HEAT YOUR HOME THE BEST WAY AND SAVE MONEY TOO!

The cost of heating your home or place of business is not told entirely by the price you pay for fuel. For example, look at a few money-saving advantages of using ELECTRIC ENERGY rather than burning fuel:

Electric Heat requires no vents for smoke and messy flame byproducts, so no heat is wasted up a chimney or flue.

Flameless Electric Heat is as clean as sunshine . . . helps cut down cost of cleaning walls, furniture, fixtures, and consumes no oxygen!

Electric heating systems are simple and efficient . . . create fewer maintenance, repair, and cleaning costs to add to your heating bills.

Electric Heating systems cost less to install than most flame-type systems.

AND NOW THIS SPECIAL MONEY-SAVING BONUS:

Until December 1, Cal-Ore Electrical League heating and wiring contractors are authorized to allow you a special wiring bonus allowance of \$6.00 per kilowatt of installed heating capacity! For many home owners and business people, this can mean

A MINIMUM SAVING OF \$90.00 OR MORE!

IMPORTANT: Get complete details from your contractor before installation.

(Ask him, too, about the Wire-On-Time Plan)
