Macmillan Planning Changes in Cabinet London—(UPI)—Prime Minister Harold Macmillan plans important changes in his cabinet in the next few weeks, reliable political sources said Thursday. These sources said the changes probably will come about before Parliament quits for the summer recess at the beginning of August.

MISSED RIGHT TURN Cardiff, Wales—(UPI)—Bill Blakey, 55, missed a right turn so many times while driving his wife to Newcastle that she finally ripped a road map into tiny pieces and scattered it along the highway. The couple now is in receipt of a letter from the local council accusing them of violating Cardiff's anti-litter laws.

HIRE MORE SCIENTISTS Washington—(UPI)—The number of scientists and engineers employed in American industry increased by about six per cent between January, 1960, and January, 1961, according to the U.S. Labor Department. A preliminary report of a survey by the Labor Department's Bureau of Labor Statistics and the National Science Foundation showed 850,000 scientists and engineers employed in industries within the scope of the survey during January, 1961. Nearly half worked as chemists. A total of 19 Nobel prize winners are on faculties of California institutions, more than any other state.
