Small Worlds Around Us

By LYNN M. WATKINS (Register and Tribune Syndicate 1962)

Who First Had Nerve to Eat An Oyster? Hungry Fellow Neither history nor tradition gives us the faintest idea...

Thousands of bivalves open while drinking in sea water while drinking in sea water...

We found, along in the night sometime, we could stop the noise by yanking on the anchor rope...

The early American Indians knew about the eating qualities of oysters. They had a decided advantage over us...

Actually the oyster is just as good to eat in June as in September. But maybe it's just as well that the old superstition is still in operation...

Many other gourmets have found these succulent "shellfish" very good to eat. But they have natural enemies...

Of all the oyster's enemies, with the exception of water pollution, the greatest enemy is the starfish. Of course the starfish is no more a fish than an oyster is a "shellfish"...

Weather FORECASTS Medford and vicinity: Partly cloudy this evening...
