tried, also salicylates, injections of foreign protein, and desensitization by vaccines. Naturally, a logical treatment cannot be given unless a definite cause can be found. I am sorry to say that commonly, the cause cannot be found.

The point I want to hammer home here is that I must not try to give advice to the hundreds of people who write to me about a rare eye disease that is likely soon to destroy their vision. The thing they must do quickly is to go to the best ophthalmologist (eye specialist) their family doctor can find them. They must not waste time trying to find glasses that will help them.

If you're a year-round sufferer of allergies or asthma—actually, even if you're a 'spring-time case'—you'll want to read Dr. Alvarez's informative booklet, "Asthma, Allergy and Hay Fever." It may be obtained by sending 25 cents and a large, stamped, self-addressed envelope with your request to Dr. Walter C. Alvarez, Dept. MMT, The Register and Tribune Syndicate, Box 957, Des Moines 4, Iowa.
