

ORGANIC SYNTHESIS—Illustrating chemistry instruction offered at Medford High school is this exhibit by Mark Hadley, left. Looking on is Jim Moyer. Hadley is using a grignard reaction apparatus. It is used for organic synthesis. Work in various departments of the high school was on display for Rotary and Kiwanis club members last week at Rogue Valley Country club. Moyer had a display of actual naiads and artificial naiads he had made.

YOUTHS BUILD BOAT—An example of an industrial arts project at Medford High school is this boat constructed by twins Gary and Larry Olson. Examining it are Kiwanis club members Bill Singler, Don Faber, Dr. Merle Foland and Russ Renner. The boat and other exhibits were on display at a Tuesday meeting of Rotary club and a Wednesday meeting of Kiwanis. Dr. Leonard Mayfield, superintendent of schools, addressed both service clubs and Kiwanians heard the high school choir. Mayfield discussed what the local high school is doing in areas outside of athletics. Dr. Mayfield spoke of the wide variety of opportunities offered by the high school here. He indicated this variety was one of the reasons for a lower percentage of dropouts here than statewide or nationally. Displays at the two meetings included those on industrial arts, distributive education science, homemaking, social studies, art and art crafts, business education, English (including public speaking, journalism and dramatics) and foreign languages. Mayfield reported that the school administration believes in excellence and in academic competition and elevation. He praised the foundation laid here by E. H. Hedrick, former superintendent of schools.

EXPERIMENT—Craig Williams, Medford High school student, is shown with a Soxhlet extractor. In this original experiment, he is using the extractor in an attempt to determine what makes and controls the color in flowers. The extractor was on exhibit at Rogue Valley Country club with other examples of the educational opportunities and program at the high school. The school's program was discussed at luncheons of Medford Rotary and Kiwanis clubs on Tuesday and Wednesday by Dr. Leonard B. Mayfield, superintendent of Medford schools.

GENERATOR—A Van DeGraff generator, shown here and constructed by Jim Burke, was one of the many examples of work of Medford High school students on display two days at Rogue Valley Country club. Looking at the device are Julie Latham and Richard Knights, Medford Kiwanis club music award winners, who were guests of the service club at its Wednesday luncheon. This generator was constructed as an advanced physics project. The device is used to accelerate charged particles through a vacuum tube to a target.

Legers Open Cafe On Highway 99

Ray and Tillie Leger announce the opening recently of their cafe, "Tillie's Fish and Chips," located three-fourths mile south of the Lithia theater on South Highway 99.

Hours are 11 a.m. to 11 p.m., and drive-up, booth and counter service are available. During the dinner hour they specialize in Italian spaghetti and Bombay chicken curry with chutney. Homemade soups, pies and chili also are on the menu.

The Legers moved to the valley about one year ago from Long Beach, Calif., and Mrs. Leger, who originally came from Saskatchewan, Canada, received her training and experience in cooking in hotels and restaurants there.

Irrigation District Granted Easement

Salem—The Talent Irrigation District in Jackson County has been granted an easement by the Oregon Highway Commission covering .07 of an acre along the Seven Oaks-Ashland section of the Pacific Highway.

The district wants to build an irrigation ditch.

The commission also handed over to the city of Medford title to .03 of an acre on the northwest corner of the intersection of Biddle rd. and Jackson st. on the Seven Oaks-Ashland section of the Pacific Highway. The city will improve the intersection.

WAITING TO BE FED—These are some of Park. Tourists and residents have been in the 40 or more deer at Woodland Deer Park. vited to hand feed the deer.

Cave Junction Park Reopens

By KATHERINE SCOTT
Mail Tribune Correspondent

Cave Junction—Woodland Deer Park, the Highway 99 tourist attraction where visitors many hand feed deer and other animals, has been reopened after a winter vacation.

During the several months the park was closed, the owners, Myrtle Tally and Mr. and Mrs. Russell Hamilton, added a number of new attractions to its Mother Goose Land portion.

Hamilton carved miniature wooden animals, while Miss

Tally and Mrs. Hamilton painted them.

Mother Goose Land now features an archway decorated with nursery rhyme characters, Jack and the Beanstalk, Red Ridinghood's house, and Goldilocks and the Three Bears among others. This year, peacocks and rabbits have been added and there are monkeys and baby goats to be hand fed along with the deer.

Located 1½ miles south of Cave Junction on the Redwood Highway, the park is

said to be the only one of its kind on the Pacific Coast. Some 40 deer are kept there. One lawn has arrived this year and more are expected. The park offers special rates to school classes, Brownie, Cub and Boy Scout groups.

A picnic area, entered through the building instead of the park this year, can be occupied at any time. Food, film and souvenirs also are available.

Persons wishing additional information may write Hamilton at Kerby, or Miss Tally, at the Woodland Deer Park, Cave Junction.

Certificates Given During Institute

White City—Division and service chiefs were given certificates by Dr. Elmo Stevenson, president of Southern Oregon college, at the completion of the Management Institute course last week. The Institute was started a year ago through an arrangement with the Oregon state system of higher education, to explain various trends in administrative procedure. The course was directed by the faculty of Southern Oregon college, Ashland. Eight lectures were held under supervision of Dr. Epsy McGill, assistant to Stevenson. Communications, delegation of authority in management, and organization, were among the topics discussed. Dr. Stevenson at the final meeting reviewed the work and made recommendations.

Newspaper Advertising Hits the Mark with a Large and Constant Audience

There's nothing hit-or-miss about the newspaper audience—it's a constant audience that varies little throughout the year. That's because newspaper circulation remains constant with little variation from month to month. There is no summer slump in newspaper reading habits. Furthermore, readers can pick their own time—day or night—to enjoy the paper. And they do—over 107,000,000 of them every day in the U. S. For sure-fire results, advertise consistently in the daily newspaper.
