

RADIO PROGRAMS — WEDNESDAY

Programs listed below are received from the radio stations and the Mail Tribune assumes no responsibility except to make changes as are supplied

Table with columns for station (KYJC 1230 kc, KMED 1440 kc, KWIN 1400 kc) and program details including time, program name, and host.

RADIO PROGRAMS — THURSDAY

Table with columns for station (KYJC 1230 kc, KMED 1440 kc, KWIN 1400 kc) and program details including time, program name, and host.

Table for KRVC 1350 KC with columns for time and program details.

Table for KBOY AM 730 kc with columns for time and program details.

Table for KBOY FM 95.3 mc with columns for time and program details.

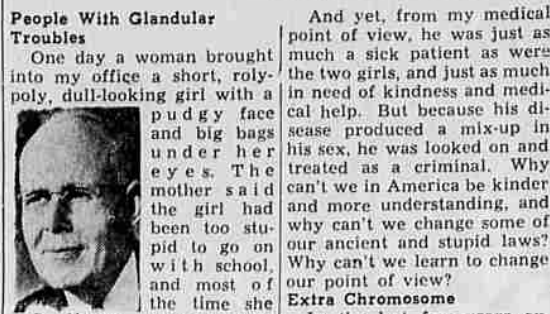

Table for KDOV 1300 KC with columns for time and program details.

TELEVISION PROGRAMS

Table with columns for day (Wednesday, Thursday) and time, listing television programs and channels.

The Medical Roundup

People With Glandular Troubles... One day a woman brought into my office a short, roly-poly, dull-looking girl with a pudgy face and big bags under her eyes.

Dr. Alvarez... And yet, from my medical point of view, he was just as much a sick patient as were the two girls, and just as much in need of kindness and medical help.

Recently, when a mongoloid child was born into a supposedly normal family, the doctors examined the father and found he had 47 chromosomes.

What interested me much, and made me think a lot, was that no one had fussed at the two girls but the man was soon fired from the good job which he had held for years.

sending 25 cents and a large, stamped, self-addressed envelope with your request to Dr. Walter C. Alvarez, Dept. M.M.T. The Register and Tribune Syndicate, Box 957, Des Moines 4, Iowa.

Emeritus Consultant in Medicine Mayo Clinic Emeritus Professor of Medicine Mayo Clinic (Register and Tribune Syndicate, 1960)

And yet, from my medical point of view, he was just as much a sick patient as were the two girls, and just as much in need of kindness and medical help.

Recently, when a mongoloid child was born into a supposedly normal family, the doctors examined the father and found he had 47 chromosomes.

What interested me much, and made me think a lot, was that no one had fussed at the two girls but the man was soon fired from the good job which he had held for years.

And yet, from my medical point of view, he was just as much a sick patient as were the two girls, and just as much in need of kindness and medical help.
