

**Mary's
DULL**

PERIODIC PAIN

Every month functional menstrual distress had Mary feeling dull. Now she just takes Midol and goes her way in comfort because Midol tablets contain: • An exclusive anti-spasmodic that stops cramping • Medically approved ingredients that relieve headache and backache... CALM JUMPY NERVES • A special, mood-brightening medication that chases "BLUES"

NOW!

**RELIEF FROM ALL 5
ACID CAUSED STOMACH
TROUBLES IN SECONDS!**

**Upset Stomach
Heartburn
Gas Pains
Nervous Stomach
Acid Indigestion**

Whether they result from tension or overindulgence in food or drink, Phillips' brings relief from all five stomach troubles—in seconds! For the cause of all these stomach troubles is "excess acidity." And scientific tests show Phillips' starts to neutralize excess acids in seconds! Yet stomach and lower intestinal walls remain completely free to do their digestive work. There's no digestive interference.

So when the fast pace of living gives you one of these stomach troubles, take Phillips'. You'll feel fine in practically no time!

THE CASE OF THE Colored Sea Gulls

These plain-looking birds suddenly have begun sporting flashy feathers as part of a scientific study

PHOTOGRAPHS BY ARTHUR SCHATZ

Beryl Simpson, 20, uses a motorboat to carry crated gulls to a dyeing station.

THE STANDARD PICTURE of the New England Coast includes a starched white lighthouse, a blue-black sea, somber rocks, and a flock of gray-and-white sea gulls.

But recently the gulls have begun to louse up the scene by appearing in feathers of bright green, yellow, red, and blue (see cover).

Behind this startling development is the Massachusetts Audubon Society's new program of trapping gulls, dyeing and banding them, then setting them free again. Since a different color is used for each nesting area, gull spotters now can chart the birds' movements with a good deal of accuracy.

Interest in gulls' habits results from the big birds' population explosion and the problems thus created. One major one: the gulls congregate in large numbers on airport runways and are a hazard to jet planes.

Beryl is one of a dozen college students who worked on the project. Above, she frees a bird after dyeing it. At left, she admires a baby gull she found among the seaside rocks.
