The Medical Roundup

by *Walter Alvaraz*

Shingles
I never knew until letters by the thousand began to pour in on me, how common

a complaint shingles is and what a serious and painful disease it is in old people. Shingles (herpes zoster) is a condition due to the virus of chicken pox. In adults this often will attack a nerve, and then in the skin along the course of this nerve there will appear a line of blisters. Usually, in young adults, in a few weeks these blisters dry up and disappear. But in old people, for reasons unknown, severe pain may remain in the area for months.

That it is not arising in the affected nerve is shown by the fact that some years ago surgeons went in and cut the nerve and its little ganglion, and the pain went on unchanged. Many surgeons tried lifting up the affected area of skin and cutting it away from the tissues underneath, and that didn't help. Then they tried freezing the skin, temporarily with a spray derived from a little sprayer which one can buy in a drug store. Some said it helped, while others saw no effect. Many physicians have injected procaine into the affected area, anesthetizing it temporarily, without entirely satisfactory results. A while ago I reported in this column the work of some physicians who said that they had treated scores of these patients with every method that had ever been suggested, and they were not sure that any of the methods had given anything more than an hour's relief.

My impression from reading many articles on the subject is that the pain is arising up somewhere, perhaps in the spinal cord, and this is why

brother, and at the same time my grandson, for he was the son of my daughter. In the process, my wife became my grandmother since she was my mother's mother; and since the husband of one's grandmother is obviously his grandfather, I was my own grandfather."

About the only way in which a reader can satisfy himself that all of the above statements are correct is to do as I did, and draw a geneticist's type of diagram of the family tree. Old people tell me that a little fun is good for one's liver.
