### Measures Supported By League

Members of the League of Women Voters throughout the United States have been notified of a "time for action" to express support of pending federal legislation, according to Mrs. Dunbar Carpenter, president of the Medford league.

Women in the non-partisan voters group are supporting federal water pollution control amendments, House Resolution 4036, to provide for "more effective pollution control and abatement." Support is also expressed for a \$500 million appropriation for the Inter-American Fund for Social Progress, "a joint effort by North and South American nations to spread the benefits of economic development by bettering living conditions for millions of Latin Americans."

Mrs. Lynn Valentine, Jacksonville, is Medford chairman in charge of the League's water study and Mrs. Fred Birch is chairman of the foreign policy study. Reasons given: The pollution control measure is supported by the League, officers explained, because of provisions for 1) increased appropriations for incentive grants for municipal sewage plant construction and development of state and interstate pollution control programs, 2) encouragement to communities to build joint facilities, 3) increase in the maximum project grant to encourage improvement by cities, 4) expansion of research programs and facilities, and 5) extension of federal enforcement powers.

Members believe "that pollution control is important not only to national health but also to the larger problem of water supply," and long range planning for water resource development would be helped by raising the status of the pollution abatement program.

The group's support of the Inter-American fund is based on the measure's design "to help Latin American neighbors in their own efforts to improve agricultural production and rural living, housing conditions, water supplies and sanitation facilities, education and training facilities, public health and medical facilities."

All such action taken by the voters group is based on study by women in leagues throughout the country and a resulting consensus of the membership, Mrs. Carpenter said.
