To Women Who Thirst for the Young Dewy Look

New self-sealing formula brings moisture to aging, drying-up skin...then seals it in

Science has found a new self-sealing way to bring moisture to aging and drying-up skin without hormones—and keep it there. This unique, scientific product is Jacqueline Cochran's Flowing Velvet—containing her exclusive moisture-giving ingredient, Hydrolin.

How Flowing Velvet's self-sealing formula works: Its special penetrating moisture ingredient, Hydrolin, sinks down into the skin; plumps-up aging skin cells, flattened by time. Thus sagging skin is firmed-up; age lines and wrinkles smoothed over. In addition to providing moisture, it also spreads an overall invisible film that seals in precious moisture...even re-forms when you laugh gaily. It adds necessary lubricating oils and helps maintain the normal balance of oils and moisture generally associated only with a very young skin.

This is the Flowing Velvet Dewy Young Look...a beautiful, shimmering glow, much like the soft petal bloom of a dew-kissed rose...a firmer, smoother, younger-looking complexion. You'll love it! FLOWING VELVET OF FLOWING VELVET SUPER-RICH CREAM, same formula in cream form. Each . \$3, \$5 plus tax
