

Easy TV Slippers

7292

by Alice Brooks

Whip up gay TV slippers of corduroy, cotton, velveteen with rickrack 'n' cross-stitch trim.

Easy - two pieces plus sole for boot or ballet style. Pattern 7292; cross-stitch transfer; pattern pieces small, medium, large, extra large included.

Send THIRTY-FIVE CENTS (coins) for this pattern - add 10 cents for each pattern for 1st-class mailing. Send to Medford Mail Tribune, Household Arts Dept., P.O. Box 168, Old Chelsea Station, New York 11, N. Y. Print plainly NAME, ADDRESS and PATTERN NUMBER.

JUST OUT! Our 1961 Needlecraft Book. Over 125 designs for home furnishings, for fashions - knit, crochet,

76TH BIRTHDAY—Holding a rose, Mrs. Franklin D. Roosevelt, widow of the late president, flashes a big smile on her 76th birthday Tuesday at New York City. The photo was taken as Mrs. Roosevelt was attending an Israeli reception for United Nations delegates. (UPI Telephoto)

embroider, weave, sew, quilt - toys gifts, bazaar items. FREE-six designs for popular veil caps. Quick-send 25c to day.

Home building in Australia boomed in 1959 with a record 86,584 new houses and apartments being completed.

Many Stars Near Sun Claimed Yet To Be Discovered

London - (Science Service) - There are probably many stars "near" the sun still to be discovered, Dr. Olin J. Eggen of the Royal Greenwich Observatory, Herstmonceux Castle, Sussex, predicted here.

The undiscovered stars belong to two stellar groups known as Hyades and Sirius. The Hyades group is about 130 light years from the sun, and contains about 350 stars, some 200 more than previously believed. (A light year is the distance light, traveling at 186,000 miles a second, covers in a year, or about six million million miles. The closest star to the sun is Alpha Centauri, four and a third light years away.)

New Members Found Just as the rails of a track seem to converge in the distance, so the parallel paths of stars in a stellar group are directed toward a point if the cluster is moving away from the sun. This perspective effect is particularly noticeable in the motions of stars of the Hyades cluster.

By analyzing the known motions of all stars, Dr. Eggen found 200 new members of the Hyades group. "There are probably many undiscovered members" of this group and of the Sirius group, near the sun, Dr. Eggen reports in Monthly Notices of the Royal Astronomical Society, published here.

Dr. Eggen found that stars of the Sirius group are younger than those of the Hyades

Educator Stresses National Goals

Salem - (UPI) - The principal of Bend High school told the Oregon Association of Secondary School Principals here Tuesday that if youngsters are not taught what America stands for, educators will have to answer for it some day.

William Edwards said that during three years in Europe working with schools there he formed some doubts as to whether American youth could explain what the U.S. stands for.

He said he heard discussions in Germany between East German Communists and American youngsters and that many times the young Americans were unable to explain U.S. national goals.

An unofficial poll conducted by the principal of North Salem high school, E. A. Carleton, showed that 82.5 per cent of the principals attending the convention favor establishment of junior colleges and regional vocational schools.

At present there are about 2,300 foreign interns and 6,000 foreign resident physicians in United States hospitals, most of them in this country on temporary visas.

Production of motor vehicles in the United States during 1959 totaled 7,732,505 units, an increase of 31.3 per cent over 1958.

Members of the Sirius group in the past were assigned to the Ursa Major stream, which contains the bright stars of the Big Dipper.

Prenatal X-Ray Can Help Blood Problem Babies

Atlantic City, N.J. - (Science Service) - Pregnant women whose blood is RH negative were advised to have x-ray examinations during the last two months before confinement by Dr. Paul A. Bishop of Philadelphia, who spoke here to the American Roentgen Ray society.

The child born of an RH negative mother and an RH positive father may have fetal hydrops, a blood condition in severest form. It occurs once in 2,000 deliveries, and without replacement of blood by transfusion can be fatal.

Not Hopeless Condition The condition is no longer a hopeless one, Dr. Bishop said. Modern methods in the care of premature infants and the spectacular results of replacement transfusion techniques make early diagnosis of fetal hydrops of great practical importance. He illustrated with a case not suspected until x-ray diagnosis stimulated prompt action.

"Caesarian section followed by immediate and repeated replacement transfusions resulted in a vigorous baby that continues to thrive," Dr. Bishop said.

X-ray studies are advisable whenever there is a suspicion of an abnormal amount of fluid in the sac that holds the baby in the mother's uterus. Dr. Bishop said high speed films and intensifying screens are used in an effort to reduce the radiation dose to both mother and child to a safe minimum.

Court Records

ASHLAND MUNICIPAL COURT Paul A. Ferguson, violation of basic rule, \$20. Vernon N. Reh, disobeyed traffic signal, \$5. Sidney B. DeBoer, violation of basic rule, \$20. Marjorie J. Gilliam, violation of basic rule, \$15. Jack Chandler, illegal parking, \$5. Shirley A. Enblom, illegal parking, \$5. Bobby D. Thomas, disobeyed traffic signal, \$5. John S. Morrill, violation of basic rule, \$20. Anzel C. Conley, violation of basic rule, \$20. Steven R. Bennett, violation of basic rule, \$20. Jerry W. Anthon, disobeyed traffic signal, \$5. Jack E. Crawford, violation of basic rule, \$15. Vernon E. Wirth, disobeyed stop sign, \$5. Leonard R. Silva, disobeyed stop sign, \$5. Mary L. Tischehauser, no vehicle license, \$5.

Brooks Express Service Reduced

Salem - (UPI) - Public Utility Commissioner Jonel C. Hill today authorized Railway Express Agency, Inc., to operate its office at Brooks on a seasonal basis, and denied a petition to close the branch completely.

The order allows Railway Express to shut down its Brooks office from April 1 through September each year, when commerce is slow.

Last month Hill authorized Southern Pacific Co. to put its Brooks office on a seasonal basis and he said it would be "logical" for the express agency to operate on a similar schedule. The two are in the same depot and, as in the past, can be represented by one agent, Hill said.

Astoria May Appeal Decision of Court

Astoria - (UPI) - The Astoria city council Tuesday said it may appeal to the Oregon Supreme court from last Friday's decision by Circuit Judge Avery Combs that charter amendments sought by some 800 petitioners must be put to the voters in one ballot proposition, as petitioned.

Judge Combs ruled last Friday against the city government's contention that the two subjects of union recognition and the city-wide civil service covered by the petition are not germane and should be two separate propositions.

A decision on whether to appeal will be made at a meeting Monday night.

PEPPERMINT OIL UP Jefferson, Ore. - (UPI) - The price of local peppermint oil has jumped from \$4 to \$5.50 a pound, growers reported here.

Adams Hereford Wins Bull Trophy

Portland - (UPI) - A bull owned by the Double M ranch at Adams won the American Hereford association bull trophy at the Pacific International Livestock Exposition Tuesday.

M. C. Fleming of Boring entered the grand champion Guernsey bull, and Meadowland dairy look similar honors with an Ayrshire bull.

Earl Simantel, Cornelius, showed the grand champion hog.

The grand champion steer trophy went to Mike Wagenblast, 13, The Dalles 4-H clubber. The award was presented by Gov. Mark Hatfield.

Washington State university won the first annual college meat judging contest. Oregon State was sixth in the field of seven.

Arsenic in Air, Smoke Blamed For Lung Cancer

Boston - (Science Service) - Arsenic in both coal smoke and cigarette smoke as a cause of lung cancer gets new emphasis from Dr. Henry S. Satterlee of Newport, N.H., in the current New England Journal of Medicine.

Going back to the arsenic-poisoning epidemic of 1900 that affected 6,000 beer drinkers in the Manchester-Salford-Liverpool district of England, Dr. Satterlee applies a background feature of the investigation by the Royal Commission on Arsenical Poisoning to the flue-curing of tobacco today.

A time-honored British practice, he says, was drying the malted barley in the fumes of arsenic-containing malting fuels to impart a smoky flavor to English ales.

Result of Gasworks Coke This cause of arsenic poisoning was further proved in 1902 when another epidemic of arsenic-beer poisoning in Halifax, Nova Scotia, was shown to be the result of using gasworks coke as a malting fuel high in arsenic content.

Dr. Satterlee traces conflicting reports that alternately place arsenic high and low among recognized causes of cancer.

He says there has been a tendency to remove arsenic from serious consideration as a cancer-causing influence in city environments because it appears to be a negligible component of air pollution.

Dr. Satterlee blames faulty methods of sampling for this attitude, and says special investigation is needed. Pointing out that the arsenic concentration in expired air is nearly three times the tolerance limit, he conjectures on the arsenic content of the confined atmosphere in crowded vehicles, movie theaters and crowded sleeping quarters of low-class dwellings.

Mining Congress Offers Resolution

Las Vegas, Nev. - (UPI) - The more than 10,000 delegates attending the 1960 convention of the American Mining Congress here today were scheduled to participate in special discussions and demonstrations dealing with latest mineral mining and processing technology.

Late yesterday delegates to the largest convention this city has ever seen introduced a resolution calling for greater mining depletion allowances and reduction of income tax rates.

Members argued the tax reduction would assure profits needed to provide the incentive to keep the domestic mining industry on its feet.

The resolution also said only home production would assure the country of having adequate supplies of vital minerals on hand in the case of an emergency.

It added present depreciation provisions of the tax structures were suffocating economic growth through failure to cope with the problems of inflation.

SEE THE GREATEST SHOW ON WORTH!

You get nearly 12% more front luggage space in the 1961 Corvair 700 4-Door Sedan—and there's more room for you, too.

LOWER PRICES AND MORE HAPPY IDEAS FROM THE NEW '61 CHEVY CORVAIR!

Want proof that Corvair's thinking about you? How's this: lower prices on all sedans and coupes for '61. More space for you and your luggage. Spunkier engines. Greater economy. Wagons.

The hard-working Lakewood with four doors and room for up to 68 cubic feet of cargo. The Greenbrier Sports Wagon, that holds people galore and up to twice the cargo you can get in wagons you're used to. And every model—wagon, coupe, and sedan—shares in Corvair's rear engine traction and nimble handling.

The happy ideas start with lower prices on all sedans and coupes. You get more room for you and your luggage (that up-front trunk has almost 12% more space), too. A spunkier 145-cu.-in. air-cooled rear engine. A gas-saving new rear axle ratio... a longer range 14-gallon fuel tank. And—will small wonders never cease!—wagons.

Why don't you visit your Chevrolet dealer's soon, for a closer look at what Corvair has to offer for '61. You'll like what you see, we promise you.

This Corvair Lakewood 700 Station Wagon handles light as you please, yet does a wagon-sized job with your cargo.

Now in production—the Corvair Greenbrier Sports Wagon with up to twice as much room for people and things as ordinary wagons. (Shown with optional extra-cost third seat in position.)

See the new Chevrolet cars, Chevy Corvairs and the new Corvette at your local authorized Chevrolet dealer's
