Citizens Committee Lists Building Needs in Josephine County Schools

By JOAN MILLEMANN
Murphy Correspondent
Grants Pass — A 10-member citizens committee appointed by the Josephine county school board to study county unit school system building needs met Jan. 10 with school board members and Elmer Fleming, county superintendent.

It would also include addition of six classrooms and gym at Merlin and two new

rooms at Fort Vannoy. Jones Creek children could be taken by county schools under this plan, eliminating their tuition fees.

Survivors of Crash Recovering Slowly

Jacksonville — Mrs. Robert Welch and son Charles are reported to be recovering slowly from injuries received in an automobile accident Dec. 26 near Curtin, Ore., which killed Robert Welch and daughter Edna Marie.

Either plan would include building of a shop, field house for equipment and facilities and completion of a ceiling in the gym at Illinois Valley.

The committee was also reminded that by 1964 facilities for education of retarded children must be included in every school system by state law, and Fleming said this will mean four classrooms will have to be provided in county schools.

Mrs. Welch is suffering from various facial and head injuries and broken ribs. Charles' injuries include both legs and arms broken, six broken ribs and facial lacerations. He will undergo further surgery this week to set a broken hip joint. Both are able to have a limited number of visitors.

After much discussion, committee members decided it was the committee's obligation to investigate as fully as possible the building needs, decide on the plan they felt would provide the best education for the children of the county for future years, and make a final report to the school board.

The Welch family was en route home from a Christmas visit with relatives in Molalla when the crash occurred.

They indicated that it was not up to them to decide what amount the voters would accept on a bond issue, but just to specify what building they felt should be done at this time to provide the best, most permanent results for county children.

Family relatives have suggested that friends of the family may donate blood in their name when the next bloodmobile comes to Medford Feb. 14. Several blood transfusions were required in treatment of Mrs. Welch and Charles.

Fleming said an architect would be present at the next meeting Jan. 23 so actual figures will be available for use in computing and comparing costs of possible building plans.

Those desiring to donate blood in the name of the Welch family must give the family name when donating.

Tablets

By R. E. NEALON

Table Rock—The spotted alfalfa aphid, first discovered on the Touvelle farm, has now been identified on practically every farm in the community where alfalfa is grown.

Zane Grey and Herbert Hoover have caught their quota of salmon and steelhead. There are two of us, my wife Ruth and myself, both past retirement age.

The method recommended for control is so expensive that many local farmers are plowing up their alfalfa fields. According to Don Bohner who has made quite a study of the alfalfa spotted aphid, it comes from Europe, probably in imported seeds. About half of the insects have wings and can travel with the wind at high altitudes for hundreds of miles. When the wind recedes, the insects settle down to earth, and if they are over your section when the wind subsided, you have them. Freezing temperatures are tough on these insects, and it is hoped that the recent low temperatures here may have destroyed most of the pests.

Mr. and Mrs. Ellis came here from Los Angeles, Calif., 40 years ago. Most of that time since they have lived in the Beagle district. When they lost their home by fire they needed a house in a hurry and bought a mobile home which they claim was a good investment. They parked it near a large stream among some large oak trees. Last spring they built a living room with fireplace onto the mobile home.

Mr. and Mrs. John Hood, of Valdez, Alaska, left Wednesday, for their home after a week's visit with relatives at the Herschel Harper home. Mrs. Hood, the former Joyce Harper lives at Valdez, where her husband operates a freight truck line. The Hoods came by jet plane to Seattle, a distance of 2,600 miles. They claim that the price of groceries at Valdez is very little different than here.

Being new at this kind of work, it took a lot of planning, patience, and some friendly arguments to finally finish the job. But now they are able to tell other "do it yourselfers" how to build a home of this kind. So cleverly put together is the mobile home and living room, that at first glance, the casual observer wouldn't notice that this pleasant home is really a mobile home. Yet, by the removal of a few bolts, the home would be ready to take to the road. With plenty of electricity and acres of oak trees for the fireplace, they have no heating problems. To see this home, one should go up the east Meadows road, past the Antioch cemetery and go a few miles north.

Don Grissom, the bashful sheep barber from the Lake Creek area, was down this way Monday, tagging sheep. When he had finished trimming the bangs from over the eyes of the last ewe, he pulled his hat off and exhibited a nice slick hair cut. When we asked who cut his hair, he said "my wife. We mountain folks can't pay the flatland prices for hair cuts."

Workers Needed For Eagle Point Building Project

Justice of the Peace Norman Matteson, reports that in his first day at his Gold Hill office he had 17 traffic cases to make things interesting. Donald Richardson, of the Green, Richardson, Green and Griswold Portland law firm, flew into the Medford airport Monday morning and was a luncheon guest at the home of his parents at the J. S. Richardson home. In the afternoon he argued a case in Judge Sawyer's court in Medford, flying back to his Portland home in the evening.

Eagle Point — The stairway and porch forms for the main entrance of the new Eagle Point Scout-Community building must be put in this Saturday, according to a spokesman at the building committee meeting Monday night.

Ralph James, recently retired county commissioner, is now a member of the Roscoe Roberts Insurance agency of Medford. We attended the recent John Deere luncheon and show. W enjoyed a delicious lunch and later, a highly interesting show at the Craterian theater. The usual number of John Deere implement owners and those farmers, who would like to be owners, were present. All seemed to be enjoying themselves and were keenly interested in watching the many new models of farm tractors and machines being put through their paces.

There is also cleaning up to be done. Harry Hanscom, building chairman, says anyone who can swing a hammer can be put to work. Anyone who can help secure part of the plywood and supplies can do so at their convenience by contacting Hanscom for the pick-up orders and necessary information.

Trailer Topics magazine, a Chicago publication that caters to mobile home owners, has a full page story with pictures titled "Our Immobile Mobile Home," written by Harry Ellis of the Beagle area about five miles northeast of Dallas Purcell's survival cases. Excerpts from the story follow: "We live on a ranch in the beautiful Rogue River valley of southern Oregon. In fact, we are only five miles from that famous stream where such Izaak Walton as

The committee decided to work on Saturday and Sunday of one week end, and then not work on the following week end. Hanscom said if everyone from high school age and older would help with the building for three week ends, the building could be put into operation immediately thereafter. He said turnouts have been small to date. A potluck luncheon is served at noon for the workmen and their wives and families, who are invited to bring food.

CURRENT USE Cleveland — Enough electricity is used to make a ton of aluminum to keep a 40-watt light burning for 68½ years.

Regional Calendar

Applegate Valley—Mrs. Marcel LePiniec will discuss methods of drying and pressing flowers at a meeting of the Applegate valley garden club to be held at the home of Mrs. Clarence Duncan, Upper Applegate, Wednesday, Jan. 18th at 1:30 p.m. The local club expects to launch a program of wild flower pressing for public display.

Mayor and Councilmen Installed

Cave Junction—Mayor Carol Banks was administered the oath of office at the Jan. 9 meeting of the Cave Junction city council.

City Recorder Mrs. Kenneth Caldwell was asked to send inquiries to Grants Pass car dealers for bids on a new

The mayor then led Leslie Henry and Mrs. Vivian Deaton in oaths for council positions. The council tabled a motion for a proposed new street from Lister to Watkins st. until a petition from property owners along the proposed street is submitted.

Happy Camp Concern High Timber Bidder

Yreka — Carolina Plywood Corporation of Happy Camp was high bidder on 16,800,000 board feet of pine and fir timber in the Sandy Bar unit, Ukonom district, Kenneth C. Duncan of the Klamath National forest has announced.

The city water works were discussed and it was announced by Art Drews, water master, that a map showing present water lines is being prepared. Drews reported the new water system warning device gave two alarms when damage was inflicted by wind storms.

Total advertised value of the timber was \$87,900. The value based on the highest bid was \$87,960.

61 FORD

...the only car in its field beautifully built to go...

30,000

miles between lubrications

HERE'S HOW THE '61 FORD TAKES CARE OF ITSELF

Lubricates itself—You'll normally go 30,000 miles between chassis lubrications (which cost only about \$4.00) and take about 20 minutes because Ford has replaced conventional grease fittings with a sealed-in lubrication system.

Cleans its own oil—You'll go 4,000 miles between oil changes because Ford's Full-Flow oil filter gives you filtration through fibers...trapping more dirt than any other type of filter made.

Adjusts its own brakes—New Truck Size brakes adjust themselves—automatically.

Guards its own muffler—Ford mufflers are double-wrapped and aluminumized to last three times as long as ordinary mufflers.

Protects its own body—All vital underbody parts are specially processed to resist rust and corrosion, even to galvanizing the body panels beneath the doors.

Takes care of its own finish—Just wash and clean Ford's new Diamond Lustre Finish and it continues to glisten like new. It never needs waxing.

Reporter Busy Helping Family Build New Home

Mrs. Katherine Scott says taking care of four children, helping build a house and serving as Mail Tribune Cave Junction-Illinois Valley correspondent keep her busy.

Mrs. Scott has been a correspondent for about seven months. She says she "likes to put into writing what I see and hear." As a mother of four, her activities allow her to see and hear quite a bit. She is assistant room mother of the third grade at the Evergreen Elementary school and a member of the Evergreen PTA.

Mrs. Scott has been living in the Cave Junction area for 20 years. She came to the area with her parents Mr. and Mrs. B. F. Robinson in 1940. The family moved from New Mexico.

Building House She and her husband Delbert, have three boys and one girl. They range in ages from 13 to 2.

The Scott family is currently engaged in building a house, no small undertaking. However, Mrs. Scott still finds time to keep pen in her area informed on major news happenings.
