The Medical Roundup

by Walter Alvarez, Emeritus Consultant in Medicine, Mayo Clinic

Any number of women, but no men (and this strongly suggests that the disease is of purely nervous origin) complain bitterly of pain in the coccyx or tail bone that is to be found at the lower end of the spine. After seeing scores of these women, and after satisfying myself that there was nothing wrong with the coccyx or of its joint with the sacrum (bone at the end of the spine), my impression is strong that the trouble is arising in a disturbed nervous system. In another similar group of people who are mildly psychotic there is pain in a perfectly normal rectum—a pain which is not affected in any way by the passing of gas or the moving of the bowels.

In all my days, I never saw a patient of this type who was any better for having had the coccyx removed, and I doubt if today any surgeon of experience and porbly could be found who would willingly perform the operation. The disease may seem to be in the coccyx but really it is up in the brain. Few Criminals can be Helped By Psychotherapy

Funds for Predator Forwarded To State

The Jackson county court Friday signed an order for transmittal of \$3,565 in budgeted funds for predator control in Jackson county to the state treasurer.

Under the agreement with the state, the county pays \$2,065 as its share of the government trapper's salary and \$1,500 in mileage allowance.

The others couldn't be helped. If this is true—and I strongly believe it is true—then our courts should stop being kind to young psychopathic criminals, many of them so extremely dangerous to society that they should promptly be locked up and kept locked up—not for punishment but for the protection of our people.

Other psychiatrists have pointed out that it is stupid to send these criminals to a mental hospital for treatment if only because the probability is that in the institution there are only a few doctors available to care for several hundred or a thousand patients. The doctors can hardly see the patients, let alone try to treat them.

Now I read that at the recent meeting of the American Psychiatric Association, Drs. Emanuel Messinger and Benjamin Apfelberg, of New York, after reviewing 26 years of work with prisoners, concluded that perhaps one in 20 could be influenced a bit by psychiatric treat-
