## The Medical Roundup

by *Walter Talbot*

Emeritus Consultant in Medicine  
Emeritus Professor of Medicine  
Mayo Clinic  
(Register and Tribune Syndicate, 1961)

## ARTIFICIAL LARYNX

A while ago I mentioned in this column a new type of electronic artificial larynx which has been developed by the Bell Telephone Laboratories. I should have said that the vibrating sound is produced by a "transducer," which is activated by mercury cells.

The person who has lost his larynx or voice box usually because of an operation for cancer—presses the end of the instrument against the place where his voice box was. On turning the switch a sound is heard which the person turns into speech by mouthing or breathing out the words he wants to say. This apparatus can bring back a world of life and usefulness to those thousands of people who have lost their voice-box, and have been unable to learn to talk by swallowing air and gulping it up again. Another apparatus which works well is the one that is used at the Mayo Clinic.

## The Child With a Cleft Lip

The National Society for Crippled Children and Adults (Chicago) recently published an excellent booklet by Dr. Eugene McDonald on the problems faced by parents

when a child is born to them with a cleft lip and perhaps a cleft palate. The first thing they must do is to stop trying to figure out what little mistake they made that "caused" God to punish them. "I always say to such people, 'Surely, you do not believe in a God so mean and vindictive and unfair that, in order to punish you for (as you suppose) some little transgression such as having much wanted a girl and not a boy, he would so horribly deform his innocent little baby, and perhaps doom him to speak in a peculiar nasal way for the rest of his days?'"

"No, God did not do this to punish you. All that happened was that around the end of the third month of pregnancy, the two halves of the face, which normally should have grown together and fused, did not quite make it. That is all." This happens to about one child in every 750. In one study it was found that in 41 per cent of the cases in which there was a cleft lip and a cleft palate there were forebears who had had a similar difficulty. For a truly, in most cases, a man or woman with a cleft lip has normal children.

When a baby is born with a cleft lip, the parents are so shocked and so ashamed that they would like to have the defect repaired at once, but it is better first to let the child grow a bit and get strong.
