The Medical Roundup

by Walter Alvarez

A Study of Medicine 2,400 Years Ago Can Teach Us Much Today

That great neurologic surgeon of Canada, Dr. Wilder Penfield, has written a most interesting story, "The Torch," based on his years of study of Hippocrates, the honored "Father of Medicine," who wrote several books about 450 B.C.

To him and his school came many students to learn medicine, and thousands of patients to be helped.

In his book, Dr. Penfield described a man suffering from epilepsy. He was terribly depressed because he had been told that there was a demon in him, and that in some way he was to blame for his falling spells. After Hippocrates had explained to him that his disease was not "sacred," it was not due to a god or a demon, but was a disease just like any other, the man felt much happier.

He straightened up and said what a comfort it was to know that there was no evil spirit in him. There was no curse in him, and hence no need for him to search his soul for forgotten sins.

Interesting was the realization of Hippocrates of the fate that often death brings great relief to an old person; it puts an end to his or her sufferings. Penfield tells of the talk Hippocrates had with his 80-year-old grandmother, who had fallen and broken her hip. The doctor had splinted the bone and it had knit satisfactorily, but as so often happened in the old days, the patient could never again leave her bed. Months later, when the doctor bragged that there was no shortening of the affected limb, the weakened-up little old woman said she was not grateful. "You saved my life," she said, "but you kept me here."

Very interesting to me is the story of a day when Hippocrates came back from a journey and, like so many of us physicians today, he found that his assistant had signed him up for appointments all through every minute of the day. Hippocrates was annoyed, and he pointed out to his assistant that any physician who works at that pace cannot possibly keep up-to-date. Many a thoughtful person would enjoy reading this unusual book about the first physician in history of whom we know a good deal.
