

INFORMAL ACCENT—Curved plantings, for the informal setting, look lovelier and more professional than an arrangement that simply follows the straight lines of the house and fence. Low shrubs provide lush beauty and a natural look; they may be combined with taller trees most effectively too.

Adhesive Sealer Can Fix Tub, Tile Gaps

Unightly gaps between tub and tile can now be mended quickly and easily with Devcon Tub and Tile Sealer, newly introduced on the market.

Applied from the tube to make a waterproof seal that is permanently non-cracking, the new material has tremendous adhesive strength. It's non-tacky composition permits smoothing simply by wetting the finger and patting down. The excess may be wiped away with a damp cloth.

The quick-setting adhesive is a non-yellowing, pure white. The tube's long applicator makes corners easily accessible. Other uses include sealing cracks around windows, doorways, screens, on boat decks and walls, as well as repairing furniture and other objects.

Although not designed as a general adhesive, the repair

has unusual adhesive strength. Two bonded wood blocks, one inch square, require about 1,500 pounds of pull to separate them, the manufacturer reports.

VERSATILE JACKPOSTS

Homeowners are finding adjustable steel jackposts have many uses about the home. They are particularly good when there is doubt about the floor's ability to support a heavy object such as a piano or freezer. In addition to preventing floor sag, their screw adjustment permits a drooping floor to be leveled gradually.

SOFT DRINK CAN STRONG

Use empty soft drink cans to support hamburger grill at the beach, or as a support for sandwich toaster, or corn popper.
