Family Council

Editors Note: The Family Council consists of a judge, a psychiatrist, three clergymen, a newspaper editor, a composer, editor, and two writers...

Lenny R. - If her affair breaks up, I think I'd take her back. Frank R. - If he ever takes back that tramp, it means he likes to suffer.

Lenny R. - Five weeks ago my wife flew to Mexico and got a divorce. She planned to marry a man she met three years ago in the local luncheonette...

Frank R. - My brother talks as though he's shell-shocked. How can a man in full possession of his faculties even consider getting back into the clutches of such a woman?

He stuck it out for 13 years, during most of which his wife was just fishing around for No. Two! She left high school to marry Lenny, and I'm convinced it was because she was falling in her studies...

The Council: "Is there a lawyer in the house?" is the obvious opener for this discussion. Certainly Mrs. R. has one, we hope Lenny has one, and we'd advise Frank to get one if he continues airing those accusations...

Regardless of Frank's opinion and advice, Lenny evinces some real feeling for his wife and children. Perhaps he feels some portion of guilt for the situation...

Please do nothing headlong, headstrong, or rash. Tackle this tangled step-by-step. With the aid of a lawyer, determine whether the Mexican divorce is valid in your state...

Next you come to the long-range prospects. Will this man get a divorce? His wife has set up a stumbling-block - money! And even if he were free, would he still marry your ex-wife...

Our best advice, should this happen, is to say Yes on one big condition: that you both sign up for Marriage Counseling first, so as to learn, at this late date, how much more than mere sexual attraction is required for a real marriage.

West Advises Records Be Kept By Persons Handling Filberts

By DICK WEST United Press International Washington - (UPI) - Handled any filberts lately? If so, be certain you "keep records of all filberts received, held and disposed of as prescribed by the filbert control board."

West

Among those who must keep records for the General Services Administration are parties who sell the government manganese, mica, beryl, asbestos, columbium - tantalum and mercury.

A beryl dealer apparently has to keep even more records than a filbert handler. The Maritime Administration requires the keeping of 29 types of records. These include "receipts for the quantities of sloop chest items delivered aboard ship."

"Filbert handlers" and "peanut shellers" are among the 848 groups that are currently required to keep records for the 10 executive departments and 18 independent agencies of the federal government.

These are, of course, in addition to the records that the 10 executive departments and 18 independent agencies keep for themselves.

A handy, thought-provoking list of the records that private citizens and organizations are required to keep has just been published by the General Services Administration, which itself requires the keeping of 11 different types of records.
