits were issued to D. L. Pickell to erect an \$11,000 residence at 356 Havana ave., to Benton Smith to erect a \$13,000 residence at 1549 Oleander st., and to Dan Patch to erect a \$12,000 residence at 727 Ellen ave.

A building permit has also been issued to Medford School district for \$1,500 to erect storage sheds at 750 Columbus ave.

A Job is a Job is a Job --

FEW REALIZE that over 90% of the industrial growth in a community is generated by the expansion of local firms. These are facts, not dreams.

THE NEW HOLIDAY HOUSE sports trailer, manufactured in Medford is a good example. Around 75 men are employed. The unit is as tastefully designed as the fancy gift pack product which made Harry & David famous.

THE RECENTLY ANNOUNCED Medco plans to expand in the plywood field and increase employment by 200 men, is another. This will add \$1,000,000 in payrolls.

FEW ARE AWARE that Jackson County payrolls in lumber and wood products manufactured alone, have risen from \$18,545,597 (1954) to \$21,069,001 (1958). The tendency to integrate our basic industry, wood products, has gone a long way toward increasing job stability and strengthening our economic base.

ONE HUNDRED NEW JOBS in a community means:

1. 296 more people.
2. 112 more households.
3. 51 more school children.
4. \$390,000 more personal income per year.
5. \$270,000 more bank deposits.
6. 107 more passenger cars registered.
7. 174 more workers employed.
8. 4 more retail establishments.
9. \$360,000 more retail sales per year.

(U.S. Chamber of Commerce Estimates)

WHETHER A NEW INDUSTRY is brought in from the outside or new jobs are created by local plant expansion, we say "a job is a job is a job!"
