

Graham Calls for Christians to Gird Themselves

Chicago - (UPI) - Billy Graham told the biggest crowd thus far in his Chicago crusade Friday night that Christians must gird themselves with discipline to battle the "giants" of the '60s.

Graham, speaking to an estimated 55,000 persons in Lakefront McCormick Place, drew the theme for his sermon from the story of David and Goliath.

"Today we face many giants, such as communism, the hydrogen bomb, racial tensions, economic pressures and moral deteriorations. The church faces giants such as indifference, unbelief, prayerlessness, hypocrisy, lack of courage. Youth faces such individual giants as bad temper, jealousy, carelessness, conformity, disobedience, laziness, selfishness, doubt, sex, vocation, marriage, temptation," the evangelist said.

"These are the giants that we face in our lives every day."

Graham said to conquer these "giants" Christians must discipline their minds, emotions, instincts, bodies and tongues.

"To be a true, effective disciple of Jesus Christ, we must seek to discipline our lives and endeavor to walk as he walked," Graham said.

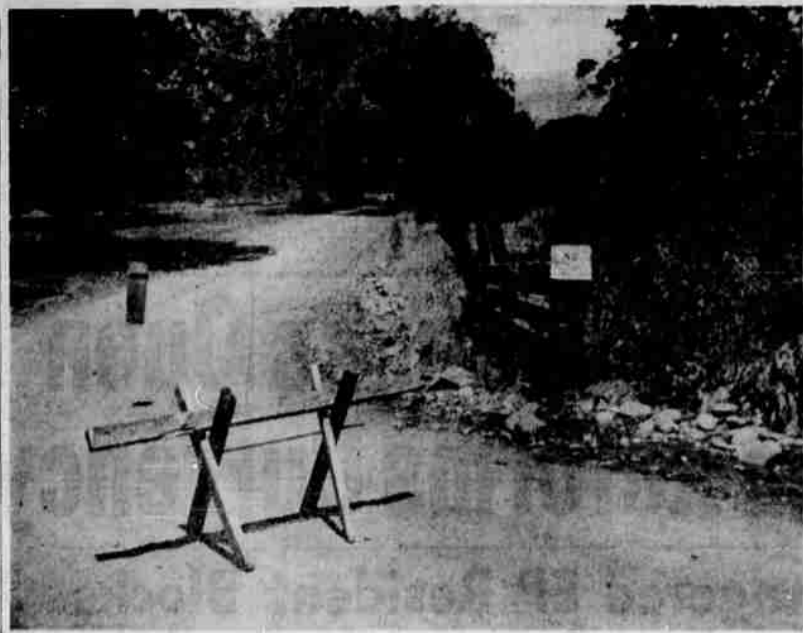

"We need a revival of Christian example."

Following Graham's message, 1,357 persons made "decisions for Christ," bringing the total for the first 10 days to more than 8,400. The night's gathering brought attendance for the crusade, which ends June 17, to almost 330,000.

Geographic Names Board Sets Meet

Astoria - (UPI) - The Oregon Geographic Names board meets here next Saturday to discuss official names for lakes, creeks, and mountains in several counties.

The board is an official state agency operated by the Oregon Historical Society. It has no power to change names by itself but its recommendations are usually accepted by

EAGLE POINT BLOCKADE-Mrs. Margaret Peachy of Eagle Point believed this portion of B st. was her property, and so she had this blockade erected Friday to keep the public out. Blocking the road were two strands of barbed wire and a saw horse. The street constitutes the only road into

the new Eagle Point Scout - Community building, a \$40,000 project erected through volunteer labor and donations by residents of the community. Saturday afternoon, city officials removed the blockade. See story on Page 1-A.

Measures to Help Growing Urban Areas Are Drafted

Salem - (UPI) - Five proposed pieces of legislation to help urban areas out of a growing population straitjacket have been drafted by legislative counsel by request of the Legislative Interim committee on local government, a spokesman has announced.

One of them would make the state pay for relocation of facilities acquired for highway purposes. At present, the State Highway department doesn't have to pay for such relocations if it doesn't want to. And it hasn't been doing it lately, making a number of local service districts sore.

Was Vetoed
A similar bill passed the U. S. Geographic Names board.

Phil Brogan, Bend newspaperman, will preside. Members of the board have been invited to attend the Friday evening banquet of the Oregon Newspaper Publishers association convention at Gearhart.

1961 Legislature but was vetoed by Gov. Mark Hatfield. He said SB-510 was unconstitutional.

The interim committee, which will make recommendations to the 1963 Legislature, is considering a new version of SB-150 thought to meet the constitutional objections.

The five bills are in tentative form, all based on recommendations to the nine member committee made by executive secretary Richard Kennedy, Eugene, in May. Kennedy made 12 recommendations, none of which the committee has adopted yet, including the five in bill form.

Clearer Picture
Some of the other 12 ideas also are being drafted into bill form so the commission can get a clearer picture of them before making policy decisions this summer.

The other four already in bill form would:
- Extend authority of counties to create tax supervising and conservation commissions, budget watchdog agencies. At

present, only Multnomah county has one because the law applies only to areas of 300,000 or more population.

The committee is thinking about lowering the population requirement to perhaps 50,000 - allowing such counties as Lane and Marion to create such commissions.

- Make it easier for cities to annex.

- Redefine the powers of county courts.

- Provide governmental subdivisions with more latitude in intergovernmental cooperative efforts.

MEASLES EPIDEMIC
Portland - (UPI) - The State Board of Health said Saturday measles reached epidemic proportions in Oregon but that the incidence appears to be subsiding now.

DISTRICT APPROVED
Pendleton - (UPI) - A new community college education district for Umatilla and Morrow counties was approved Friday in a special election.

NASA Looking for New Astronauts

Washington - (UPI) - The national space agency is thumbing through more than 250 applications in a search for five or 10 more astronauts. Among the new crop may be the first American to fly to the moon.

The applications came in response to the National Aeronautics and Space Administration's announcement April 18 listing basic qualifications. The application deadline was June 1, and NASA expects to make its selections next fall.

The armed services supplied 53 of the applications after preliminary screening of

an even larger group of test pilots. More than 200 of the applications came from civilians.

The civilian group, which included many persons patently unqualified, will be screened down to 15 or 20, a NASA spokesman said.

He said the agency will "take a hard look" at about 70 applications, military and civilian, before paring the list down further.

The applicants left after the first screening will be interviewed and given written examinations on engineering and science next month.

After that, the ones still in the running will be given rigorous physical examinations. The selections of the astronauts who will join the original seven will be made, probably in September or October, by Robert R. Gilruth, head of the manned spacecraft center at Houston.

They will join the first seven in the post-Mercury Gemini and Apollo programs, after undergoing intensive training.

The Gemini program calls for astronauts to orbit the earth for up to a week in two-man space craft. Apollo is the project to land men on the moon before 1970.

The first Gemini flights, which will include training in coupling spacecraft and rockets in orbit, will begin late

next year. The first Apollo training flights, orbits around the earth, are scheduled for 1965.
