Phoenix-Talent School Schedule Set For First Day

Schedules for starting day at Phoenix - Talent schools were announced today by E. R. James, superintendent. School buses of district 4 will start their runs the first day of school, Monday, Sept. 12, on the same schedule as last year. Seventh and eighth grade students will be transported to the junior high school at Talent and senior high school students to the high school at Phoenix. Other grades will be transported directly to the Phoenix and Talent grade schools. Children of the first three grades are to report to the primary unit of the elementary schools in Talent and in Phoenix. Those entering grades four to six are to report to the grade school buildings. Parents of first grade pupils are reminded to take evidence of their child's birth date, and a health certificate with them the first day of school. The first graders will return home immediately after being registered, so parents are requested to see that they have transportation home. Other grades will be dismissed at noon. Buses will make their regular take home runs at this time, the first day, he said.

School Cafeteria
Both school cafeterias will start serving meals on Tuesday, Sept. 13. Prices of meals will be 25 cents for grades 1 to 6, and 30 cents for grades 7 to 12, including milk. Junior High school students have been registered and will receive their schedule of classes upon arrival at school Monday at 8:50 a.m. Students new to the Phoenix High school are asked to register at the high school office the week of Aug. 29 to Sept. 2. The high school office will be open from 7 to 9 p.m. Wednesday, Aug. 31, for those new students who are working during the day. Former high school students and incoming ninth graders from the Phoenix and Talent grade schools registered last spring for their program of studies, and need not appear until the opening of school Sept. 12. They may come in during the first week in September if they have any questions on their program of studies. On the first day of school, high school students are to report to the high school gym for the opening assembly at 8:50 a.m. Following the assembly they will obtain their daily program of studies, secure their books, pay their school fees, and attend classes for shortened periods. Regular classes will get under way the following day. School fees payable upon registration will amount to \$14, including book fee, towel fee and student body card. The book usage fee of \$7 is required, since state law does not permit purchase of high school texts by the school district. The towel fee of \$1 is

Blots Can Help To Predict Leading Business Executives

Bonn, Germany - (Science Service) - Ink blots, in the hands of a psychologist, can be used to predict whether a man will be a success or a failure as a business executive. Dr. Zygmunt A. Piotrowski of the Jefferson Medical College of Philadelphia told the International Congress of Psychology here. The blots can also help predict whether a man will be a criminal. Dr. Piotrowski used the famous ink blot test developed by the Swiss psychiatrist Hermann Rorschach in his predictions. The extent to which a person is inclined to look at the pattern of a blot as a whole (his W score) rather than to pay attention to small parts is significant for predicting whether he will be successful as a high-ranking executive. **Average Expected Score** The average W score of men who reach the vice presidential level and then fall is a little over 10. Dr. Piotrowski found in a study of 50 top ranking executives. This score of 10 is about the average W score to be expected from a group of adults with superior intelligence. Highly successful executives - those who kept advancing in power and achievements - averaged nearly 18 in W score or nearly twice as high as the high executive who failed at the top level. Perhaps the most important clue to potential behavior is what the psychiatrist calls a CR (color response). The individual makes a color response when he pays attention to the color that appears on some of the Rorschach cards. He may, for example, point to a squiggle in one corner of the card and say, "That looks like a caterpillar." If pressed for his reason why, he may say, "Because it is green." That is a color response. **Color Measures Emotions** Color responses measure emotions and the desire to associate with or separate from others. If an individual produces no CR he is assumed to be emotionally flat or indifferent. Color responses can be positive or negative, indicating attraction toward others or repulsion. If a person sees such wholesome objects as landscapes, flowers, fruit, warmth giving (controlled fire) he is giving positive color responses which indicate that he is drawn toward others. If the color on the blots makes a person think of blood, anatomical slides, wounds, burning houses, an explosion, etc., he is giving negative CR which (unless he is a surgeon or medical student) also required. Students wishing to purchase a school yearbook may reserve a copy at this time by paying \$4 additional.
