HOW TO SAVE ON TAXES

The New 1962 Tax Form

When you begin to fill out your individual income tax Form 1040 for 1962, you'll notice it is the now familiar one-sheet, two-page return. But as was the case last year, millions of you again will find that you must fill out much more than the basic two-page form.

You should have this information in mind now so you can get the extra forms you will need in plenty of time to study them carefully, fill them out properly and make sure you pay what you owe, but not one cent more than you owe, on your 1962 income.

If you received dividends, interest, pensions, rent or other types of income, you will have to fill out and attach to the two-page Form 1040 a separate two-page Schedule B, entitled "Supplemental Schedule of Income and Credits."

Of course, if you sold stocks, bonds or other property in 1962, you will, as in past years, have to complete and attach Schedule D.

If you had income from a business or profession, you will have to complete Schedule C, and farmers are expected to fill out a Schedule F.

If you received "sick pay" from your employer while home because of illness during 1962, the Treasury would like Form 2106 from you.

If you paid and deducted the medical expense of a parent, the Treasury would expect you to fill out Form 2948.

If you drove a car on business or incurred travel or entertainment expenses, Form 2106 is waiting for you.

If you owned shares of a mutual fund which didn't distribute its long-term capital gains, you probably will be involved with Form 2439.

If you are a widow or widower claiming a child care deduction, you would fill out Form 2441.

If you sold your old home at a profit and brought a new one, the schedule for you is Form 2119.

For millions of us, the form hardly will be the one-sheet, two-page return which it is claimed to be. Nevertheless, the 1962 form has cleared up an important ambiguity which existed in last year's 1961 form. This involves Line 5, covering dividends, interest, rents, royalties, pensions, etc.

On last year's return, if you had \$200 or less of interest and dividends and no other kind of income to report on this line, you did not have to give details of your interest and dividends on separate Schedule B. This was confusing because it left up in the air the question of how and where you should compute the \$50 dividend exclusion and the 4 percent dividend received credit.

Now Line 5 of Form 1040 for 1962 has three separate subdivisions: 5a-dividends; 5b-interest; 5c-rents, royalties, pensions, etc. You must supply the details in Schedule B (or on a separate list if you had only interest income and wages) regardless of the amount in each category. This required use of Schedule B will automatically eliminate the confusion which bothered many of you in handling dividends properly on your return for 1961.

The simple card Form 1040A still is available to you if your gross income was less than \$10,000 last year, consisted only of wages subject to withholding and not more than a total of \$200 of interest, dividends (over the \$50 dividend exclusion) and wages not subject to withholding.

But even if you qualify to use Form 1040A, millions of you probably will pay less tax by filling out the more detailed Form 1040.

You would pay less tax by using Form 1040 if your actual deductions total more than 10 percent of your income, or if you received exempt sick pay while home from work because of illness or injury, or if you are entitled to the dividends-received credit, or if you are entitled to the retirement income credit, or if you are entitled to the special tax break for head of a household or widow or widower. If any of these "ifs" apply to you, do not use the simple card form.

Next: Important changes on the 1962 form you must know.

WALTER BRADY offers this addition to the Sherlock Holmes saga: The good Sherlock observed one A.M. "Ah, Doctor Watson, still wearing your winter underwear, eh?" "Incredible," marveled Dr. Watson. "How do you deduce that?"

"Elementary, my dear doctor," said Holmes. "In the first place, you forgot to put on your pants."

(Incidentally, Mickey Spillane, one of the Johnny Come-Latelys who put Sherlock Holmes into the ranks of also-rans in the paperback whodunit sweepstakes, has now been displaced as champion himself by Ian Fleming.

How the kids are lapping up Fleming's action-jammed stories of Operator James Bond?)

From the notebooks of the immortal Will Rogers: "In the early days of the Indian Territory, there were no such thing as birth certificates. You being there was certificate enough."

"I had just enough white man's blood in me to make my honesty questionable."

"Once you are a showman you are plum ruined for manual labor again."

"Being a front-page hero is about the shortest-lived profession on earth."

(Referring to Calvin Coolidge): "He was the first President to discover that what the American people want most is to be left alone."

(When he was named Honorary Mayor of Beverly Hills): "I've never seen a Mayor who wasn't funny—and when he puts on a milk hat, he's even funnier. What this country needs is more ex-mayors."

Eye Banks

Thousands of persons have been telling their nearest of kin that in case of their death, they want their bodies or parts of their bodies to be used for helping their fellow men.

One of the most wonderful ways of doing this is to have the eyes quickly removed by an expert and then used by eye surgeons, who will re-plant the cornea, or clear from window of the eye, onto the eye of a person who, perhaps because of an ulceration or a burning injury of his cornea, has lost his vision. With a new cornea, many a blind man can see again.

I recently received a letter from a woman whose husband dropped dead a month ago. Now she tells me she feels happy because she has heard that her dear husband's corneas were transplanted onto the eyes of two blind people who are now seeing well—they are seeing through her husband's eyes. This makes her grief somewhat less than it was before.

Another woman writes that she is happy because she did what her husband asked her to do just before he died: he had for a long time suffered from a severe form of Meniere's disease and so he wanted to bequeath his temporal bones on each side of his head to some expert ear specialist. These bones contain the hearing apparatus. The man was so kind and helpful because we doctors know too little about what takes place in the inner ears of people with Meniere's disease. We are not sure what causes the spells of great dizziness and perhaps nausea and vomiting. Hence it is that we are glad when we can examine the inner ears of a patient who has just died of perhaps a heart attack. No one, so far as I know, ever dies of Meniere's disease.

Many public-spirited people today are telling their nearest of kin that when they die they want their body turned over to the anatomy department of the nearest medical school.

I say, "Blessings on all these good people, and on the kind relatives who carry out their wishes." The people who want to leave their body or some part of it for scientific purposes should not depend on expressing their desire.

They can do this by filling out a form and giving it to their nearest of kin, or to a friend, or to a doctor, or to a nurse, or to a hospital, or to a medical school, or to an eye bank, or to a heart bank, or to a kidney bank, or to a liver bank, or to a lung bank, or to a pancreas bank, or to a spleen bank, or to a stomach bank, or to a small intestine bank, or to a large intestine bank, or to a
