Many Advised To Leave Los Angeles

Los Angeles - (UPI) - More than 10,000 persons have been advised by doctors since 1956 to leave Los Angeles because of the effects of smog on their health.

About 2,500 took the advice last year alone. That information was given to the county board of supervisors Thursday by Dr. Francis M. Pottenger Jr., chairman of the Air Pollution Committee of the County Medical Association.

Pottenger said the statistics were gathered from questionnaires sent out to 9,000 doctors. About 60 per cent of the doctors returned the forms with information. Pottenger was one of four physicians who spoke with the supervisors in deliberations on a smog control bill.

Sabin To Testify On Oral Vaccine

Washington - (UPI) - House investigators planned to ask Dr. Albert Sabin today whether American drug companies have been dragging their feet in getting his new oral polio vaccine to the public. The Public Health Service said Thursday it may be up to six months before the new vaccine is available even though it has potential advantages over the present Salk vaccine by giving "quicker, possibly longer-lasting immunity."

Spring Pig Crop To Be Above 1960

Washington - (UPI) - The Agriculture Department estimates the 1961 spring pig crop in 10 corn belt states will be about 8 per cent above the 1960 level. The department's Crop Reporting Board made no actual forecast of pig production, but it reported that the number of sows bearing pigs in December through May will be 5,524,000 head. This is 8 per cent above 1960, but 9 per cent below the 1950-59 average. Spring pigs go to market as pork products in the fall and winter. The 10 states covered in the report normally produce about 75 per cent of the nation's hogs.
