How - to - stop-the-recession

note:
The AFL-CIO policy committee, headed by UAW's Walter Reuther, issues a study saying that President Kennedy's recovery program, even when put into effect, won't stop rising unemployment.

The study adds:
"If President Kennedy would adopt an AFL-CIO suggestion for a quick, temporary five billion dollar tax cut, the way would be clear for resumption of full employment and production."

WHAT is the suggestion?

It would work like this:
For a period of several months reduce the federal withholding tax, which is held out of paychecks, by enough to amount to about \$100 per month per person. It is calculated that in a period of four or five months this would amount to about five billion dollars, which would be left in the pockets of those affected by the reduction.

The reasoning is that they would go out and SPEND the five billions thus left in their pockets and this free spending would lift this nation out of the current recession and put us all back on the high road to prosperity.

IT'S an intriguing proposal. Sure enough, it would add five billion (or so) dollars to the SPENDABLE income of those of us who would be concerned. And - it is quite certain we would SPEND it. It must be conceded that the free spending of some five billion dollars in the next few months would tend to stimulate business. Spending is what MAKES business.

But -
There's a catch to it.

The catch is this:
While the tax reduction would ADD five billion dollars to the nation's total spending it would at the same time SUBTRACT five billion dollars from the government's INCOME for that period.

So, what it would amount to would be adding five billion dollars to what is already on the cuff. Which is about 300 billion dollars. When added to what is on the cuff, this five billion dollars will begin drawing interest. Interest on what is now on the cuff amounts to about nine billion dollars a year. This nine billion dollars is added to the cost of government. The cost of government has to be taken out of the pockets of the taxpayers.

BACK in 1940-which seems almost no longer ago than yesterday - the TOTAL cost of the federal government of the United States was only \$9,062,032.204. It is now up around 80 billions.

Which is to say:
If in the next two decades the cost of our federal government increases as rapidly as it has increased in the past two decades, it will be getting up in the neighborhood of three quarters of a TRILION dollars.

It's hard to escape the feeling that it's about time to start TAKING IT OFF THE CUFF INSTEAD OF PUTTING MORE ON.

Committee Votes Boardman Bills

Salem - (UPI) - The House, State and Federal Affairs committee Wednesday approved two bills providing funds and authority for the state to acquire Boardman Industrial Park.

The measures, HB1600 and 1601, were approved by a 5-0 vote only a few hours after a morning hearing. Committee Member George Van Hoomissen (D-Portland) did not vote on the bills.

Rep. Clarence Barton (D-Coquille) had urged approval of the \$900,000 called for in the legislation as a "calculated" gamble on space age development. The state plans to lease the park to Boeing Airplane company.

Hells Canyon, Oxbow Bills Pass

Salem - (UPI) - The Senate Wednesday passed a bill that would allow Oregon to license Brownlee, Oxbow and Hells Canyon dams on the Snake River.

SEN84 went to the House. It would mean about \$100,000 in license fees for the state which declined to license the projects of Idaho Power company.

IPC got Federal Power commission sanction and went ahead without Oregon approval.

PLAYS IT SAFE

Austin, Tex. - (UPI) - Sen. George Parkhouse of Dallas threw his weight Wednesday behind a bill to regulate safety brakes on farm trailers.

"I don't want to get hit by any fertilizer," he explained.

PIGGLY WIGGLY

No matter how you figure...

... you always do better at PIGGLY WIGGLY!

Whether you keep a budget or just have a pretty good idea of food costs, you'll always do better at Piggly Wiggly. Why... because Piggly Wiggly's insistence on quality means you get more for the money you do spend, no matter how you figure food costs... and you receive the added saving of S&H GREEN STAMPS.
