Transurethral Prostatectomy. Many elderly men ask me every week what a transurethral prostatectomy, and is it a good operation? The answer is that it is a trimming off of some of the enlarged prostate gland - enough so that the man can urinate comfortably again; and in good, expert hands, it is an excellent operation. The work is done through a lighted tube passed down through the urethra (tube from the urinary bladder to the outside). It takes great skill, but it has the great advantage - when well performed - of almost no mortality. The patient can get up in a few hours and walk around. My old friend, Dr. Gershon Thompson, recently wrote that when he reviewed the records of 26,463 transurethral resections performed at the Mayo Clinic from 1935 to 1957, he found a hospital mortality rate of only 1 per cent.

Hemorrhoids Cured Painlessly By Non-Surgical Method. The non-surgical, electronic method for the treatment of Hemorrhoids (Piles) developed by doctors at the Dean Clinic has been so successful and permanent in nature that the following policy is offered their patients: "After all symptoms of Hemorrhoids... have subsided and the patient has been discharged, if he should ever have a recurrence, all further treatments will be given absolutely free."

Weak Feet: What To Do About Them. A number of women write to ask what to do about their weak feet, or the weak feet their children have. If I had such trouble, I would go to a good orthopedist to see if he thinks there is anything wrong with the structure of the feet which, perhaps, he could repair by an operation or by fitting special shoes.

ARCHIE LEAVES APE. London (UPI)—Archie Filmer whose hand was mauled three weeks ago when he tried to befriend a gorilla named "Guy," returned to the zoo Sunday to tell the ape all was forgiven. Zoo keepers ordered him to stay away for his own good. "I'm all washed up with Guy now," Archie sighed. "I'm going to find another zoo and another gorilla."
