

TRAIN DERAILED—Fourteen cars of the Milwaukee Road's passenger train, the Hiawatha, were derailed Monday when the train crashed into a semi-trailer at an un-

Catholics Launch Resistance Efforts

Havana—(UPI)—Roman Catholics arrested for demonstrating against Soviet influence in Cuba signaled the start of a passive resistance campaign against the Fidel Castro regime today by refusing to bail themselves out of jail.

Twelve women and seven men taken into custody during the first of two "Cuba yes, Russia no" demonstrations that erupted outside Havana Catholic churches Sunday and Monday refused to put up the 100 peso bonds required for their freedom.

Their action appeared to set the pattern for other Catholic faithful to follow in the face of Monday night's open declaration of war by Castro on "fascist" priests and their "counter-revolutionary" followers.

Nixon Forces Count 50 Votes for Rocky

Chicago (UPI)—Agents of Vice President Richard M. Nixon counted no more than 50 Republican national convention votes outside New York today for Gov. Nelson A. Rockefeller.

Unless there is a drastic change in the outlook or unless there has been a drastic breakdown in Nixon's intelligence activities, the New York governor still poses no threat to the vice president's bid for the GOP presidential nomination.

The winner will need 666 votes at the Republican convention opening here next Monday. If Rockefeller received all 96 of New York's votes, the Nixon camp would concede him less than 150 on the first ballot.

Experiment Demonstrates Astronauts Could Adapt To Spinning Satellite

Washington (Science Service)—After initial illusions and nausea, astronauts probably can adapt to the spinning of a satellite, an experiment by the medical officer in charge of the Able-Baker monkey flight has demonstrated.

The medical officer, Dr. Ashton Graybiel, director of the U. S. Naval School of Aviation Medicine in Pensacola, Fla., put volunteers to this test:

Four at a time they were locked into a circular room that rotated the men at a constant speed for two days. In the slowest rotation of the six separate tests, the room went around 1.71 times a minute. In the speediest test, the room rotated 10 times a minute.

An official of the National Aeronautics and Space Administration here said large satellites for men might be rotated at similar speeds as they

Boy Changes Story About Gun Wound

St. Paul, Ore. (UPI)—Marion County sheriff's officers said today a 10-year-old St. Paul boy has changed his story about how he was wounded in the arm and hand by a bullet last week.

At first the youth said he was shot by other boys in a field. But officers said the boy now admits he was playing with a .22 shell, heated the shell on a board with a match, and it exploded, striking him with fragments.

The rotating room method promises to help reveal the causes of motion sickness and point to its control.

The rotating room moved around at speeds similar to those of manned radar platforms and could be useful in the selection, indoctrination and preconditioning of both radar personnel and astronauts.
