

Army Quality Said at Peak

Portland—UPI—Gen. Herbert P. Powell, head of the United States Continental Army Command, said Monday the quality of the Army's men, weapons and equipment "has never been as good as it is now."

General Powell, who once was a reporter for the Bend Bulletin after graduation from the University of Oregon Journalism School, was here for a speaking engagement.

He said inter-service rivalry had not hindered efforts to keep pace with Russia militarily.

"At the field level, this has never been a serious problem," he said. "A certain amount of competition is good but when the chips are down the services always work effectively together."

He assumed his present post Oct. 1 when he received his fourth star. He graduated from Oregon in 1924.

U.S. UPS POPULATION

Washington—UPI—The Census Bureau reports the nation's population stood at about 180,402,000 on Sept. 1. This was an increase of 2,831,000, or about 1.6 per cent, over Sept. 1, 1959.

Luck Runs Out; Wreck Victim Killed
Eagle Pass, Tex. — (UPI)—Marcelino Campus' luck saved his life—and ran out a moment later.

Campus, 35, of Laredo, survived an auto wreck that killed a companion Monday. He crawled from the wreckage onto the highway to flag down a car for help.

He was struck and killed by the first car to approach.

Oakridge Man, 41, Deer Hunt Victim

Oakridge, Ore.—UPI—Lester W. Dretsch, 41, Oakridge, was killed in a gunshot deer hunting accident near here Sunday.

It was Oregon's 12th death in connection with the state's 1960 deer hunting season and fifth shooting fatality. Seven persons have died of heart attacks.

The Lane county sheriff's office said Dretsch was killed by a bullet from the rifle of a son, Larry, 18. Dretsch, his two sons, Larry and Leslie, 16, and another 17-year-old boy were on the trip.

The accident occurred south-east of here on Buck Mountain.

Pennsylvania hunters bagged 12,250 woodcocks in the 1959 season against 11,992 in 1958.

7,400 Foresters Employed in U.S.

Dallas — Wood-using industries of the United States now employ 7,400 professional foresters in a continuing effort to keep timber growth ahead of removal, according to S. W. Robb, chairman of the Oregon committee of American Forest Products Industries, Inc.

The nation's progress in forestry in recent years has been phenomenal, the industry spokesman said.

Latest government timber appraisals show that for the first time this century, the country is growing timber faster than it is being removed for harvest and lost through the inroads of fire, insects and disease.

Robb went on to praise Oregon State college's school of forestry for its leadership in the forestry education field.

Fires Take Big Bite in Resource

Dallas — Every forest fire takes a bite out of Oregon's biggest resource.

Sam Robb of Willamette Valley Lumber company, Dallas, chairman of the Oregon committee of American Forest Products Industries, said that forest fires which sap the state's economic wealth ultimately hit every Oregonian in the pocketbook.

Oregon forest industries employ some 87,000 full-time workers and produce goods worth \$1 billion annually, he said. They depend on the Beaver state's green and growing forest empire for raw materials.

More Jobs Being Created From Woods

Junction City—Paul Bunyan strides by Oregon's forest industries in making more products from each tree harvested are creating more jobs without increasing the rate of timber harvesting, a lumberman told the Lions club here recently.

Using his own mill as an example, Nils Hult, president of Hult Lumber company with operations at Junction City and Horton, said his firm employed four men in 1946 for every million board feet of logs it processed. Last year, he said, the company employed eight men for each million feet handled.

Mechanization of United States farms is said to have increased by up to 250 per cent since the end of World War II.

FOCUS ATTENTION—Efforts to focus attention on forest products to encourage greater use locally include the use of display boards similar to the one shown here. This one, sponsored by the Southern Oregon Conservation and Tree Farm association, has been used by the group to tell the past, present and future story of the lumber industry in southern Oregon, visually. It has been displayed in local banks and the library and is currently on display in the lobby of the Jackson st. branch of the Rogue Valley State Bank in Medford as a part of the observance of National Forest Products Week.

Forest Products Industry Is Important to Area's Economy

The state's big forest products industry will continue to be a keystone in Oregon's economy for a long time to come, and an increasingly important one to the economy of southern Oregon in particular.

This prediction was made by Glenn Duysen, president of Southern Oregon Conservation and Tree Farm association, in a recent report to the organization which also stressed the importance of local observance of National Forest Products Week.

Pointing out the timber industry's basic role in the state's economy, Duysen said that forest products plants now account for 56 per cent of the manufacturing jobs in the state. This is roughly 6 out of every 10 industrial jobs in the state.

In addition, he noted, some 2,500 persons are employed in the state in allied industries engaged in supplying forest firms with machinery, equipment and supplies. He said forest products industry payrolls represent 58 per cent of the state's total manufacturing payroll, and 23 per cent of its total payroll, from all sources except agriculture.

Will Hold Position

He predicted that the forest industry would hold or even increase its relative position in the state's growing economy. Higher-value products, new uses and processes and fuller utilization of the wood in every tree are creating more economic stimulation and more payroll dollars

Body of Washougg Hunter Discovered

Stevenson, Wash.—UPI—The body of Robert Fisher, 51, Washougg, was found in rugged country northwest of here Monday by a search party.

The sheriff's office said Fisher had collapsed while dressing a deer he had killed. He apparently suffered a heart attack.

Mexico's oil reserves are estimated at 1.7 billion barrels.

Youth Survives Fall Over Cliff

Hissoboro—UPI—James Love, 17, Forest Grove, who fell from a 70-foot cliff Sunday while on a deer hunting trip in Tillamook county, was reported in fair condition in a hospital here Monday night.

Hospital attendants said Love suffered a broken leg and head injuries from the fall.

Love's fall occurred about 25 miles northwest of Tillamook and he was carried out by a search party organized by the state police office at Tillamook.

PUBLISHER DIES

Green Bay, Wis.—UPI—Andrew B. Turnbull, 75, president of the Green Bay and Post publishing companies and an organizer of the Green Bay Packers football team, died Monday. He is survived by twin daughters, Mrs. Daniel Beisel, wife of the Green Bay Press-Gazette's advertising manager, and Mrs. Henry Schneiderman, Green Bay.

DR. MC AULIFFE DIES

Bridge Hampton, N.Y.—UPI—Dr. Gervais W. McAuliffe, 64, a leading otolaryngologist and former president of the New York County Medical Society, died Monday.

LUMBER

Mainspring of Jackson County's Economy

Jorgensen's ...

SALUTE THE GREAT JACKSON COUNTY LUMBER INDUSTRY Upon the Occasion of—
Forest Products Week

This "Week" will dramatize the great role of the lumber industry in the expanding economy of this County and all southern Oregon. It emphasizes the versatility, economy and beauty of lumber in building; points out that Jackson County produces 600,000,000 board feet of lumber annually in 25 lumber mills, 10 plywood or veneer plants and about 15 wood re-manufacturing plants. It is estimated that 4,000 workers in this area are employed in woods or mill operations, with wages more than 20 million dollars. Indirectly, many more receive income from this vitally important and growing industry.

Jorgensen Dairy Products

Jorgensen's congratulates the International Concocted Order of Ho-Hoo, an organization with in the forest and lumber industry, for their role in bringing the great importance of their industry to the building of a greater, more prosperous Rogue River Valley and State.

Any dream is within easy reach with a **HAPPY DAY Savings Account**

Sure you can afford a motor boat—when you save for it, with a "Happy Day" savings account. The "Happy Day" plan is designed for fun-loving folks, who want to do the things and own the things that make life worth living. So pick your dream—then get on the beam... with a U. S. National "Happy Day" savings account.

U.S. NATIONAL BANK OF PORTLAND

Happy Day accounts are regular bank savings accounts, with full bank safety and high bank interest, but with special passbook jackets to pinpoint savings goals. You may stop, start or even withdraw your money at any time.

Eight colorful passbook covers identify various savings goals.

- Vacation
- Stork
- New Home
- Tax
- Education
- Insurance
- New Car
- All-Purpose
