

**Computer Predicts
Spaceship Failures**

Minneapolis—UPI—When men begin flying to the moon and beyond their spaceships will need test equipment and spare parts on board so repairs may be made in space. Minneapolis-Honeywell already has fabricated a computer that can tell not only what spaceship systems have broken down but can also predict an impending failure in advance.

Billiards for Women Becoming Popular Game

Philadelphia—UPI—The fabulous little guy who has spent most of his life in pool halls has decided to get the ladies interested in knocking the ivories around. Willie Mosconi, one of the greatest billiard experts who ever lived, has established Willie Mosconi enterprises primarily to lure the female of the species into one of the last refuges for men only.

Mosconi's idea has two parts: first, attractive billiard centers—not, please, pool halls. Second, a handicapping system that will put the duffer on a competitive level with the expert (formerly known as shark). Mosconi will franchise Willie Mosconi Billiard centers, each to be built to his specifications and featuring specially loomed carpeting and an attractive color scheme in addition to custom-made colorful equipment.

The handicapping system, which still is in the final development stage, will let the beginner—or lady—compete with the skilled player. It is hoped it will foster billiards as a husband-and-wife sport, something along the order of bowling. An added attraction will be

Mosconi, of course. Willie will tour his franchised billiards centers giving exhibitions and pointers on how to play the game. Mosconi, 48, was born in South Philadelphia. He gave his first exhibition match when he was 7 years old. Normally this would indicate a misspent life, beginning early. But in Mosconi's case, it meant that a top athlete simply began practicing early and developed a natural talent

to the point where he won his first tournaments while still in his teens and was competing with the championship-calibre professionals when he was only 18 years old. He has held the world's title for 15 of the last 18 years, and holds the record for scoring a high run of pocketing 526 straight balls, beating his own previous record of 365. Almost 70 per cent of Georgia's area is farm land.

Food Staple Had Humble Beginning

Ithaca, N. Y.—UPI—Families may plan to shop twice a week for food, but they generally make three trips to the market. That's the finding in a study of 100 local families, directed by Prof. Kathryn Walker, of the New York State college of home economics at Cornell university. The survey also showed that shopping time, including

planning, transportation and putting the groceries away, averaged 3.4 hours a week. The range was from 2.8 hours for families of two to four hours for families of five or more. Another point reported was that a family with income of more than \$7,000 spends about an hour less shopping time than families in the \$3,000—\$4,999 income bracket.

POPULAR BIBLE
Washington—UPI—The Holy Bible has been translated into at least 1,181 languages and dialects, and 300 new translations are under way, according to the National Geographic society.
