

HOPE—The SS Hope, a wartime veteran rechristened in the name of international good will, arrived in San Francisco Friday to prepare for a new adventure—carrying medical "hope" to the peoples of the Far East. The Hope

is a 230-bed hospital ship, the first of a projected fleet which will carry the medical knowledge of the U.S. to other lands. A welcoming committee of fireboats surround the ship as it arrives in San Francisco. (UPI Telephoto)

# Banks Cut Prime Rate, Give Stocks Third Straight Rise

New York (UPI)—A cut in the prime rate by the nation's banks gave the stock market its third consecutive weekly rise.

The list registered its best gain on Tuesday after most major banks reduced from 5 per cent to 4 1/2 per cent the interest they charge on loans to customers with the best credit rating.

The advance carried over into Wednesday, but was reversed in the last two sessions of the week when some profit taking came into the market. Brokers noted that the decline in volume in the last two sessions from the mid-week pace was characteristic of consolidation periods.

They said that certainly some sort of resting phase was called for after 15 consecutive days during which advances outnumbered declines. They added, however, that constructive forces continue to hold the reins, and there should be sufficient support to cushion any selling. They expect a renewal of the uptrend shortly.

One technician said that the consolidation of relatively light volume would importantly improve the internal condition of the list and help

the market's chances of responding to any post Labor Day pickup in business.

**Summer Doldrums Continue**  
As for the business world, there were no signs of the economy coming out of its summer doldrums and steel officials have virtually written off September as the month for the long awaited upturn. They now pinpoint October as the date for a major turn-around in the depressed steel market.

A sharp decline in July machine tool orders, a barometer of future production plans, also injected pessimism into the business outlook. The weekly business statistics didn't help clear up the picture either. Steel, crude oil, electricity and coal production all ran behind the previous week as did freight carloadings and bank clearings.

Sales last week rose to 15,298,260 shares, or a daily average of 3,059,652 shares, from 13,702,603 shares, or an average of 2,740,529 shares per day a week earlier.

Friday's close showed 30 industrials at 636.13 up 6.86 points from the previous week and 20 rails at 139.92 up 0.19. The utility averages, after reaching a new high since June 6, 1930 on Wednesday slipped back a bit and finished at 96.02 up 0.49. The average for 65 stocks finished up 1.60 to 210.55.

Most drug issues were helped by the announcement that oral polio vaccine will be produced commercially by mid-1961. Allied Laboratories jumped 7 1/2, American Homes Products rose 3/4, Vick 3, and Pfizer 1 1/2, but American Cyanamid fell 4 1/2.

**Averages Up 1.60**  
Studebaker-Packard, American Motors, Lockheed, and General Motors rounded out the five most active issues. The Dow-Jones averages at

## Morse Warns Against Dropping Housing Bills

Washington (UPI)—Sen. Wayne Morse (D-Ore.) today expressed alarm and concern over reports that housing legislation would be dropped in the interest of quick adjournment of the Congress.

"The politician who seeks votes in Oregon this fall is going to have to show that he did everything he possibly could to bring enactment of a good housing bill," Morse said. "I am ashamed to hear reports that this session of Congress may abandon the housing bills."

"The Senate has passed its omnibus housing bill, and it is now on the desk of the speaker of the House of Representatives; the House Banking and Currency committee has reported an even more far-reaching one which is being held up by the House Rules committee; the House

has passed and sent to the Senate an emergency measure to stimulate private home building, and this bill is pending before the Senate Housing subcommittee."

The senator added: "Final action on one or more of these measures is imperative. The bottom has fallen out of the lumber industry in Oregon. Every week brings new plant shutdowns or reductions in the work week. The decline in new housing starts for 1960 is largely responsible for this situation. This slump must be reversed quickly, and any one of these three bills would help reverse it. Friends of housing legislation must be particularly concerned with the failure of the House to date to act on an omnibus housing bill."

"With widespread unemployment in Oregon comes a slump in the small businesses in every community. I am already hearing not only from those who have been laid off, but from the department stores, laundries, and similar establishments, whose regular customers have stopped buying or are doing their trading on credit."

"I appeal to the Rules committee in the House, the Banking and Currency committee of the Senate, and the leaders of both parties in both houses of the Congress to put their efforts behind a housing bill that will restore a reasonable level of construction."

## Smith Outlines Forest Program

Roseburg (UPI)—Republican senatorial candidate Elmo Smith said Monday Oregon should take a "good long look" at its forest resources to make certain they are being managed to the best interest of all the people.

Smith said "there is an urgent need to develop a long-range program of continuous management of our federal forests to provide the maximum number of permanent jobs in industry."

Minimum timber volume, he said, is needed to support the billion dollar annual lumber, plywood and pulp industries and the 90,000 persons directly employed by them.

He said full recreational use of national forests should be provided for along with forest watersheds.

Smith described a re-appraisal of timber and forest resources as the latest plank in his campaign platform to provide more jobs for Oregon.

He told Chamber of Commerce members other necessary steps are a fair share of federal spending in Oregon for new space age industry; prompt and wise development of natural resources to stimulate recreation and tourist business; at the same time preserving multi-purpose use of natural resources; rapid development of port facilities and modern highways to serve the coast; federal legislation to support a long-range program for construction of more private dwellings, and emphasis on solution of Oregon's producer problems in both industry and agriculture.

## Insufficient Evidence For Clipping Charge

Greensboro, N. C. (UPI)—Judge Z. H. Howerton Jr., ruled Monday that a tin box of hair clippings was not sufficient evidence to support Mrs. Grace McKenny's charge that she was assaulted with a deadly weapon.

Mrs. McKenny had claimed that S. I. Stewart, 62, suddenly began snipping away at her hair with a pair of scissors in a sporting goods store.

## ACTOR DIES

Woking, England (UPI)—Alexander Gause, 46, who played the 252-pound role of Friar Tuck in the "Robin Hood" television series, was found dead at his home Monday.

## Alaskans Arrive At Indian School

Salem (UPI)—First of 100 Alaskan Indians have arrived to be educated at Chemawa Indian school north of Salem.

Four boys and one girl are the vanguard of the group which will arrive here this week.

These are the first Alaskan Indians to be educated at the school in several years. Chemawa has been educating only Navajos recently.

## Senators Morse, Lusk Vote With Majority

Washington (UPI)—Oregon Sens. Wayne Morse and Hall S. Lusk voted with the majority Monday as the Senate voted 74-11 for legislation providing federal medical assistance to the needy aged and 56-31 to restore \$191 million of the \$266 million cut from President Eisenhower's foreign aid money request.

## U.S. Begins Construction Of World's Largest Radar

Washington (UPI)—The United States has begun construction in Puerto Rico of the world's largest radar, capable of bouncing signals off the planets Venus, Mars and Jupiter, the Defense Department announced Monday.

The device also may detect signals originating billions of light years from earth.

The instrument's dish-shaped antenna, 1000 feet in diameter, will cover 18 acres. The construction, on a site 10 miles south of Arecibo, is to be completed in the fall of 1961 at a cost of \$5,500,000.

"The power of the Arecibo radar will be greater than that of any comparable instrument now in existence," the department said. "There should be no difficulty in obtaining strong radar echoes from distant planets such as Venus, Mars and Jupiter."

Bouncing radar signals

from the moon, only 240,000 miles away, has become commonplace. The much greater distances to the planets vary from 25 million miles from Venus at its closest approach to 600 million miles for Jupiter when that planet is farthest from the earth.

The radar will both send and receive signals. Referring to radar waves that are generated by many of the distant stars and galaxies, the department said:

"This device will permit man to look deeper into space than he has been able to do in the past. It may detect signals from billions of light years away."

## Trade Association To Meet In Idaho

Sun Valley (UPI)—The 44th general conference of the Pacific Northwest Trade association will be held at this Idaho resort Sept. 25-27.

Current problems in developing water resources of the Pacific Northwest will be appraised by business and industrial representatives from Washington, Oregon, Idaho, Montana, British Columbia, Alberta and Alaska.

## Mom, Daughter To Vie In Baking Contest

The Dalles (UPI)—It will be a two-county affair when the Oregon Wheat Growers cake contest bake-off is staged in Portland next December. Competing for the \$100 prize will be Mrs. Theo von Borstel of The Dalles and her daughter, Mrs. Kenneth Hattrup of Grass Valley.

## DIE IN REFRIGERATOR

Rosiclare, Ill. (UPI)—Two girls crawled into an unused refrigerator to play Monday and died of suffocation. The victims were Laura Ann Wallace, 6, and Carol Jean Lowe, 8. Laura's father, Ken Wallace, said he had placed the refrigerator on the back porch with the door to the wall, but that someone must have turned it around in his absence.

## NIXON \$1.51 A POUND

Des Moines, Iowa (UPI)—"Nixon," a 970-pound steer judged grand champion of the Iowa State Fair's 4-H baby beef show, was sold at auction Monday for \$1.51 a pound. His owner, Carole Minish, 17, of Dyers, Iowa, withheld from auction another steer named "Kennedy" for later showing at other livestock exhibitions.

Fine Grade Imported Translucent **CHINA DINNERWARE**

57-Piece services for eight. Each set includes eight each:

- Dinner Plates
- Bread and Butter Plates
- Soups
- Fruits
- Tea Cups
- Saucers
- 1 Platter
- 1 Serving Bowl
- 1 Creamer
- 1 Coffee and Sugar

PLUS 4 EXTRA CU.

**GARBAGE CANS**

**DUO-FAST INDUSTRIAL STAPLE TACKERS**

Gun Tackers Ideal for General Tackling. Compass handle—staples drive accurately and securely. One hand does the job. Models drive 3/32" to 9/16" staples.

WIDELY USED FOR TACKLING:  
Shipping tags • Upholstering • Signs • Displays • Insulation • Ceiling Tile • Screens • Cabinets • Waterproof Liners • Rug Pads • Furniture • Many other uses.

Hammer Tackers For Bigger Jobs. Tackles fast on you, saving 11. Staples feed and drive automatically. One hand operation. Models drive 3/16" to 9/16" staples.

At Hubbard Bros. you may choose from 20-24 or 30 gallon cans which are hot dipped. Hot dipped cans cost somewhat more because they are completely fabricated from black sheet and then dipped in molten zinc. A hot-dipped can is completely leak proof, it has more rust proof zinc coating and is much more resistant to denting.

**6.59 to 9.85**

**FIREPLACE ENSEMBLE**

No. 1230 Special. Attractive brass and black portable curtain fireproof from Portland Willamette Co. 38" wide, satin black. Frame adjusts to heights from 27" to 31". Solid polished brass duo-hood and fender trim. Brass handled poker and brush are included.

**\$19.95**

**WEST BEND Automatic ELECTRIC GRIDDLE with heat control!**

For cooking or serving right at the table! More than 200 sq. in. of cooking area. Griddle may be immersed for cleaning. Heat is evenly controlled with no hot spots or cold spots.

**REDUCED \$19.95 TO.....**
