

EAST MALL. — The spacious, landscaped malls of Lloyd Center furnish shoppers with attractive avenues free of all vehicle traffic among the more than 100 retail stores within the world's largest shopping center. Shown above is the East Mall where a stairway in the foreground curves gracefully upward to the medical wing occupied by 50 doctors and dentists. The upper level is accessible also by elevators. Wide as city streets, the malls contain planter areas of flowers and trees, with benches alongside, fountains, pools, and metal sculpture by regional artists.

Lloyd Center Makes Shopping An Adventure With Discovery

Portland—The real surprise awaiting visitors to the famed Lloyd Center in Portland is not the glittering array of shops and specialty houses which line the broad pedestrian malls. Nor is it the delight of unexpected fountains and sudden bursts of contemporary sculpture.

Republican Leaders Outline Major 1962 Election Targets

Washington—(UPI)—Republican party leaders outlined major targets Monday for GOP gains in the 1962 elections.

Republican National Chairman William E. Miller listed eight states in which he said the GOP could displace Democratic governors.

Sen. Barry Goldwater, chairman of the Republican Senatorial Campaign Committee, listed eight Senate seats where he said Republicans should displace Democrats.

Rep. Bob Wilson, chairman of the Republican congressional campaign committee, said the GOP could pick up the 44 House seats it needs next Nov. 6 to win control of the House.

The three party chairmen addressed about 2,000 women assembled for the 10th annual Republican Women's Conference.

Miller said the GOP lost the 1960 presidential election in 31 big cities where it "lacked muscle, lacked organization, lacked finances and lacked the bodies" to get out the Republican vote.

He announced that Republican headquarters had given top priority to 12 cities in a program to improve the party organization there.

The cities listed were Chicago, Detroit, Philadelphia, Pittsburgh, New York, St. Louis, Kansas City, Milwaukee, Cleveland, Boston, Hartford, Conn., and Portland, Ore.

He told the Republican women that "this is no time to be Goldwater Republicans, Rockefeller Republicans or Nixon Republicans."

"We'd better just be Republicans this year," he said.

See Good GOP Chance

In his prepared remarks, Miller said the GOP has a good chance to displace Democratic governors this year in Ohio, Michigan, California, Wisconsin, Pennsylvania, Nebraska, North Dakota and Wyoming.

He said the party had "a fair chance" to replace Democratic governors in Alaska, Colorado, Connecticut, Maryland, Nevada, Texas and Oklahoma.

Steel Firms Told To Produce Books

New York—Three steel companies were ordered by subpoena Monday to present certain books and records to the Senate Anti-Trust subcommittee.

The subcommittee, headed by Sen. Estes Kefauver (D-Tenn.) subpoenaed officials of the U.S. Steel Corp., Colorado Fuel and Iron Corp., and Bethlehem Steel Corp.

A spokesman for one of the companies said the subpoenas, returnable in Washington May 14, ordered the companies to produce books and records, including figures on steel production.

Waldo Lake Basin Development for Recreation Planned

Portland—(UPI)—A plan for development of the Waldo Lake area in Oregon's Cascades emphasizing recreation has been announced by the Forest Service.

J. Herbert Stone, regional forester, said the revised plan approved by U.S. Forest Service Chief Edward P. Cliff was correlated with the new high mountain policy announced two weeks ago.

It designates recreation as the key value in the Waldo Lake Basin and in the area of small lakes to the northwest. The area is part of the Willamette and Deschutes National Forests.

Decision Affirmed
Stone said the decision, based on an appeal by members of some recreational groups affiliated with the Federation of Western Outdoor Clubs, affirmed his decision in February of 1961 to place the area under multiple use management. Revisions of the original plan were made within the framework of the high mountain policy.

The Waldo Lake multiple use plan announced the previous February was appealed to the Forest Service chief. Appellants said they believed the plan would impair recreational qualities.

Cliff said he was certain the revised plan together with approved policies for high mountain areas "will insure that adequate precautions do exist to safeguard the important recreation and soil values."

Under the new plan timber harvesting is permissible under controlled specification. It provides that timber will be managed to maintain healthy, continuous forest cover which precludes vast areas of stumps as envisioned by the appellants.

Scenic and natural beauty will be preserved.

Limited Access
The announcement said the northwest small lakes area would not be designated a wild area as had been requested, but the area will be managed primarily for recreation with limited access. No road construction will be under-

taken in recreation areas until recreation plans have been completed.

Appellants also had asked that none of the former limited area's timber be included in the Oakridge Ranger District working circle until adequate methods of rapid regeneration are proven. The new plan calls for the area to be included but the allowable cut

contribution to the whole working circle will be adjusted as dictated by recreation values.

The high mountain policy says timber may be harvested in a manner compatible with the overall management objectives outlined in the policy when there is reasonable assurance of good utilization and prompt regeneration.
