

12 A Food Supplies Expected To Cost Slightly More

Washington - UPI - The Agriculture Department said Tuesday food supplies are expected to be about as plentiful this spring and early summer as last - at prices averaging a little above a year earlier.

The department said retail prices may show some seasonal increase in the next few months, but the gain over a year earlier is expected to narrow.

Economists writing in the department's publication, "The National Food Situation," gave this rundown on food supplies:

Less Meat Expected

Civilians are expected to have a little less meat per person through mid-1961 than they did in the same part of 1960. The rate for beef likely will be about the same, but a reduction is in prospect for pork and the other classes of meat.

Some increase is likely in per capita consumption of both chicken and turkey, but little change from a year earlier in indicated for eggs.

Compared with spring and early summer 1960, more milk and dairy products probably will be available this season.

1961 Harvest Waited

Less fresh deciduous fruits than a year earlier will be available, per person, until supplies from the 1961 harvest start moving to market around mid-year. Civilians are expected to use about as much fresh citrus and most processed deciduous fruits per person this spring as last, but a little less of the processed citrus juices.

The crop of fresh vegetables is indicated to be moderately smaller this spring.

Civilians are expected to have about as much of the other major foods per person through early summer as they did a year earlier.

The department said consumer demand for food is likely to continue at a high level.

Construction Funds Authorized

Washington - UPI - The Senate has authorized a \$879,684,750 military construction program for the next fiscal year, nearly a third of it to build sites for nine Minuteman missile squadrons.

Action came on a voice vote after the chamber shouted down an attempt by Sen. A. S. Mike Monroney (D-Okla.) to restore authority to build 7,000 new units of Capehart military housing.

Instead, the Senate substituted 2,000 units to be financed with direct federal appropriations.

The Air Force got the lion's share of new authorization, \$486,268,000. This was nearly twice the combined sum allotted for the Army and Navy.

Authority to spend the money in the year beginning July 1, must be followed later by actual appropriations. The authorization is a ceiling on spending.

Three hundred of the 2,000 housing units to be financed directly were awarded to Hill Air Force Base, Utah. Five bases got 200 units each.

Your choice of frozen foods from our complete selection with the purchase of any Amana Freezer or Freezer plus Refrigerator combination.

YOUR FOOD INVESTMENT IS SAFE, BECAUSE . . .

Amana OUTPERFORMS ALL OTHERS!

This is the broadest statement ever made (with PROOF) by either a dealer or a manufacturer. Come in and let the friendly Amana people show you why Amana is GUARANTEED TO OUTPERFORM ALL OTHERS!

Here's What Makes Amana Freezers Best!

FACT NO. 1

Amana reserve power and efficiency brings zero degree temperature faster and safer than all others tested . . . because Amana is designed and built to be a true food freezer, not just a "holding" cabinet that "feels" cold.

FACT NO. 2

Amana maintains an even zero degree temperature because Amana has 6 fast freezing surfaces. All foods are directly on or below these FAST FREEZING SHELVES. True, constant zero degree temperature protects your foods from TEMPERATURE DAMAGE.

FACT NO. 3

Amana has uniform food storage temperature. Many others have long running cycles which indicate lack of freezing capacity. Amana insures "locked-in" nutritional values because of TRUE zero degree temperature throughout.
