

REUNITED ON TV - Van Johnson and June Allyson who were teamed in nine movies starting back in 1942, are reunited as they appear together on television.

### Johnson-Allyson Team Gets Together Again For Television Show

By VERNON SCOTT  
Hollywood - (UPI) - Van Johnson and June Allyson, long a movie romantic team, get together for the first time on television this week.

It started in 1942 when Van and June played patsy in "Two Girls and a Sailor" at MGM. They went together like Abbott and Costello.

Thereafter the young stars were teamed in nine pictures, among them "Remains to Be Seen," and "High Barbaree."

Van always played the clean-cut boy next door while June exemplified the girl next door in a Peter Pan collar. It was pretty sticky going sometimes, but moviegoers loved 'em.

"By the time we'd completed our tenth movie we both wanted out," Johnson sighed. "It got so we always knew what we were going to do before we looked at the script."

**Sign of Relief**  
When their contracts were completed at the studio Van and June breathed a sigh of relief and hoped they'd never see one another again before the cameras.

Since then the All-American couple has appeared separately in scores of pictures, but none prospered as did their joint efforts.

Now, still clean-cut and looking like the couple next door, Junie-pie and the former bobbysox idol share top billing on CBS-TV's "The Du Pont Show with June Allyson."

"For the first time in our careers we're playing a married couple," Van said. "But it's like old home week. It's not generally known, but when June and I were starving hopefuls in New York

### Only Bark Used in Board Product at Research Center

Corvallis-A board product containing only bark from Douglas fir or ponderosa pine can be manufactured without adding expensive resins for bonding, according to Leif D. Espenas, director of forest products research at the Oregon Forest Research center, Corvallis.

More than 1,200,000 tons of bark from Douglas fir are burned annually in Oregon as mill residue.

Under proper conditions of heat and pressure, natural substances in bark react to bond together, forming a board similar to wood particle board and hardboard. Resins for bonding are responsible for nearly half the costs of manufacturing other particle boards.

Research on this project included preparation of raw material from slabs of Douglas fir bark, production of boards, testing of samples, and studying economics of commercial production of the product. In addition, a pilot-plant run was conducted at the plant of a private company.

Studies showed that a manufacturing system for wood particle board can be adapted to make bark board. Physical properties of bark board can be altered by changing pressure and by applying overlay materials.

Production of board from bark of West Coast hemlock and white fir also was investigated. Bark from these species was much less satisfactory than from Douglas fir and ponderosa pine.

A report on this study is available upon request to the Oregon Forest Research center, Corvallis.

Studies to develop uses for wood residues of Oregon are part of continuing research supported by the wood industries of the state through a tax on logs harvested.

### Salem Newspaper Backs Carl Francis

Salem-(UPI)-The Salem Capital Journal, an independent afternoon newspaper, Wednesday endorsed Republican Carl Francis for attorney general and said it had no preference between the two candidates for state treasurer, Howard Belton or Ward Cook.

### DEVOTION TO DUTY

Columbus, Miss.-(UPI)-The City of Columbus hired two women last month to replace male policemen in patrolling downtown parking areas. The result: An increase in tickets issued for illegal parking of more than 100 per cent the first month.

## DON'T LET THEM FOOL YOU!

ONLY 14 STATES ADOPTED STATEWIDE ARTIFICIAL TIME! 36 DID NOT!

World Time Chart, Manufacturers Trust Co., and National Railway Publication Co., the two authorities accepted by everyone, agree that only these 14 states had artificial time last summer:

- |               |               |              |
|---------------|---------------|--------------|
| California    | Minnesota     | Pennsylvania |
| Connecticut   | Nevada        | Rhode Island |
| Illinois      | New Hampshire | Vermont      |
| Maine         | New Jersey    | Wisconsin    |
| Massachusetts | New York      |              |

So what is this hokum about voting for artificial time so that we can "be in step with the rest of the country"?

And NOT ONE of these states has as much NATURAL evening light as Oregon! Every major city that adopted artificial time had less natural evening daylight than Portland. For example, Portland had 44 minutes more natural evening daylight than Boston, 37 minutes more than New York,

85 minutes more than Los Angeles, 74 minutes more than San Diego, according to the U. S. Naval Observatory, Washington, D. C. They had reason to change. Oregon does not. These are facts! Don't be misled!

**VOTE 2 x NO** KEEP OREGON'S NATURAL, "BUILT-IN" DAYLIGHT TIME
