

Quotes From the News

BY UNITED PRESS INTERNATIONAL

New York—Hungarian exile leader Bela Fabian, discussing the demonstration by 2,000 persons outside the headquarters of the Soviet delegation to the United Nations: "This is just the beginning."

Madrid—Oxford University Professor Dr. George Kilpatrick, stating that world peace has been in the hands of a few men more than once in the past 3,000 years, and that the hydrogen bomb is not really a completely new factor: "They knew how to kill just as thoroughly, if more slowly, in the ancient world. They simply destroyed the harvest and their enemies starved to death."

New York—A Soviet correspondent, moaning about regulations restricting Soviet Premier Nikita Khrushchev and other Russians to Manhattan Island: "I want to see your city. I can't even take a boat tour around the island."

Miami—Weather forecaster Arnold Sugg, stating that Hurricane Florence posed no immediate threat to Florida, even though Floridians should keep informed of the storm's progress: "This is no time to get alarmed. We don't want everyone jarring coffee all over themselves at the breakfast table."

Oregon Editors Hear Report on English Press

Salem — (UPI) — Charles T. Duncan, dean of Journalism at the University of Oregon, told 60 Oregon newspaper editors at a conference here Saturday that the "popular" or sensational press of England has dipped in circulation in the past decade.

He noted that the "quality" press gained readers in the same period, but that "popular" television has filled some of the gap.

Duncan spent the summer in Europe. The meeting, sponsored by the Oregon Newspapers Publishers association, heard a panel of four in the morning. Emphasis on Gossip

Ken Johnson, editor of the Salem Capital Press, said many newspapers but too much emphasis on gossip columns, crime and vice items and the like. He urged fuller treatments for public affairs news.

Forest Amsden, associate publisher of the Coos Bay World and recently returned from a one-year fellowship in Washington, D.C., said the news corps in the national capital is over-rated except for a handful of informed men.

Techniques of news coverage were discussed by Tom Gerber of the Canby Herald; William Wassmann of the Eugene Register-Guard; and George Castillo, Roseburg News-Review.

Amsden was elected chairman of the next conference.

Increasing Span Of Hemophiliacs Creates Problem

Los Angeles (Science Service) — Increasing the life span of hemophiliacs has created social problems for these victims of "bleeders' disease."

This is pointed out by Dr. Alfred H. Katz of the University of California at Los Angeles Medical School here. Dr. Katz has just received a \$24,357 grant from the Office of Vocational Rehabilitation for a study of these problems.

A generation or two ago the majority of hemophiliacs did not reach adulthood. But modern techniques of transfusion and use of blood derivatives have made it possible for most of them to live to adulthood and thus be faced with the necessity of earning a living.

Education Lacking
Many young adult hemophiliacs do not have sufficient education or specialized training to give them stable occupation, Dr. Katz believes, because of broken schooling from their illness. It has been observed, however, that hemophiliacs can be trained to hold jobs that do not involve great physical exertion or hazards.

Dr. Katz will make a nation-wide survey of the vocational situation of hemophiliacs, the types of positions they have been able to hold, employer attitudes, special arrangements for medical care, transportation and other practical problems.

"Our aim is not only to make it possible to train more hemophiliacs for employment through state vocational rehabilitation services, but to induce employers to make more effective use of this pool of manpower," he says.

West Los Angeles — (UPI) — Author Samuel Karakiss, 66, committed suicide by gulping pills Saturday after writing 13 notes, the last of which said simply, "That's all." Karakiss, who wrote under the pen name Paul Kay, had produced the stage version of John Drinkwater's "Abraham Lincoln" and written several plays.

Funds To Enforce Labeling Act May Curb Accidents

Washington (Science Service) — Accidental deaths and injuries from hazardous household articles may be reduced through the appropriation by Congress of \$1,200,000 in supplemental funds to support enforcement by the Food and Drug Administration of the Hazardous Substances Labeling Act passed earlier this year.

"Five hundred children die each year and 800,000 more need emergency hospital and clinic treatment after swallowing hazardous household items," the Public Health Service reported to Congress before the appropriation was approved Sept. 1.

The act, sponsored by Sen. Warren G. Magnuson (D-Wash.), embraces hazardous household articles now on the market that were not covered by the Federal Cautious Poison Act of 1927.

Sen. Magnuson said, "Labeling is needed now to tell the user, for example, that such pressurized containers as used in packaging of hair sprays, whipping cream, and preparations for applications to burns may result in injury when exposed to excessive heat."

Good labeling could also prevent wintergreen oil, frequently used in flavoring, from being regarded as harmless by most householders. It is quite toxic when taken in quantities of a teaspoonful or more and has caused a number of deaths through misuse by adults and children.

The Magnuson act also includes household silver polish containing deadly cyanide, dry-cleaning preparations containing carbon tetrachloride, and cement used for assembling model planes or for repairing household items. These are among the many items not on the market when the 1927 act was passed.

Sen. Magnuson predicted that the appropriation to enforce the labeling act "will save the lives of countless children."

Survival Theory In CAP Program

A four week instruction class in basic survival theory will be added to the Civil Air Patrol Cadet program, according to Sgt. Bill Roberts, commander of cadets of the Medford squadron.

The course will be instructed by Lt. Bette Miller. Survival kits will be assembled during the course and will be taken home and stored for emergency use, it was stated.

Sergeant Roberts added that an overnight campout to test survival methods will be planned in the near future.

The CAP meets each Monday at the CAP building at the Medford airport. For further information contact Chief Warrant Officer Mary L. Hall, SPring 3-3505.

ON ARCTIC ICE—Crew members of the USS Seadragon, which stopped at the North Pole while forging a new 8,800 mile northwest passage from Portsmouth, N. H., to Hawaii, dot the Arctic ice as they collect information during the polar cruise. (UPI Telephoto)

Welfare Workers To Attend Conference

Several of the public welfare workers in Jackson county plans to attend the 1960 West Coast Regional conference of the American Public Welfare association to be held Oct. 10 to 12 in Portland.

About 600 social welfare workers, board members and civic leaders are expected to attend. Local welfare workers attend the conference at their own expense, it was pointed out.

National authorities will discuss topics based on the conference theme "Meeting Today's Needs, Facing Tomorrow's Demands" before delegates from Alaska, Arizona, British Columbia, California, Guam, Hawaii, Idaho, Nevada, Oregon and Washington.

Conference chairman is Miss Jeanne Jewett, Oregon state administrator, with co-chairman and host Mrs. Martha Ann Adelsheim, Portland, chairman of the Multnomah County Public Welfare commission. Miss Elizabeth Goddard, director of the staff development division, Oregon Public Welfare commission, is program director.

Speakers
Heading the list of distinguished authorities will be William L. Mitchell, commissioner, Social Security administration, Department of Health, Education and Welfare, Washington, D.C. In recognition of the 25th anniversary of the Social Security act, Mitchell will review the development of the Social Security program and evaluate the future of the insurance and grant-in-aid programs.

Charles E. Sprague, former Oregon governor and publisher of The Salem Statesman, will be the banquet speaker on Oct. 11 in the grand ballroom of the Sheraton-Portland hotel. Alaska and Hawaii will be honored during the banquet in a "Salute to Our New States."

Presbyterian Men Plan 'Fall Roundup'

The men of the First Presbyterian church will hold their Fall Roundup with a dinner meeting in the Fellowship hall of the church Thursday, Sept. 22, at 6:30 p.m.

The purpose of the meeting is to "roundup" all men who are members of the church to encourage them to participate in the church's activities.

Reservations for the dinner must be made by Tuesday, Sept. 20, by calling the church office, SPring 2-2830, or Fred Gatter, SPring 3-6891.

Theme of the meeting will be Christian faith and healing. The program will be presented by a panel of doctors and will be followed by a question and discussion period.

Music will be provided by a quartet led by the Rev. G. Robert Jacks.

Oregon Cowboy Wins Idaho Rodeo Honors

Bruneau, Idaho — (UPI) — Tim Bouscal of Harper, Ore., walked off with all-around cowboy honors at the end of the annual Bruneau rodeo.

Company Starts Tenth St. Paving Project Today

T. R. Florey construction company started paving the new section of 10th st. between Bear creek and Portland ave. today and portions of this street should be open to traffic later in the week, according to Public Works Director Vern Thorpe.

Thorpe said that the paving should be completed sometime this afternoon. He said that portion of 10th st. between Cottage st. and Willamette ave. will be open to traffic later this week.

The remaining portion of 10th st. from Cottage st. to Riverside ave., will not be opened until the new 10th st. bridge is completed. Construction on schedule, he said, and it should be finished sometime in mid-November.

Thorpe said that motorists will notice one portion of 10th st. is paved with a different type of material. This is a light oil mat surfacing put on by the street department, he said, and will be used only temporarily.

The oil mat surfacing is where a proposed extension of Siskiyou blvd. will eventually intersect 10th st., he said. Thorpe noted that the oil mat surfacing is much more economical than the asphalt and will last until the new intersection is constructed.

Thorpe said that no starting date has yet been decided for the extension of Siskiyou blvd., but noted that property appraisals for right of way are now in progress.

Former Linn County Sheriff Succumbs

Lebanon — (UPI) — Hillis Archibald Southard, 63, former Linn county sheriff, died here Saturday. He was county sheriff from 1946 to 1954 and after that was a credit manager for Trux Oil Co., Corvallis.

NEED CATCHING UP

London — (UPI) — Sir William Steward, owner of an Indian restaurant here, flies to New York Tuesday to show American housewives how to cook curry. "They're years behind me," he said.

KING ENGAGED — The engagement of Belgium's King Baudouin to Dona Fabiola de Moray Aragon, has been announced in Brussels. No date has been set for the wedding of the 30-year-old king to the daughter of a Spanish nobleman. (UPI Telephoto)

High Radiation Damages Vision

Chicago (Science Service) — High energy radiation, even in very small doses, can damage vision, Dr. Leo E. Lipetz of the Institute for Research in Vision at Ohio State university, reported here. He spoke recently at the first international symposium on the effects of radiation on the nervous system at Northwestern university's medical school.

Dr. Lipetz said the response of the optic nerve in frogs was reduced after exposure to as little as one-half roentgen. This amount of radiation to total body exposure is allowed per year for the general population under the radiation protection guides established by the Federal Radiation Council.

Dr. Lipetz explained that the tiny amount of energy could have a large effect by triggering a series of reactions, "each one stepping up the effects, like an amplifier, of the previous one."

Other stimulating and damaging effects of high energy radiation on visual function have been shown, he said, in water fleas, crabs and rabbits, as well as people. Cancer patients, after a series of x-ray treatments, are more visually responsive to light.

U.S. Pays Bill for Israeli Translation

Washington (Science Service) — Russian scientific and technical publications, translated in Israel under U.S. government contract, have arrived in the U.S. They were paid for with money Israel spent on U.S. farm surpluses, which money the U.S. had agreed to spend in Israel.

The U.S. also has translation projects underway in Poland and Yugoslavia. The three programs will provide 89,000 pages of material originally published in languages unfamiliar to most U.S. scientists. The contracts were made by the National Science Foundation.

The U.S. Department of Commerce will sell the translations for about one cent a page.

Shock Revives Paralyzed Legs

Washington (Science Service) — Paralyzed leg muscles have been made to function again by an experimental electrical device that shocks the muscles and make them draw up.

These experiments, reported here by the Veterans administration, are being made on several patients at the VA hospital in Hines, Ill. The patients carry a small transistor electrical stimulator at their belts.

The stimulator sends electrical pulses to the thigh and the peroneal nerve, thus turning a dragging foot into a sharply lifted one. When the foot is on the floor, a switch in the patient's shoe turns the electricity off.

GRAHAM IN GERMANY

Hamburg, Germany — (UPI) — American evangelist Billy Graham preached to a crowd of 20,000 persons here Sunday night after arriving from Essen, the first stop in his current German crusade.

LEGAL NOTICES

NOTICE OF SALE.
In the Circuit Court of the State of Oregon for Jackson County. In the Matter of the Estate of George L. Zimmers, deceased. Notice is hereby given that pursuant to order for sale heretofore made by the undersigned, as Administrator of said estate, will sell at private sale to the highest bidder, subject to the confirmation of the Court, the following described real property, located in Jackson County, Oregon, to-wit:
