Agreement in Newspaper Strike Claimed Reached

New York — UPI — Labor Secretary W. Willard Wirtz today announced an agreement has been reached to end the seven-day old strike against the New York Daily News.

Terms of the settlement must be approved by members of the Daily News unit of the New York Newspaper Guild (AFL-CIO).

A guild spokesman said picket lines will be maintained at the News until the entire membership votes acceptance of the proposed agreement.

A statement by Wirtz was read to newsmen by John W. Leslie, deputy assistant secretary of labor shortly before 4:30 a.m. (EST). It followed a marathon negotiating session at a Manhattan hotel.

The statement said, "The union has received a proposal from Secretary Wirtz and the federal mediators which if ratified by the guild will be accepted by the Daily News. It has been further agreed that the contents of the proposal will not be made public until presented to the membership of the News unit."

F. M. Flynn, president and publisher of the Daily News, commented that he hoped the News would resume publication at "the earliest possible moment."

"We are very pleased with the way things are going up to now," Flynn said.

Thomas J. Murphy, executive vice president of the New York Newspaper Guild, asked if terms of the agreement were satisfactory, said: "They are never satisfactory enough, but I wouldn't be bringing it back to the members if I was not optimistic."

Murphy said he hoped to present the proposals to the News guild unit council by this afternoon and have a discussion on them completed in time for a vote by guild members by tonight.

Nut Gathering Not 'Hard Winter' Sign

Corvallis—When squirrels gather and store seeds and nuts earlier than usual, it doesn't necessarily mean a "hard" winter.

Dr. Robert M. Storm, Oregon State university zoology professor, reports there is no scientific basis for saying early nut collecting by squirrels means a severe winter.

Squirrels hide their winter food in many caches and sense them out when needed. Research by others, Dr. Storm said, shows that squirrels don't use more than 10 per cent of the food they store.

Officer Gives Tips To Drivers When Stalled on Road

Drivers were urged today to be alert for mechanical trouble in their vehicles and when trouble strikes on the road, the driver's first thought should be to get out of the stream of traffic, according to Chief of Police, Charles P. Champlin.

"The driver who stops in a stream of traffic for any reason is all too likely to get clobbered. Or some other driver may swerve to avoid him and get in an accident. In either case, the driver of the stopped vehicle has set the stage for an accident," Champlin said.

Champlin pointed out that a driver should be sure to get far enough off the road so that he can get out of his car and move around it without himself being vulnerable to getting clipped. Two people have died recently in Oregon under just those circumstances.

Leave on Lights
He advised drivers stopping at night to either leave their parking lights and tail lights on or turn on the dome light inside, and he warned them against standing in a position where they obscure the lights.

"On city streets, you should get over as close to the curb as possible in case of trouble," Champlin suggested. "If you do much driving at night, you should carry a flashlight; and if you are on the open road often, carry emergency warning devices," he concluded.

Thank You for giving us another chance.
The last Sunday in October a great many of us came to church to pray for peace.
We felt that we were standing on the brink of disaster, and we turned to You because there was nothing else we could do.

We asked You to guide our President... to give him wisdom, courage and prudence. Some of us also put in a word for Khrushchev, because we believe that even he is not beyond Your reach.

Anxious to Forget
When we got home from church, we learned that Khrushchev had agreed to dismantle those missile bases in Cuba. This news was an unspeakable relief, and no formal words of gratitude now can add much to the first fervent "Thank You" that escaped from our hearts.

But we are weak and worldly children, Father, as you know only too well. Now that the immediate danger is past, we are very anxious to forget the whole business, and get back to our little private concerns.

FOOD IS A BARGAIN

Please give us the grace not to do that.
Help us this time to remember how eager we were to say, "Thy will be done."
Help us to remember that if Your will is to be done in this world, it must be done through us, and by us.

Love to All Mankind
Grant us the self-discipline to seek Your will as earnestly in periods of relative peace as we seek Your intervention when the awful shadow of war falls too plainly over our every-day lives to be any longer ignored.

Grant us the humility to recognize that Your love extends equally to all mankind, and that You are not solely concerned with preserving the security and prosperity of Your children in the United States of America.

Make us mindful of the needs and fears of others, and help us to seek peace with justice for everyone, and not merely for ourselves.

Grant us the wisdom to devote our time, energy, ingenuity and substance to projects that will put peace on a firmer foundation, as well as to

maintenance of military power to prevent or resist aggression.

Grant Us Faith
Guard us from the ever-present temptation to become as cynical, ruthless and materialistic as the atheistic system which confronts us.

Forgive us for all of the times and all of the ways in which we have failed in the past to live up to our claim to be "a nation under God."

principles. And when the next crisis comes, grant that we may be able to face You with a little less shame than usual, and say once again:

"Thy kingdom come. Thy will be done on earth, as it is in heaven."

INFORMATION CUPS

New York—(AP)—Caterpillar Tractor company is using paper cups dispensed by its plant vending machines to plug benefits to workers. The cups carry messages on the firm's pension, retirement and hospitalization plans.

Strange Germ May Attack Geraniums
College Station, Tex. —(UPI)—If your geraniums are the victims of a strange germ, the Texas A and M extension service suggests a check for the hard-to-diagnose verticillium wilt disease.

Dr. Harlan Smith, plant pathologist, said the disease is often confused with bacterial rot and plants are thus treated for the wrong condition.

Like motorists, some species of ants install anti-freeze in the winter, generating alcohol in their bodies to cope with the cold weather.
