Ross Youngblood Transferred to Fairbanks District

Ross Youngblood, Medford district manager for the bureau of land management, has been selected to direct the 175 million-acre Fairbanks, Alaska, district.

Russell E. Getty, BLM director for Oregon and Washington, said "the vastness of Youngblood's new job will be much greater than that of a district manager in Oregon."

The Fairbanks district is three times the size of Oregon. Youngblood will be in charge of the land office, cadastral engineering, forestry and range management programs. A million-acre reindeer range also is located in the district. Depending on the season, the area from 50 to 95 employees in the Fairbanks district.

Alaska is now selecting more than 103 million acres granted to it by the federal government in the Alaska Statehood act. The state has the right to choose from the best public lands available; a large part of Youngblood's job will involve administration of the state-selection program in the district.

Youngblood has had 23 years of government service and is "exceptionally well qualified for such a challenging job," according to Getty. As a forestry graduate of Oregon State university, he began his public service career as a foreman and camp boss with the Civilian Conservation Corps in the Medford blaster rust control program.

In 1944, Youngblood was promoted to BLM district forester in the Coos Bay area. He became the Medford district manager in 1957.

"Medford is the largest BLM district in western Oregon," Getty added. "Through keen judgment and outstanding managerial skill Ross Youngblood has made Medford one of the most progressive public land management districts in BLM."

Youngblood and his wife will make their home in Fairbanks, Alaska after Aug. 1.

Valuable Blue Chip Stock Certificates Taken From Vault

New York—UPI—More than \$1 million worth of negotiable blue chip stock certificates have vanished from a leading Wall Street brokerage firm and two men have been arrested trying to peddle some of them, police disclosed today.

District Attorney Frank S. Hogan said there was a "strong indication" the stocks were stolen. Hogan put the value of the stock at \$2 million, but the brokerage house, Bache & Co., said the stock was worth \$1.2 million.

Vanished From Vault

The blue chip issues, including Du Pont, IBM, Polaroid, General Motors and AT&T, vanished from the Bache and Co. vault about three weeks ago, a company spokesman said.

Authorities said the two men under arrest and being questioned were Alan Louis Fisher, 55, and Isidore Goritsky, 41, both of New York.

Fisher was arrested Wednesday in Denver, Colo., and arraigned today before a U.S. commissioner on federal charges that he transported stolen stocks across state lines.

Hogan said Goritsky was arrested on July 2 in the offices of Kesselman and Co., another Wall Street brokerage firm, trying to sell three of the missing 100-share stock certificates valued at an estimated \$60,000.

Certificates Endorsed

H. G. Foster, special agent in charge of the New York office of the FBI, said when Fisher was arrested in a Denver brokerage firm he also was trying to sell three of the stock certificates.

Authorities said the stock certificates could easily be transferred because they had been endorsed to Bache & Co. All of them were in 100-share blocks.

There was no immediate indication from the FBI or Hogan's office of how the stocks disappeared from the Bache vaults.

Firemen were summoned about 9:05 a.m. Water was relayed from a pumper at the Medford Irrigation district ditch to a pumper truck at the fire.

Firemen were shuttled to and from the scene in periodic relays through the day yesterday and last night. Last pumper company returned to the fire station at 6:45 o'clock this morning.

HEARING SCHEDULED

Washington—UPI—The House Interior and Insular Affairs committee will hold a hearing on the Crooked River extension project here next Monday.

NEWS BRIEFS

RUSSIA RENEWS PEACE TREATY THREAT
Moscow—UPI—The Soviet government tonight renewed its threat to sign a separate peace treaty with East Germany if agreement on the German problem cannot be reached with the West.

RESEARVISTS HEAD FOR MAINLAND
Pearl Harbor—UPI—Eight Navy ships headed for the mainland today, carrying nearly 1,000 Navy reservists due for discharge at Seattle, Portland and San Francisco.

HOUSE VOTES FOREIGN AID AMENDMENT
Washington—UPI—The House today gave President Kennedy a major victory by approving an amendment to the foreign aid bill that would allow more U.S. aid to Yugoslavia and Poland if he considered it vital to American security.

STARS FIRED FROM VOLCANOES
Washington—UPI—San Juan volcano in the Andes 7,000 feet high has been reported to have erupted again today, spilling lava and ash.

Hatfield Calls Iron Workers, Contractors for Friday Talks

Session To Last Until Settlement

Salem—UPI—Gov. Mark Hatfield today called a meeting of contractor and iron worker union representatives in his office here at 9 a.m. Friday and told them in telegrams to expect to stay in session until the iron worker strike is settled.

The governor issued the call as the Oregon dispute today equaled the longest construction strike in the state's history, 46 days.

That was last year's strike by Local 701 of Hoisting and Portable Engineers, tentatively settled on its 46th day after a marathon negotiating session in Hatfield's office.

Hatfield said this morning that Federal Mediator George Walker will be on hand in his office Friday morning. Walker earlier said talks, recessed two weeks ago, would resume in Portland Friday.

Hatfield sent telegrams late this morning to John O'Halloran, business representative of Iron Workers Local No. 29, Portland, and to Jack Cullinan, chairman of the negotiating committee for the Associated General Contractors.

Hatfield said that in telegrams he received Saturday from the iron workers and the AGC, both indicated a willingness to attend such a meeting.

Hatfield set the time and date, and he said he expects acceptance.

Hatfield noted the texts of the telegrams he had received from the disputants.

Desire Indicated

O'Halloran's telegram said "we are willing to meet you in your office or elsewhere as I indicated to you in our conversation June 27."

A telegram from A. H. Harding, Portland, of the AGC, indicated a similar desire on the part of the AGC and asked Hatfield to call both sides into federal mediation.

Last year's strike, which stalled construction projects worth half a billion dollars, was officially ended eight days after the tentative agreement when the new contract was signed by both sides.

Transatlantic Telephone Call Via Telstar Set

Test Patterns To Be Exchanged

New York—UPI—Telephone officials scheduled the first regular transatlantic phone call by means of the Telstar satellite Friday following an exchange of television test patterns between the United States and Britain and France tonight.

U. S. Telstar authorities planned to transmit test patterns to the British and French ground bases during Telstar's 24th and 25th passes over the Atlantic this evening.

No Network Screening

Since only test patterns will be used, none of the three U.S. TV networks is expected to pick them up for home screens.

The first long distance phone call via satellite is planned for Friday evening between New York and Paris.

British and French television authorities were elated by the success of their broadcasts Wednesday night which brought a taped French night club entertainment and a live British transmission into millions of American living rooms.

But Dr. Eugene O'Neill, program director of Telstar, said nothing like this is in store tonight. If the two-way calls enjoy the same success as Wednesday night's near perfect French and English television transmissions, the telephone conversations should sound as clear as local calls.

O'Neill conceded the success of Wednesday night's tests, by which Americans saw an eight minute show from France during the Telstar's 15th orbit and a British program during the 16th pass over the Atlantic.

Showed Paris Scenes

The French show, taped in Paris and transmitted from Pleumeur-Boudou, gave Americans views of Parisian street scenes and treated them to a rendition of "La Chansonette" by Yves Montand, once linked romantically with Marilyn Monroe, plus a ballad by chanteuse Michelle Arnaud.

The British Broadcasting Corp. reacted with an angry charge that the French had violated an agreement for a later broadcast by the 16-nation Eurovision group. A London newspaper accused the French of "gallic one-upmanship." Not to be outdone, the Britons rushed their own program into shape for the next orbit.

At 6:18 p.m. (PST) they hit the whirling satellite and beamed their own program across the Atlantic, proudly noting that it was "live." It consisted principally of a panel discussion by three officials who stayed up past midnight, British time, to outdo the French.

2,635 People Get Sabin Vaccine

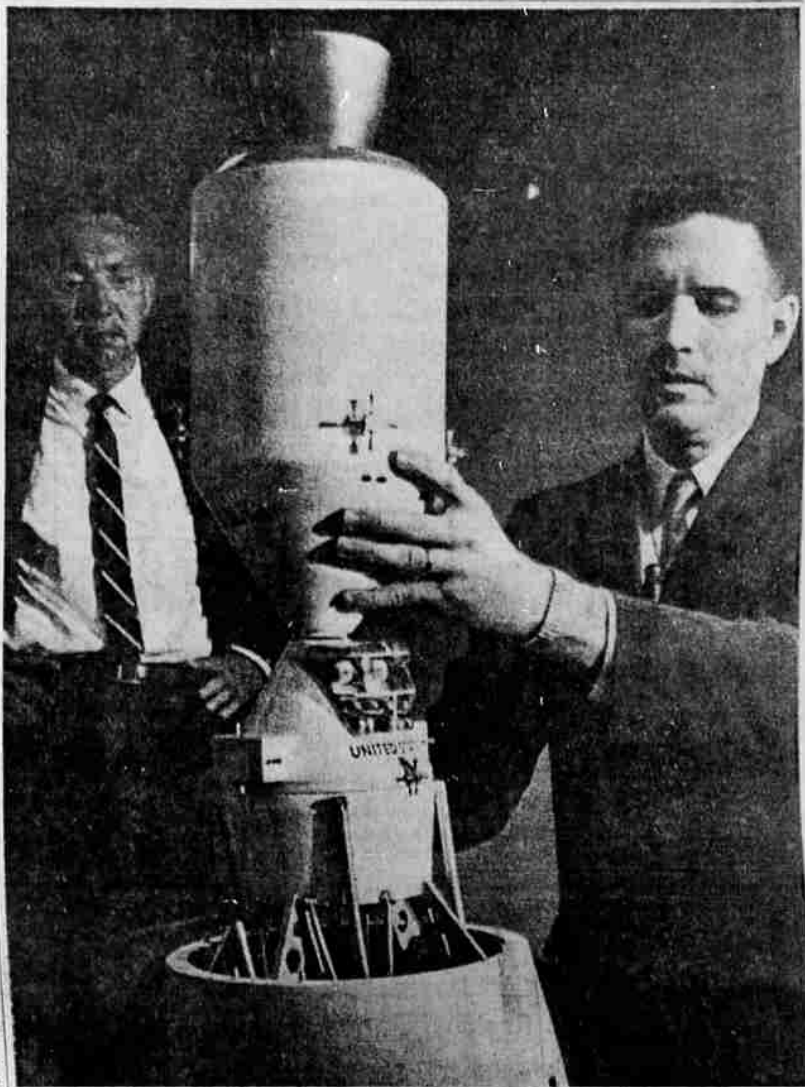

A total of 2,635 individuals received Sabin vaccine Type I at the makeup clinic Wednesday, according to Dr. A. Erin Merkel, Jackson county health physician.

Of those who received the vaccine yesterday, about 700 started their series at the clinic, he said. To date a total of 46,266 individuals in Jackson county have received Type I polio vaccine.

In the previous clinics 42,933 persons received the Type III vaccine.

Jackson county has an estimated population of 76,523. With Wednesday's makeup clinic, approximately 60.5 per cent of the population has received at least one in the series of three Sabin vaccine types.

Dr. Merkel said Jackson county has the highest percentage of participation in the program of any Oregon county.

MOON TRIP ON TAP - Dr. Joseph Shea of the NASA office of manned space flight, demonstrates components of the space ferry that will be used to put men on the moon, at a press conference in Washington. The technique is called lunar orbit rendezvous. LOR. An excursion vehicle, center, will land two astronauts on the moon while a third remains in lunar orbit in a mother ship, top. The launching vehicle will be a Saturn 0-5.

bottom, partly shown. At left is Manned Space Flight Director D. Brainerd Holmes. Original plans called for landing three men on the moon before 1970. But NASA said the two-man plan promises "success some months earlier" with a saving of 10 to 15 per cent over the cost of the three-man plan, estimated at between \$20 and \$40 billion. (UPI)

Increased Traffic Recorded Along Two Highway Routes

About 5,000 more cars daily are using Highway 99 through Medford this year than in 1961, statistics taken in June and July by the Medford engineering department show.

An increase was noted in the northbound travel over southbound travel, which in some cases was reversed last year.

Since vacation time and the opening of the Seattle World's Fair, increased tourist trade has been noted in Medford.

On Riverside ave. near Barnett rd. 21,270 cars were counted June 18 compared to an average in that area in 1961 of 16,500 cars daily.

Other Riverside Areas

Other areas on Riverside ave. for only northbound traffic between Jackson and Ninth sts. showed an average on July 2 of 14,726 cars compared to 12,480 vehicles daily in the same areas in 1961.

Southbound traffic on June 20 between 10th and 12th sts. on Central ave. totaled 11,584 vehicles, up nearly 2,000 cars from the 1961 daily average, while northbound traffic on Riverside ave. in the same area totaled 12,180. This was slightly more than 3,000 more vehicles than the 1961 daily average.

Medford Engineer Vern Thorpe stressed that the increased number of vehicles will mean longer waits at traffic signals in spite of the

Facility Planned

Longview, Wash.—UPI—The Weyerhaeuser Co. today announced construction of a new \$800,000 engineering and maintenance facility here.

Dog Survives Ordeal Of Rescue From Well

"The dog survived the ordeal," city firemen reported today.

Firemen were called upon yesterday morning to rescue a dog which had fallen into a shallow unused well under the residence of Mrs. Betty C. Brown, 930 North Ivy st.

They recommended the hole be filled.

Hatfield Endorses Hanford Proposals

Salem—UPI—Gov. Mark Hatfield today "firmly" endorsed proposals to add power generating facilities to the Hanford, Wash., atomic plant.

Hatfield said generation of electricity at Hanford would not only increase energy available to the Northwest power pool, but would help Bonneville Power Administration "in its struggle to maintain its present rate structure."

Hatfield's support was announced in a letter to Sen. Maurice Neuberger (D-Ore.) and a telegram to Rep. James E. Van Zandt (R-Pa.), of the Joint Atomic Energy Committee.

Sen. Neuberger last week asked Hatfield to declare himself in support of the Hanford legislation.

GETS PRISON TERM

Portland—UPI—William Horace McGowan, 33, Portland, was sentenced to 29 years in prison Wednesday for violation of federal narcotics laws.

Commission Questioned About Phoenix Zone Area

A question and answer session between members of the Jackson county planning commission and residents of the southwest Phoenix interim zoned area turned out to be the principal business at the monthly meeting of the commission last night.

Originally scheduled on the commission's agenda as a discussion among commission members concerning changes in the proposed development pattern for the zoned area, C. O. Lovejoy, commission president, invited questions and comments from the audience of about 20 southwest Phoenix area residents.

A public hearing off the proposed development pattern for the area was held last night at the commission's monthly meeting.

The majority of the residents who spoke at last night's meeting could not pinpoint why they were opposed to zoning.

Also present at the session was Orle Moore, county sanitarian, who was questioned by some of the members of the commission.

He said the commission was not planning to change the zoning pattern for the area.

The commission's decision on the zoning pattern for the area will be made at its next meeting.

Several Lightning Fires Reported From Area Storm

Several small spot fires were started by lightning on state protected and forest service land as a result of yesterday afternoon's thunderstorm.

Robert H. Torheim, fire control officer for Rogue River National Forest, said that crews were working on four small lightning fires. Heavy rain in some areas accompanied the storm and reduced the fire danger, he said.

Two small fires were reported in the Little Applegate area located in the Ashland district. In the same district, a reconnaissance plane spotted a fire on the side of Brown mountain this morning.

Another fire was reported yesterday afternoon on the South Fork of Big Butte creek in the Butte Falls district, Torheim said.

Expect To Find More

Torheim said he expected to find several "sleeper" fires today resulting from thunderstorm activity.

State forestry department spokesmen said lightning caused four small fires on state protected property. At 1:30 p.m. Wednesday a spot fire was discovered in the Applegate area. Two others, one about an acre in size, broke out in the Agate Flat area, and a fourth fire was reported in the Chiniquap area.

Another fire was reported near Table mountain look-out, but firefighters had not reached the area by this morning.

With cooler temperatures predicted, the forest fire danger tomorrow is forecast as "moderate."

Standard Oil Plans To Drill Off Coast

Portland—UPI—A second oil firm said today it will start oil exploration off the Oregon coast.

Standard Oil launched explorations off the Washington coast and said its boat would move south off Oregon later this summer. Shek already is exploring off Oregon.

NAMED OSU DEAN

Corvallis—UPI—Dr. Edmund H. Volkart, 42, Stanford University sociologist, has been named dean of the School of Humanities and Social Sciences at Oregon State University.

WEATHER

FORECAST: Fair through Friday. Northern valley breeze in afternoon 12-14 miles per hour. Low tonight 46-52. High Friday 64-84.

Our Skies Tonight

Sunset today 7:45 p.m. Sunrise tomorrow 4:44 a.m. Moonset tomorrow 1:43 a.m. Full Moon July 17. Tonight the planet, Venus, passes about a degree north of the star, Regulus. Later in the month Uranus will pass even closer to Regulus.

\$15.8 Million Is County's Income

Jackson county had a total cash income during the 1961-1962 fiscal year of \$15,823,922.85, according to County Treasurer Karl Janouch.

Total disbursements during the year were \$13,562,827.05 for a cash balance June 30, 1962 of \$2,236,095.83. This amount is for operating expenses for all 45 taxing units within the county, including the county government.

Janouch explained that of the income, \$7,332,297.61 was received from all taxing units during the year. The remainder was received from miscellaneous sources.
