

Kennedy Hopes for Increased Support In Southern Area

Washington—UPI—Sen. John F. Kennedy hoped today his endorsement by Mississippi's senators would help swing other southern Democrats to support the Kennedy-Johnson ticket in the presidential campaign.

Sens. James O. Eastland and John C. Stennis Thursday night pledged their support of Kennedy for president and Sen. Lyndon B. Johnson for vice president on the national Democratic ticket.

Pierre Salinger, Kennedy's press spokesman, said "We hope to win the support of all Democrats." A handful of southern Democrats still remained silent, however.

Four Withhold Support
In the Senate Harry F. Byrd of Virginia, Richard B. Russell and Herman Tamm of Georgia, and Strom Thurmond of South Carolina have not publicly endorsed the Kennedy-Johnson ticket.

Georgia Gov. Ernest Vandiver, who was scheduled to confer with Kennedy this afternoon, also has not given his blessing to the national ticket. Kennedy was expected to ask again for Vandiver's support.

Other southern governors withholding their endorsement included Orval Faubus of Arkansas and Jimmie Davis of Louisiana.

Kennedy told United Press International that he hoped to win Byrd's backing before the end of the campaign. He said he felt Byrd's support would assure him victory in Virginia which went to President Eisenhower in 1952 and 1956.

Byrd Refused Aid
In both 1952 and 1956 Byrd refused to give his support to Democratic candidate Adlai Stevenson.

Kennedy's aides, meanwhile, were preparing a statement dealing with another aspect of his southern campaign strategy.

They were ready to give an answer to whether National

Committeeman Frank Reeves of Washington, D.C., a Negro, would travel with Kennedy in the South.

Kennedy has said Reeves, a campaign assistant, would accompany him on campaign trips. Salinger refused to say Thursday whether Reeves would go into the South with Kennedy, however.

Arguments Heard In Colorado Water Proposal

New York—UPI—A U.S. Supreme Court-appointed master hears today rebuttal arguments by counsel for five states and the Justice Department on a proposed decree apportioning waters of the Colorado river.

Master Simon H. Rifkind, who wrote the proposed decree in the capacity of special master, also planned to confer with the parties on proposed changes to the plan.

Arizona Thursday lined up with Nevada and the federal government in supporting the main points of the proposed decree to be sent to the Supreme Court for action.

California Opposed
California is strongly opposed to the proposed settlement on grounds it would deprive 70 Southern California communities of their primary water supply. The other states involved are Utah and New Mexico.

Arizona accused California of wasting Colorado river water. Arizona's special trial counsel, Mark Wilmer, Phoenix, appeared before Rifkind to support the main points of the plan.

Wilmer said talk of "disaster" resulting from the proposed water division was "a disaster only in Los Angeles and San Diego newspapers." He said that if California practiced conservation it could get along on more than one-fourth less water than it would be allotted under the proposed settlement.

Air Show Planned Sunday Is Postponed
An air show sponsored by the Medford 20-30 club scheduled for Sunday has been postponed until Sept. 18, according to club spokesmen.

Bill Brew, project assistant, said this morning that due to difficulties in arranging for the proper aircraft the show had been called off until next month.

The show is to feature a display of modern aircraft, smoke jumpers, a demonstration of fire fighting from airplanes, and an air show queen. Also at a nominal cost will be an "air lift" for those desiring airplane rides.

All proceeds will go to the National Foundation for medical research. The group was formerly known as the National Foundation for Infantile Paralysis.

Mrs. Powers May Stay in Russia, Attorney Says

Moscow—UPI—Barbara Powers may remain in Moscow after her husband's trial is over, her attorney said today.

The attorney, Alexander Parker, said the young woman's final decision would depend on the verdict and on what kind of arrangements could be made for her visiting Francis Gary Powers from time to time.

Barbara, 25, has been showing signs of severe strain as she watches the pilot she married fight for his life on the stage of a concert hall turned court room. His judges sentenced him to 10 years in prison. The prosecutor had demanded a 15-year sentence.

The tension understandably seems at times to make the wife and husband, in their rare visual contacts across the court room, somewhat cold. But an associate said that she loves him "deeply."

Although her in-laws, Oliver and Ida Powers, are with her during the trial, Barbara does not turn to them very often for consolation. They see each other little outside the court.

No Word Received
Some observers have attributed this to a family tiff, possibly developed in the whirl of events after it was learned that Gary was a captive of the Russians. Others, however, see it more a case of a lack of shared interests outside the young man.

Neither Barbara nor the two older Powers have received any word from Gary since their arrival here, although it was learned Barbara sent him a cable her first day in the capital.

Clinical Course on Medical Hypnotism
Portland—Physicians and dentists from Northwest states, California and Hawaii will meet Sept. 2 at the Multnomah hotel, Portland, for the American Institute of Hypnosis' first four-day clinical course in medical hypnotism.

Practicing physician and members of the institute, headed by Executive Director William J. Bryan Jr., only medical doctor in the United States limiting his practice to the use of hypnosis in medicine, will conduct the course. Attendance is limited to physicians and dentists, but psychologists, nurses and other members of the healing arts may be admitted by special permission, it was announced.

Health Department Reports on Diseases
Seventeen cases of communicable diseases were reported to the Jackson county health department this week.

Medford led the list with 5 cases of influenza, 2 cases each of German measles and measles, and one each of rheumatic fever and tuberculosis.

Ashland reported 3 cases of infectious hepatitis and one case of mumps. Central Point reported one case each of gonorrhea and influenza.

Hearings Held by City Council; Action on Other Items Deferred

Hearings on improvement projects and annexations took a large part of the city council meeting last night.

Among the items approved was the agreement between the state highway commission and Medford regarding the proposed Pacific freeway through Medford.

Completion of the agreement had previously been withheld until it was certain that the city water department would be paid for water main replacements made necessary by the freeway's construction.

The cost was estimated at \$50,000. Action on a petition to pave Benson st. from Tenth to Prune sts. was deferred until the next council meeting in two weeks.

A group of about 15 Benson st. residents of the area appeared at the meeting to protest the cost and right-of-way acquisition and to question the form of the right-of-way deeds.

City Attorney Joel Reeder agreed to meet with residents of the area Thursday, Aug. 25, at 7:30 p.m. to explain the matter.

Following hearings, favorable action was taken on: 1) annexation of one acre of land at the northeast corner of Sunrise and Harrison;

2) vacation of plat for the Rogue Valley Heights extension subdivision;

3) the establishment of a water main on McAndrews rd. from Waverly ave. to Wabash ave.; on Wabash ave. from McAndrews rd. to Spring st.; on College Way from Wabash ave. to 311 feet east on Hill Way and on Hill Way from Wabash ave. to 311 feet east; and

4) the establishment of a water main on Stevens st. from Crater Lake ave. to 1,470 feet west.

Annexation Action
Action on the annexation of five acres on the north side of Crater Lake highway at Delta Waters rd. (the proposed site for the relocation of the Cummins Diesel company) was deferred until the next council meeting.

Members of the council deferred action on this matter as it was thought that opposing parties had not been heard. Council members said

it was unusual to both annex and commercially zone an area in one step.

The proposal to pave alley between Ivy st. and Oakdale ave. from Fourth to Fifth sts., was denied since the withdrawal of the Zion Lutheran church and St. Mark's Episcopal church reduced the number of signatures on the petition below the number needed.

Under the city manager's report, council approval was given to "The Spot," 17 South Riverside ave., for a Class A dispenser's liquor license.

Action Deferred
Action was deferred until next meeting on a proposal to award a bid for communications equipment. Apparent low bidder was the General Electric company, but City Manager Robert A. Duff recommended that the bid be awarded to the Motorola company since the majority of communications equipment in the area is Motorola and parts would be more readily available.

U.S. Steel Rail Strike Expected To Be Long Affair
Pittsburgh, Pa.—UPI—A strike by the United Steelworkers Union that choked off railroad transportation to U. S. Steel Corp. plants in this district today showed indications that it might be a long walkout.

The strike, called Thursday against the Union Railroad, a U. S. Steel subsidiary, already had idled about 30,000 steel workers and could add another 20,000 union members to the furlough rolls if it were not settled soon.

Prospects of an early settlement appeared slim. Approximately 1,200 non-operating employees of the railroad threw up picket lines Thursday. The pickets allowed non-railroad workers to enter the plants.

Production was halted at five major U. S. Steel works when basic materials could not be obtained due to the lack of transportation.

The railroad said that the union demands would be too costly, claiming that the wage and benefit demands exceeded the estimated 38 to 41-cent an hour per man increase granted by the basic steel companies last January.

Fire Danger High In Happy Camp Area
Happy Camp—U. S. Forest Service reports indicate that the fire danger at Happy Camp is about 80 per cent.

Logging has been permitted in the area without interruption so far this season, although the fire danger has been extremely high at times.

Last year logging operations were curtailed in the Happy Camp area for a short period due to the extremely hazardous fire danger.

Ordinances and resolutions passed by the council included:

1) Leases with the U Drive and the Valley Aviation companies. The two companies will now pay two per cent of their gross revenue next year with the rate increasing until it is five per cent at the end of the five year contract.

2) Assessment for a water main to be installed on 10th st. from Cottage to Portland sts. The assessment per front foot to be \$2.79.

3) An emergency fund appropriation for the purchase of a 50-foot-square lot at the corner of Highland dr. and Siskiyou blvd. from the California Oregon Power company.

4) Plans for the paving of Stevens st. from Crater Lake ave. to a point approximately 1,420 feet west.

5) Plans for a sanitary sewer in the Crestview subdivision.

Storm Sewers
6) Storm sewers and Valley View dr. and Hillcrest dr., Woodland dr. and Highland dr.; down an alley between Central ave. and Front st.; on Black Oak dr. from Randolph rd. to Creek st.; and sewer on Roxy Ann dr. and the Verde Hills extension.

Public Hearing
7) Scheduled a public hearing on a sanitary sewer in the Crestview subdivision for Sept. 1, at 7:30 p.m.

8) A call for bids for a water main on McAndrews rd., Waverly ave., Wabash ave., College Way and Hill Way also another water main construction project on Stevens st.

9) Scheduled public hearings Sept. 1 at 7:30 p.m., on the planning commission recommendations to change the zone of the Parlier property on Highland dr. and Siskiyou blvd. from single family to limited commercial; to change the zone of a 10-acre tract north of the Medford Shopping center from single family to multiple family; and to vacate a portion of the Rogue Valley Heights subdivision.

Three of the four bids under consideration were awarded. The bid on construction of a sanitary sewer on Niantic st. from Maple to a point 66 feet north was deferred until next council meeting. The low bidder was 43 per cent higher than city engineer's estimates.

PTA Float Wins at Prospect Jamboree
Prospect—A float depicting the "ole swimming hole" won first prize for Prospect PTA during last Saturday's annual Prospect Jamboree.

Float construction was under direction of Mrs. Richard Larson. Children riding aboard it were Debra Linda and Leanna Love and Richard and Danny Larson.

More than 50 PTA members devoted time either on construction of the float or operation of the food booth which the organization operates each year.
