SARAKA SOLVES THE PROBLEM OF "AFTER 45" IRREGULARITY

Doctor-approved bulk stimulant helps keep you comfortably on schedule as no ordinary laxative can!

As we grow older, our systems may often need outside aid to help maintain a normal regularity pattern. Continued use of strong drug laxatives can be irritating, even dangerous. That's why many doctors recommend SARAKA, the pure, all-vegetable bulk stimulant laxative for middle age and over. SARAKA supplies the moist, bland bulk that is so essential to healthy bowel function. And only SARAKA has a gentle stimulant action to help ease this bulk through your system plus Vitamin B₁.

Special note to weight watchers: Lack of sufficient bulk in 900 calorie liquids can lead to constipation. If this occurs, supplement your daily diet with all-vegetable SARAKA.

FEET HURT?

Cut This Cushioning Foot Plaster To Right Size, Shape For Fast Relief!

EXTRA PROTECTION WHEREVER FEET HURT! When shoes pinch or rub, cushion feet with Dr. Scholl's Kurotex. Thicker, softer, more protective than ordinary moleskin—yet costs no more. Easy to cut to right size, shape. Fast relief for corns, calluses, tender spots. Self-adhering. 19¢, 40¢, 50¢, \$1.15.

I Cheated Death ON THE Killer Mountain

By **DONALD OSMOLAK**

as told to Charles and Bonnie Remsberg

AS WE CLAWED and chopped our way across the glaring ice-cap of Mexico's Mount Popocatepetl, I remembered with a chill why the natives called it the Killer Mountain.

Seven other climbers already had perished on the smoky volcano that season—and there had been warnings that the three of us also were playing Russian roulette with fate.

Twelve hours after leaving our overnight camp, we discovered that we had strayed from the "easy-to-climb" trail up Popo's east side and were instead on the rugged and treacherous north face.

It was a route far too hazardous for

novice climbers like us. José Garza, a fellow student at Mexico City College, who had agreed to be our guide, was the only one with real climbing experience. My other companion, Don Hartman, had explored mountains in his native Tennessee, but they were molehills compared to Popo. As for me, at 22 I had never been higher than the top of the tallest skyscraper back home in Chicago. Yet, there we were scrambling up the 17,887-foot Popo—the loftiest active volcano in North America.

Several times that Saturday, Feb. 14, 1960, Hartman and I lost our footing and had begun heart-stopping slides downward. But we had been able to lash our picks into the ground and wrench ourselves to a stop.

Finally, 50 yards from Popo's majestic
