The Medical Roundup

by *Walter Adams*

Face-Lifting

Many aging women write asking me how to go about getting their faces lifted. Some want to know if they should go to a person who advertises a face-lifting without surgery—perhaps by painting with carbolic acid. The first thing I would say to all such women is, "Have nothing to do with anyone who isn't a registered plastic surgeon." I would not think of entrusting my face to anyone who was not highly qualified after several years of special training by a great expert.

Next, if I was a woman, I would not want a face-lifting job unless I much needed it. In order to hold my place as a beautician, or a saleswoman at a cosmetic counter, or something like that. The plastic surgeon is glad to help such a woman, but often he turns down a nice-looking woman who does not need a face-lifting, but wants it because she has an idea it would help her to hold a restless husband who is five years younger than she is. Such women, when after the operation, fail to hold the young husband or lover, commonly turn angrily on the surgeon and threaten to sue him.

A face-lifting operation is a big operation, a difficult and nerve-racking one, and one which may easily lead to a nasty lawsuit, and hence I think the surgeons are justified in charging a fee that often runs into several hundred dollars. I cannot imagine that the painting on of carbolic acid will lighten up the facial skin as well as an operation can do it, but I have heard that it can remove brown blotches on the skin. One correspondent writes to say she asked the price of a 5-weeks' such treatment and was told it would cost \$1,500. This answer, if true, will tell most of my questioners what they need to know about it.

There is only one scientific way to reduce. Dr. Alvarez tells you about it in his booklet, "Weight Control." To obtain it send 25 cents and a large, stamped, self-addressed envelope with your request to Dr. Walter C. Alvarez, Dept. MMT, The Register and Tribune Syndicate, Box 957, Des Moines 4, Iowa.
