

HERE SOON—The Buick Skylark (above) a high performance, luxuriously appointed sports coupe, will be on display soon at Skinner-Buick-Cadillac, 143 South Riverside ave. The Skylark features a sheer roof line, turbine-like wheel covers and richly-upholstered interior, with a 185 horse-

power, aluminum V-8 engine. Newly-designed front bucket seats and white fabric top covering are optional. Buick also announced a standard two-door coupe in the Special series. Skylark will be in show-rooms May 15.

Vast Expansion Urged In Medical Research Field

Washington—(Science Service)—The two leading causes of death were attacked at the President's Conference on Heart Disease and Cancer.

Twenty-two physicians reported to President Kennedy that not only is a "vast expansion of medical research" needed, but that individuals and communities should be made aware of achievements already attained by scientists in their war to stamp out these killers.

Pointing out the tremendous loss to the nation through illness and death from heart disease and cancer, the physicians recommended a "much higher level of federal appropriations in support of medical research" and a commensurate increase in voluntary contributions to fight them.

President Kennedy sent a message to Congress based on the report. Chairman of the conference was Boiesfeillet Jones, special assistant to Secretary

Loafing Can Lead to Death, Doctor Says

Burlington, Vt.—(UPI)—Dr. Wilhelm Raab, former chairman of the Experimental Medicine Division at the University of Vermont, says a "loafer's heart" can kill you.

He said "persons who fail to exercise regularly, either in their work or in their spare time, become candidates for earlier heart disease and cardiac death than those who, by regular physical activity, keep their hearts in good shape."

Abraham Ribicoff of the department of health, education and welfare.

10-Point Plan
Sen. Hubert H. Humphrey (D-Minn.) has urged a 10-point plan for "total war" against cancer and heart disease. His key proposal is for federal support for regional centers of biomedical research in the nation's leading universities.

He also is proposing more money to support exchanges of scientists with other countries, to finance pilot research centers abroad, to support international professional societies and other measures.

MARINE GRADUATES

Washington—Before the U.S. Naval Academy was founded, West Point graduated several officers into the marine corps.
