

APPOINTED — Mrs. Kathryn J. South has been appointed assistant secretary of the Jackson County Federal Savings and Loan association. The appointment was made at the last board of directors meeting. Mrs. South started with the firm in 1952, serving in the bookkeeping and teller departments. She is now in charge of the savings department.

Stock Exchange Shows Belief in Volume Increase

New York — Trading volume on the New York Stock Exchange may not have seemed high recently, but some improvements in the trading data information service announced by the exchange reflect the firm belief of exchange officials in increased daily volume as the years pass.

The number of shares traded on the exchange has been averaging about 3.8 million per day in 1962. After the tremendous volume of the last of May and the first of June, big trading days have been scarce.

Yet, exchange spokesmen have long felt that they must gear for the rapid, accurate reporting of trading information at a time when share turnover of 6 and 7 million a day will be commonplace. They believe, despite the recent relative quietude of the market, that these days are not too far distant.

This is part of the thinking which was behind the NYSE announcement of a computer system, prepared for the exchange, which will automate the distribution of trading information by early 1965.

Adequate Vocabulary
The system will run the stock tickers; it will "speak," with a limited but adequate vocabulary, to member subscribers to the NYSE quotation service. A high speed access-switching system will tie the computer center with the direct private lines of the service.

Previously, Exchange president Keith Fuston had announced plans to put into service by early 1964 a new tape printer capable of speeds up to 900 or perhaps 1,000 characters a minute. At the 800 rate, this would be about 80 per cent faster than the present model; it would run at a rate of about 150 words a minute. The new computer service, designed to speed the recording of transactions right from the floor, would be effective about a year later.
