LAKE CHANGES

Salt Lake City–During the past century the surface of Great Salt lake has undergone more than 30 feet elevation changes.

CENTRAL THEME

New York – Concept of an omnipotent fate ruling all affairs of men is present in practically all religious systems.

THANK YOU

For your listings, we are selling, we have more inquiries for suburban homes in the friendly Phoenix-Talent area where the climate is better. Buyers easily find our convenient new location at Talent Junction. Easy parking and a hot cup of coffee if you have to wait on our busy salesman.

Call Frank Christian, KE 5-1389 to see this nice 8 acres, all irrigated 1844 sq. ft. ranch home only 3 years old. Frank has some other good ranch buys and he will work hard to give both buyer and seller a fair deal.

Salesman, Geo. Nerton KE 5-1741 feels sure you'll like this 3 BR furnished home in Talent for only $7500, or ask him to see a large 4 BR in Phoenix, easy terms can be arranged.

RED ARROW SPECIAL

Nice city lot, trailer and modern expandable service building. Asking $2750, $1000 down.

FIREPLACE — CEILING HEAT

Like new, large 3 BR, 1½ bath, builtins, 2 car garage, will sell on contract — you save refinancing costs. Try to find its equal for only $13,500.

We Challenge Anyone

To show you a finer 73 acres or a nicer new ranch home. Ranch has a continuous flow free water right. Soil adaptable to any purpose, part now in peaches. Magnificent view from the luxurious home, $90,000, 29% down buys all. Owner will consider selling 60 acres, improvements, separately on contract.

It will pay you to look for the Red Arrow sign when looking for property in the Phoenix-Talent area

Red Arrow Realty

At Talent Junction—KE 5-1752

ATTENDS CONFERENCE–Jim Frake, Medford High school student and Mail Tribune staff member, was one of 11 Oregon, California and Hawaii high school students attending the Ford Division National Teen-Age Press conference in Detroit. The students met with a panel of noted college educators to discuss newspaper careers while at the Oct. 12 through 14 convention. Frake is shown above with Stewardess Dottie Reeder before the group left San Francisco.

Railroad President Sees More Growth In U.S. Economy

"America's long term economic outlook is one of growth, even though the rate of growth may at times be somewhat slowed," according to Burlington Railroad company President Harry C. Murphy.

Murphy made this statement while visiting Medford Friday with other Burlington officials. Guy R. Glover, vice president of traffic, and F. E. Sperry, assistant vice president of operation, accompanied Murphy.

Commenting on the economic outlook, Murphy said, "Substantial new equipment orders are our vote of confidence in America's future." Locomotives and freight cars costing $22¼ million will be acquired by the Burlington Lines in 1961, Murphy said.

Operates in 14 States

Based in Chicago, the Burlington operates in 14 states between the Great Lakes and the Rocky Mountains, and from Montana to Texas.

Although its 11,000 miles of line do not extend to the West Coast, it is an important carrier of much transcontinental freight and passenger traffic.

Murphy has been in the railroad industry 50 years. He started as an office messenger boy. He was section hand later in 1914 earning 11 cents an hour for a 10-hour day.

Assumes Presidency

In 1949 he assumed the Burlington presidency. He is a graduate of Iowa State college.

He calls federal regulatory restrictions one of the pressing problems in the railroad industry. "Railroads are being hit hard by inequitable regulations of rates," Murphy said.

Railroads are required to charge uniform published tariff rates even though they may not be in a position to price their services more attractively, Murphy explained.

"The railroads are going to be forced out of the business of hauling many agricultural commodities unless this situation is soon remedied, he said.

The great potential and growing commerce of the Pacific Northwest has been given special attention by Burlington officials, according to Murphy. "The Oregon area is an increasingly important producer of freight traffic," he said.

Core Drilling at Illinois Site Done

Gold Beach – Core drilling at Buzzards Roost site on the Illinois river has been completed. Findings so far are "most encouraging," according to a letter from Bruce Shavere, general manager of the Coos County Electric Cooperative to the Agness Community council.

Aerial mapping and ground control survey in that region have been completed and detailed maps of the proposed dam site and reservoir are expected soon.

The letter stated that the survey of the main line from Gold Beac hto Agness is completed, and work is proceeding on tap lines to consumers along the river.

The Medical Roundup

by Walter Alvarez

Emeritus Consultant in Medicine Mayo Clinic
Emeritus Professor of Medicine Mayo Clinic
(Register and Tribune Syndicate, 1960)

New Observations in Hardening of Arteries

According to Dr. David M. Spain, pathologist at the Beth-El Hospital in Brooklyn, studies made of over 3,000 Jewish men, and many records of autopsies on persons who died with a coronary heart attack, or after an accident show that in the last 29 years there has been an increasing incidence of heart disease due to injury to the arteries. Interesting, also, is that there has been an increasing tendency for this disease to attack young men. The incidence of fatal heart attacks in men under the age of 45 years has almost doubled in the last 11 years. Dr. Spain failed to find evidence that the arterial disease is linked to emotional strain, smoking, a sedentary type of work, too much fat in the body, or any particular type of occupation. Dr. Spain feels that a high blood pressure is not the important factor in producing the disease of the arteries.

Cancer Research

Some people write to ask me why isn't more research being done on cancer. Actually, a tremendous amount of work is being done every month. Just in one place— in the Sloan-Kettering Institute in New York City — there are more than 1,000 persons who are working on cancer research. Their budget for the current year will be 8.5 million dollars. What is very hopeful is that at last expert chemists are getting a good picture of the essential substances in the nuclei (growing centers of our cells) which determine how our tissues grow. The chemists are showing what are some of the differences between the nuclei of normal cells and cancer cells.

For the first time, the DNA, which appears now to be the most important chemical in cells, has been isolated from a cancer-inducing virus and has been shown to be capable of producing cancer in laboratory animals. In some way, it seems to trigger a change from a normal cell to a cancer cell. Hence, the virus theory and the mutation (sudden change) theory of cancer seem to have met in this bit of research.

Much information is being obtained also as to the way in which certain drugs interfere with the growth of cancer cells. The chemists are even learning some of the ways in which cancer cells can change so that they will no longer be susceptible to the action of an anti-cancer drug which formerly was able to kill them. This is one of the big problems now in the treatment of cancer. A drug will quickly destroy all but a few of the cancer cells in a body, but then the few that remain may grow rapidly and kill the animal.

Process Speeded Up

When I was a lad, about the only way of telling that a drug was a possible cure for cancer was by giving it for months or years to a man with cancer, and then waiting five years to see how he did. In recent years, the process has been greatly speeded-up by using animals — usually mice or rats — which have been given cancer. Because of their short life-span, one can tell within a week or two whether or not their tumor is shrinking. More recently, an even more rapid technique was discovered, in which cultures of growing cancer cells are influenced over-night by a drug. Now, I read that Drs. E. S. Beneke and Y. Lingappa of the University of Michigan have discovered that a certain "water mold" or fungus works beautifully as a test-object for drugs that are likely to have cancer-killing qualities. Obviously, today, no one should listen to a quack when he whines that nobody will test his supposedly wonderful cure for cancer. Today, he could find out almost overnight whether it had any value. All he would have to do would be to accept the standing offer of the U. S. Public Health officials to test any drug that seems to have cancer-curing properties.

Every so often I read an article in a monthly journal by someone who is so indignant because he or she feels that the medical authorities have combined to fight the use of some great cancer remedy. The poor soul does not know that if it had really been any good it would have been in active use all over the world in a few weeks, just like penicillin or insulin or cortisone. Who on earth would want to stop it and who could stop it? No one could stop it.

After The Menopause The Ovaries Retain Some Function

Many women probably assume that if they have had a natural or a surgical menopause their ovarian function is all gone, but recent studies by Drs. C. A. Paulsen, R. B. Leach, H. Sandberg, S. Sheinfeld, and W. O. Maddock of Detroit showed that 47 of 51 women who had experienced a menopause from one to 33 years previously still had in their urine ovarian hormone. In women who had had a natural menopause, the amount of estrogen averaged about a seventh of normal, while in women whose menopause was due to the surgical removal of their ovaries the amount averaged about a fourteenth of normal.

There is evidence to indicate that this residue of estrogen is of decided value to the woman, unless she has a cancer in her womb or in one of her breasts — in which case the estrogen is disadvantageous.

Dr. Alvarez' booklet on little strokes may be obtained by sending 25 cents and a large, stamped, self-addressed envelope with your request to Dr. Walter C. Alvarez, Dept. MMT, The Register and Tribune Syndicate, Box 957, Des Moines 4, Iowa.

Hughes Trophy Is Given to Squadron

First Lt. H. Robert Hall, son of Mr. and Mrs. H. Raymond Hall, 1848 Woodlawn dr., Medford, is a member of the 460 Fighter Interceptor squadron which won the Hughes trophy recently.

The Portland based squadron was presented the award after competition with other interceptor fighter squadrons. It consistently rated outstanding on all tactical evaluations and captured every award for which the squadron was eligible during the 1960 fiscal year.

The jet pilot was graduated from Fresno State college, Fresno, Calif. His wife is the former Patricia Ann Dettinger from Fresno, Calif.

The Hughes trophy was presented during a meeting of the Night Fighters' association in San Francisco recently.

Bids Opened for Christmas Trees

Yreka — Bids have been opened for an estimated 11,447 red and white fir Christmas trees containing 42,701 lineal feet, according to District Ranger Lester Clark, Goosenest district, Klamath National forest, at Mt. Hebron.

The sale was composed of seven units, two — Baird Springs No. 3 and Pumice Stone No. 4–received no interest. These will be readvertised and sold at a later date, Clark said.

The unit, appraised value, successful bidder and successful bids were Baird Springs No. 1, $633.60, William G. Nofz, $1,869.12; Baird Springs No. 2, $842.80, Eva L. Yordy and Kenneth R. Gifford, $1,179.92; Willow Creek No. 1 and 2, $762.75, Pete Blocker, $1,169.55; Willow Creek No. 3, $267, L. C. Duke, $302.60; Surveyor's Glade, $570.60, Carl G. Parks, $1,529.21.

Gene Orr Attending Legion Convention

Gene Orr, Medford, is a member of the rehabilitation committee of the American Legion National convention convening in Miami this week end.

Orr will represent the Oregon delegation while serving on the committee.

More than 60,000 Legionnaires and their families are expected to attend the convention.

New York in 1626 had only about 200 inhabitants.

NATIONAL FOREST TIMBER FOR SALE
Yewwood Partial Cut

Oral auction bids will be received by the Forest Supervisor or his authorized representative at the office of the Forest Supervisor, Post Office Building, Medford, Oregon, beginning at 10:30 A.M., November 21, 1960, for all merchantable timber marked or designated for cutting on an area embracing 25 acres, more or less, within Sections 10 & 11, T. 40 S., R. 5 W., W.M., surveyed, in the Rogue River National Forest, Josephine County, Oregon. The estimated volumes are: 365 M board feet of Douglas-fir and pine, 245 M board feet of white fir & other species. The minimum acceptable bid per M board feet is as follows: Douglas-fir and pine $27.65, white fir and other species $11.40. This includes the following rates, per M board feet for stumpage (including deposit for sale area betterment): Douglas-fir and pine $24.75, white fir and other species $8.50, and $2.90 for slash disposal for all species. Sealed bids will be publicly opened and posted at the office of the Forest Supervisor, Medford, Oregon, at 10:30 A.M., November 21, 1960. All those who submitted a satisfactory sealed bid will be permitted immediately to continued auction bidding. A money order, bank draft, cashier's or certified check in the sum of $1,300.00 must accompany each bid, to be applied to the purchase price, refunded, or retained for application to any claim for damages, according to the conditions of sale. If requested by the purchaser, contract terms will permit felling of timber in advance of payment up to the value of the performance bond. If an oral bid is declared to be high at the closing of the auction, the bidder must immediately confirm the oral bid by submitting it in writing on a Forest Service bid form. The right to reject any and all bids is reserved. Forest Service bid forms for use in submitting sealed bids and full information concerning the timber, the conditions of sale and the submission of bids should be obtained from the District Ranger, Star Ranger Station, Jacksonville, Oregon, or the Forest Supervisor, Medford, Oregon, before bids are submitted.
