The Medical Roundup

by Walter L. Sawyer, Emeritus Consultant in Medicine, Mayo Clinic. Article discussing medical care for the insane.

Better Care for the Insane. Mr. William A. Naggle of Dayton, Ohio, who has worked as an attendant in mental hospitals...

When Mr. Naggle asked him why he had gone berserk, he said that, first, he had gotten fed-up working for the hospital so long for nothing; and second, because the head of the shop would not even let him have chewing tobacco...

Then, all those people who can work, who usually behave themselves, and who might eventually be taught to live out in the world again, should be put in another type of institution, which should not be called a hospital or an asylum, but rather a "rehabilitation center."

These people would work in shops for wages, and perhaps, after some money was deducted for board and lodging, the rest would be given to the people or banked in their name.

Probably there would be at least two types of these rehabilitation centers—the first, for persons who have to be kept locked up in order to keep them away from alcohol or drugs; and the second, for those who are so sane they can be allowed to come and go as freely as if they were living in a hotel or a company "bunk house."

During the last year, as I have read some 85 books by persons who had once been confined in a mental hospital, I have been impressed with the stupidity and callousness of those who were in charge of many of the institutions.
