Record Parachute Jump of 102,200 Feet Recorded

Alamogordo, N.M. — (UPI) — Capt. Joseph Kittinger today set a world record for manned balloon flight and a new parachute jumping mark by leaping from an open gondola 102,200 feet above earth.
 He fell freely for 4 minutes 38 seconds, opened his chute at 17,500 feet and reached ground safely in the elapsed time of 13 minutes and 8 seconds.
 Kittinger began today's ascent in a balloon launched from a site about 18 miles northeast of the Air Force Missile Development Center at Holloman Air Force Base.
In Good Condition
 Today's jump far exceeded the old record set by Kittinger Nov. 16, 1959, when he leaped 74,700 feet. He received the Distinguished Flying Cross for that jump.
 Holloman AFB spokesmen said Kittinger was in good condition. He broke the previous manned balloon altitude record of 102,000 feet set by Col. David G. Simons two years ago here.
 Kittinger wore a pressurized suit with plastic face mask warmed by batteries, to provide clear vision and prevent "frosting up" in the 100-degree below zero temperatures of the edge of space.

Air Force Transports Equipment for Congo

Wiesbaden, Germany — (UPI) — The U.S. Air force Monday began a new phase of its airlift to the troubled Congo in which some 4,100 United Nations troops and more than 500 tons of equipment will be transported there.
 The first flights of seven C-130 Globemaster planes left Addis Ababa, Ethiopia, for Katanga province in the Congo. The planes made some 16 shuttle runs in the first day of operations, European Air Force headquarters announced here.
 The new operation is expected to last through the beginning of September.

Stink Bombs in Portland Stores

 Police went to the J. J. Newberry Inc. store and the Meier and Frank store in the Lloyd shopping center about 6:45 p.m. and to the downtown department store about 7 p.m.
 Officers said the incidents were apparently the work of the same person or persons.
 Police said a foul smelling fluid was poured on an escalator leading from the basement to the main floor of the Newberry store and the Meier and Frank store in the east side shopping center and in two locations in the downtown store.

Mass Exodus of Technicians From Red China Verified

London — (UPI) — A mass departure of Russian experts, technicians and their families from Red China is under way, neutral diplomats reported from Peiping today.
 The reports tended to support week end dispatches in the official Yugoslav newspaper, Borba. Those dispatches, sent to Borba from Peiping, implied that the departures indicated some sort of trouble between Moscow and Peiping.
Trouble Indicated
 Yugoslavs recalled that the withdrawal of Soviet experts from Yugoslavia preceded the break of the Kremlin with Marshal Tito's Belgrade regime in 1948.
 Western diplomatic sources considered the latest developments as indicative of trouble between the Communist allies, but cautioned against any assumption that a break in the Moscow-Peiping axis was imminent.
 The number of Soviet experts in Red China is not known in the West. Estimates put it at between 5,000 and 6,000, engaged in various branches of China's economy, industry and on some projects for development of nuclear energy for peaceful purposes.
 A similar number of Red Chinese students and researchers is understood to be training in Russia.
