ANIMALS ATTRACT—Get a group of 4-Hers are Paulette Anderson, Antelope, farm youngsters together and attention will normally center on their animals. Some bystanders examine a calf as some 4-H youngsters talk it over with them. The picture was taken at the Antelope pre-fair held recently.

USE THAT COMB—Eddie Meeker, veteran cattleman from the Phoenix-Talent area, gives some pointers in grooming animals during the recent Antelope prefair held at Eagle Point. Meeker was an active 4-H member in California before coming to Jackson county. Acting as an adult judge is one of the tougher jobs in 4-H activities.

Nine Tree Farms Certified by Board

Nine new West Coast tree farms were certified last week by the Industrial Forestry association board which met at Medford, according to C. W. Richey, association president. The new tree farms were in Douglas, Jackson and Curry counties and totaled 2,163 acres. The IFA board also cancelled one tree farm each in Jackson and Douglas counties and two in Josephine county because of change in ownership. At the Medford meeting, addition of 35,041 acres to previously certified tree farms in western Oregon and western Washington were approved. The new tree farms in Jackson county by name and owner are Wagner Creek, Mr. and Mrs. Jack W. Langley; Mountain Ridge ranch, Harold A. Frye Jr.; Ramsey Canyon, Mr. and Mrs. Robert E. Walker, and Papoose, A. C. Pierce. Wantagh, N.Y.—Bill Jersey, 17, explained to police why he stole two cases of eggs from a delivery truck: "A friend of mine and I divided up the eggs and went to the beach and had an egg fight."

Guide Dog Program Newest in 4-H Club

One of the newer 4-H events in the county fair this year is the Guide Dogs for the Blind, Inc. class. Classes will be set up on the basis of the pups' ages and length of time they have been in the hands of the 4-H club members. Classes include: pups, beginning, pups, intermediate, and pups, advanced. Obedience includes tests on heeling, sit and stay, down and stay, come on command and retrieving.

STUDY ELECTRICITY—These three boys are members of the Ruch 4-H electric club. Seated on a bench at the recent Applegate Pre-fair are from left: Louie Barker, 11, Ray Cook, 11, Fritz Ramsay, 11, and B. C. Matheny, club leader. The boys are looking on as Ray tinkers with his electric motor. 4-H activities are branching out to include mineral collections, gun activities and 4-H Guide Dog training.

Science Experiment Proves Successful

Ogden, Utah—Here's how to make fire by friction, teachers George Jackson and Bob Prout told their pupils as they twirled a stick in a can containing cedar bark. Other students at Mount Fort Junior High smelled the pungent smoke and turned in a fire alarm. The science experiment moved outside.

F.F.A. FAIR

Jackson County FAIRGROUNDS

August 13 through 20

The Four-H, F.F.A. Fair is one of the real highlights of the year... and a wonderful opportunity for everyone in Jackson County to see the accomplishments and achievements of their young farmer boys and girls. This year the show that is planned by these two fine youth organizations promises to be bigger and better than ever before. To attend is to lend support to two programs that teach boys and girls useful skills, attitudes and ideals that make them happier, more self-sufficient and intelligent citizens in years ahead. They school young people in such important necessities of successful living as responsibility for self, confidence and pride in achievement, for cooperation with others, leadership, courtesy and sound health habits.

This message urging YOUR attendance at the 1960 Four-H, Future Farmers of America Fair this week comes...

Hampshire Sheep To be Exhibited At 4-H, FFA Fair

Children visiting the Jackson County 4-H and FFA fair starting Saturday will see some toy-like sheep called Hampshires.

These stocky little sheep with the black noses and ears might be called western sheep bred for western conditions. As the name implies it was originated in England. The Royal Agricultural Society first recognized it in 1857. A very few flocks existed in the southern and eastern states about 1840, according to reports. However, it temporarily disappeared during the Civil War.

Some large flocks established themselves in New England and North Atlantic areas of the United States in 1910. About the same time this increasingly popular breed developed in the west. Oregon played a big part in its western adoption. In 1915, J. G. S. Hubbard and Sons of Willamette, Ore., established "a notable flock." C. M. and Walter Hubbard, of Junction City, Ore., are still prominent breeders of Hamp.

Widely Used
This breed has also been used widely in the middle west and east. For the last 25 years this breed has taken numerous blue ribbons and trophies in the top midwest shows.

The Hampshire breed has spread to every state in the union and ranks a close second to the Rambouillet in numbers. It is found widely in the range states where rams are used on fine-wool ewes and the corn belt states where grade Hampshire flocks are located. Oregon ranks sixth in promotion of this breed. Missouri is first.

Not Heavy Shearing
The Hamp is not a heavy shearing breed with an eight pound fleece about average. However farmers have found they could get more pounds per market lamb.

This breed stands mountainous range conditions well and more hot weather than some of the other mutton breeds. The Hamp is used extensively commercially or for crossbreeding. It is found in many western farm flocks as well as on the ranges.

CONGRATULATIONS 4-H & F.F.A.

We're proud of the fine work that you have done during the past year and previous years. It is our sincere wish that each and every one of you could win the blue ribbon. The excitement and fun of the 4-H, FFA Fair is an experience we encourage everyone to have during the next week. And remember that the place to go for farming supplies is WESTERN FARMERS ASSOCIATION. Stop in soon and let us show you why the people of the Northwest think first of WESTERN FARMERS ASSOCIATION for Farm needs.
